Consequently, her readership is mostly female. This applies equally to children in more traditional situations - all families are shown to have their shortcomings, and Wilson certainly does not advocate any conservative ideal. Tracy is an endearing character but, in contrast to the classic tradition of angelic child-orphans from *Oliver Twist* to, perhaps, *Harry Potter*, Wilson is brutally realistic: Tracy lies and steals, confuses fantasy and reality, and has difficulty forming relationships. She desperately wants a family to love her, but her behaviour makes this very difficult. Eventually, Tracy realises that she has a real chance of happiness - it will not resemble the fantasies she has spent her life creating, but it may just give her what she needs. While her mother develops depression, Elsa must take responsibility for younger members of the family, yet maintains her sense of humour throughout. Yet many of the adult characters are also shown sympathetically, or at least ambivalently, even when their behaviour is at fault. Marigold is endearing and affectionate, but she is infuriatingly irresponsible, and assumes the role of child rather than adult. This forces her daughters to take on the role of parent; Star is responsible and scolding, while Dolphin comforts and reassures: Marigold is depicted as a somewhat tragic figure. She was abandoned by her own mother, and she also suffers from a mental health disorder. Readers may find themselves experiencing the same ambivalent feelings towards Marigold as those experienced by her daughters - she is clearly vulnerable and desperately needs to be loved, and is therefore a sympathetic character, yet her child-like needs give her a disturbing inability to care for her daughters. It is also clear that Marigold dearly loves her daughters, but the novel raises the issue of whether love is really enough. Again, there is no definitive answer. These books are aimed at a slightly older age-group early teens but, paradoxically, they tackle less serious issues than some of the pre-teen books. Ellie the narrator, Nadine and Magda are all from relatively stable, secure families, and the series focuses on the ups and downs of adolescence - boyfriends, worries about appearance, conflict with parents and so on. The books do address bereavement, step-parents and mild eating disorders, but on the whole these three girls do not suffer from the more extreme fears and crises experienced by Tracy Beaker, Dolphin and other characters. Sylvie is in love with Carl, who has been her devoted best friend since they were toddlers. However, as they enter adolescence, Carl begins to withdraw, and Sylvie must come to terms with this huge shift in their friendship. My Sister Jodie is also about a close relationship undergoing a huge change - this time between two sisters. Quiet, sensible Pearl has always depended on Jodie, who is outgoing and rebellious, but their move to a new school sees Pearl settling in well while Jodie struggles. As Pearl develops newfound confidence, their roles towards each other gradually change. Wilson thus explores the way in which friendships and relationships require flexibility and adaptability in order to survive in the long-run. My Sister Jodie ends with a tragic death, which some readers have found shocking, but Wilson is not afraid to tackle taboo issues and she does not present her readers with a sugar-coated view of life. Wilson has also written two autobiographies, aimed at her young readers: *Jacky Daydream* and *My Secret Diary*
