## Chapter 1 : Issues in the Semantics and Pragmatics of Disjunction - CRC Press Book

*Issues in the Semantics and Pragmatics of Disjunction (review) Sharbani Banerji Language, Volume 81, Number 4, December, pp. (Review).*

Artikel bewerten First published in , this book is about sentences containing the word or, dealing primarily with sentences in which or conjoins clauses, but also some cases in which it conjoins expressions of other categories. The author aims to give an account of the discourse properties and felicity conditions of disjunction, and to use this account in explaining the behaviour of presupposition projection and of anaphora in disjunctive sentences. The author begins by giving an account of the discourse properties and felicity conditions of disjunction before turning to the presupposition projection problem. The final two chapters discuss anaphora and its interactions with disjunction. What this dissertation is about 1. The Stalnakerian Model of Presupposition and Assertion 1. Disjunctive Sentences In Discourse; 2. The Basic Observations 2. Relation and Manner in the Stalnakerian Model 2. The Enriched Context Change Framework 2. Disjunction and the Relevant Informativity Condition 2. Disjunction and Simplicity 2. The Exclusive Interpretation of or 2. Critique of the ambiguity account 2. Exclusivity from exhaustiveness 2. Exclusivity from alternativeness 2. Conclusion Notes to Chapter Two; 3. The Basic Question 3. The Theoretical Issues 3. The Satisfaction Account of Presupposition Projection 3. Basics of the Satisfaction Account 3. CCPs for disjunction 3. Towards a New Account 3. Van der Sandt 3. Translating DRSs into Stalnakerian contexts 3. The Account in Action 3. Entailing disjunctions again 3. Conclusion Notes to Chapter Three; 4. Anaphora-based Accounts in Dynamic Semantic Theories 4. Groenendijk and Stokhof 4. Kamp and Reyle 4. A second DRT proposal: Krahmer and Muskens 4. Van der Sandt revisited 4. A Felicity-based Approach 4. Introduction to the account 4. The E-type account of anaphora 4. A felicity-based solution to the internal anaphora puzzle 4. Narrow scope antecedents 4. Non-E-type unbound anaphora 4. Conclusion Notes to Chapter Four; 5. The Basic Data 5. Anaphora to a disjunction of NPs 5. A First Reformulation of the E-type Account 5. A Compositional Structural E-type Account 5. Comparison with Chapter Four account 5. Narrow scope antecedents 5. Application to the External Anaphora Data 5. Anaphora to clausal disjunctions 5. The Single-antecedent Reading 5. Derivation of single-antecedent readings 5. Maximal quantifier antecedents 5. Other Approaches to External Anaphora 5. Further Issues for the E-type Account 5. Interpretation of plural pronouns 5. Anaphora to NP disjuncts and conjuncts 5. Semantics and Semiology ; 13 Verlagsort.

Semantics and Semiology Semantics and semiology are two of the most important branches of linguistics and have proven to be fecund areas for research. They examine language structures and how they are dictated by both the meanings and forms of communication employed “ semantics by focusing on the denotation of words and fixed word combinations, and semiology by studying sign and sign processes. As numerous interrelated fields connect to and sub-disciplines branch off from these major spheres, they are essential to a thorough grounding in linguistics and crucial for further study. A number of interrelated disciplines are also discussed in conjunction with semantics and semiology such as anaphora, pragmatics, syntax, discourse analysis and the philosophy of language. This set reissues 14 books originally published between to and will be of interest to students of linguistics and the philosophy of language.

## Chapter 3 : Semantics and Pragmatics

*Issues in the Semantics and Pragmatics of Disjunction (review) Issues in the Semantics and Pragmatics of Disjunction (review) Banerji, Sharbani. LANGUAGE, VOLUME 81, NUMBER 4 () throughout the article.*

Sorting It Out written by: Learn about the difference between the two terms and review examples of each. Although both are terms used in relation to the meanings of words, their usage is drastically different. Semantics refers to the meaning of words in a language and the meaning within the sentence. Semantics considers the meaning of the sentence without the context. The field of semantics focuses on three basic things: Semantics is just the meaning that the grammar and vocabulary impart, it does not account for any implied meaning. In each situation, the various listeners in the conversation define the ultimate meaning of the words, based on other clues that lend subtext to the meaning. Although semantics is concerned only with the exact, literal meaning of the words and their interrelations, pragmatic usage focuses on the inferred meaning that the speakers and listeners perceive. The following examples demonstrate the difference between the two: He was so tired he could sleep for days. In both of these examples, the context and pragmatic meaning really define the sentence. In the first, did the speaker really mean to say that the woman has not ever taken a shower, not even once? Although the sentence says just that, the listener in the conversation may understand, based on other factors, that the speaker means that the woman they are referring to has not taken a shower. In the second example, we have a guy who is so tired he can sleep for days. Is he really going to sleep for days? Semantically, we would need to take that sentence to mean exactly that. Some ways to make the transition easier is by learning phrases and idioms that are commonly said, but whose true meanings differ from the semantic meaning. Although full comprehension of pragmatic meaning in a new language can take time, students can speed up the process by practicing the most common exceptions to the semantic meaning. You may also find this lesson plan on teaching semantic meaning helpful. The Columbia Encyclopedia, 6th ed. An Introduction to English Semantics and Pragmatics. Edinburgh University Press,

She also holds an adjunct faculty position in the Linguistics department at the University of Pittsburgh. Her work covers topics in formal semantics, pragmatics and the philosophy of language. Research I am broadly interested in the question of how meaning is conveyed through language use. My research combines work in formal semantics, pragmatics, and the philosophy of language, with a focus on extra-linguistic aspects of interpretation. My primary interests at this time are in presupposition and in the overall architecture of the interpretation process. Convention, Intention and the Conversational Record: A reply to Lepore and Stone Preprint version. Paper to appear in Beyond Semantics and Pragmatics working title , edited by G. Where Information Structure meets Projective Content. Annual Review of Linguistics , Volume 3, pp. Explaining the projection behavior of factive verbs. Discourse Processes, Revision as of June Published online May 1, Language 89 1 , In Li, Nan and D. New Essays on H. Paul Grice, Palgrave Macmillan, , pp. Philosophy Compass 1 4 , , Lingua 6 , , Natural Language Semantics Understanding the Stalnakerian picture. Linguistics and Philosophy Volume 24 5 , In this paper, I review a number of arguments in favor of treating many of the central cases of presupposition as the result of conversational inference, rather than as lexically specified properties of particular expressions. I then argue that, despite the standard assumption to the contrary, the view of presupposition as constraints on the common ground is not consistent with the provision of a conversational account of particular presuppositional constraints. The argument revolves crucially around the workings of accommodation. I then offer an alternative view of the phenomenon of presupposition, which is compatible with a variety of sources for presuppositions. On the view offered here, presupposition is seen as a property of utterances. I argue that the presuppositions of an utterance are those propositions which an interpreter must take the speaker to accept in order to take the speaker to be fully cooperative, in the Gricean sense. Here are brief descriptions of those which I teach on a regular basis. Nature of Language An introduction to the systematic study of human language, spanning issues in the philosophy of language and contemporary linguistics. Linguistic Analysis A hands-on course teaching analysis of natural language. This course is a requirement for the Linguistics Minor.
