### Chapter 1 : Jay Graydon | Credits | AllMusic

*The first release - BEBOP - on Jay Graydon's own record label SONIC THRUST RECORDS is the result of the united musical talents by a group of top-notch musicians, all first rate studio aces with many years of experience in the music industry.*

As you may notice many of the titles are intentionally humorous. The musicians on this album have perfect understanding of one another. The compositions are all new, apart from the national anthem of course. The collaboration of these five skilled musicians, offering each other elbow-room for equilibristic solos, is exceedingly professional and a joy to experience. Listen for instance to the exquisite flageolets opening and ending his rare arrangement of the national anthem, giving it renewed beauty. I was in Japan doing a promotional tour somewhere in the early 90s. The request was to play the first half of the song in a chord melody fashion and play the rest of the songs like Jimi Hendrix full blown rock! I spent the night before in the hotel room working out a chord melody arrangement. I played the arrangement and the rock stuff for the video. When I got back to LA, I found myself playing the arrangement and decided to complete the arrangement in full regarding chord melody style. Some of my guitar player friends liked the arrangement and said I should record it so that is the reason it is on the CD. Ironically, the timing of brought a new meaning to the arrangement!!! For instance, Wes Gillespie at thejazzsite. I am so floored with your musical talent and technical expertise. I can only hope that another jazz CD might find its way to us sometime in the future. West Coast himself, blows the lid off with one of the best straight-ahead jazz albums in recent years. Many may not be familiar with Jay Graydon. Twice Grammy awarded and 12 times nominated, Jay Graydon is L. Exciting things are happening on this CD. It will knock your socks off!
