MBase Map of Arizona, , scale 1: Wilson and others, scale 1: MGraham and Greenlee Counties, MNavajo and Apache Counties, Keith, , scale 1: Wilson, , scale 1: A free base map of Arizona showing all cross-section lines is included with the following sheets. MSheet One, Sections 1, 2, and 3. MSheet Two, Sections 4, 5, and 6. MSheet Three, Sections 7 and 8. Cone, with cross-sections by H. Peirce, , scale 1: Witcher, Claudia Stone, and W. MHistorical Epicenters in Arizona., by S. Nye, , scale 1: Coney, , scale 1: Gest, and Ed DeWitt, , scale 1: Scarborough, , scale 1: Volcanic Outcrops in Arizona, by R. Pearthree, , scale 1: Genualdi, , scale 1: Trapp, , scale 1: Grubensky, , scale 1: Black and white only. Demsey, , 10 p. Laubach, Dickson Cunningham, and S. Richard, , scale 1: Spencer, , 45 p. MD Map of Arizona, , scale 1: Available as a folded map in map envelope. MEarthquake Hazards Map, by P. Bausch, , scale 1: MGeologic Map of Arizona, by S. Pearthree, compilers, , scale 1: Rauzi, , scale 1: Unlike traditional printed maps, DGMs can be updated readily. When updated to include new geologic mapping, the map is provided a new publication year and version number for example, change from publication in to and from version 1. For minor changes made to the map, for example adding a cross section or incorporating new geochronologic data, the version number is changed fractionally for example, from 1. Since , most new maps have been released as part of our DGM series. DGM,S Three color maps, scale 1: Spencer, Ann Youberg, and T. DGM,S One color map, scale 1: DGM,T Text only, 30 p. ## Chapter 2 : Rincon Peak quadrangle, Arizona--Pima Co. : minute series (topographic) - Indiana State Libra

*Enter your mobile number or email address below and we'll send you a link to download the free Kindle App. Then you can start reading Kindle books on your smartphone, tablet, or computer - no Kindle device required.*

You may be familiar with the paper version of these U. They are popular with anyone who needs detailed maps that include elevation contours and are often simply called "topo maps". The most common Quad Maps are at 1: A digital raster graphic DRG is a scanned image of a U. Geological Survey standard series topographic map. Quad Maps include a map "collar" which is a white border that include legend and other information. For this interactive map, the collar has been clipped off and the maps have been georeferenced to align with each other in a seamless grid. Due to variations in the individual Quad Maps, the seams are often visible on the Arizona map. In addition to being at different original paper map scales, each of the three Quad Map layers have other differences. Generally, interactive maps such as MapGuide maps are designed to be viewed at any scale. More detail becomes available as you zoom in and identifying labels scale to match the current view. Most users are not aware of this because the map looks "right" regardless of scale. With these paper maps scanned as DRGs and input into the MapGuide system, the MapGuide viewer allows panning and zooming at any scale, close up or far away. Conversely, if you zoom way in, you will see a blowup of a very small area as if you were using a magnifying glass on the paper map. For this reason, the Arizona MapGuide map includes Quad Maps of three different original paper scales. You can choose the most appropriate of the three original Quad Map scales for your current zoom level as separate layers in the legend to the left of the map area. If more than one Quad Map layer is turned on, it will cover the others that are still there and taking processing time when you pan and zoom. Remember that the MapGuide legend layer order shows the order that displayed layers are "stacked" on the displayed map. No Quad Map updates are planned for this MapGuide map. Holding the mouse cursor over individual map areas shows yellow map tips with the Quad Map name, map revision date and map publication date where available. Credits In addition to the U. This Arizona MapGuide map would not have been possible without their efforts.

## Chapter 3 : Jaynes (Pima County, Arizona): Local Newspapers List

*The item Oro Valley quadrangle, Arizona--Pima Co.: minute series (topographic), produced by the United States Geological Survey represents a specific, individual, material embodiment of a distinct intellectual or artistic creation found in Indiana State Library.*

## Chapter 4 : Home | Haynes Publishing

*Newspapers Neighboring Jaynes The following newspapers were published within 50 miles [ km] of Jaynes. The papers have been grouped by the community in which they were published, with the communities listed in order of their distance from Jaynes.*

## Chapter 5 : Canada del Oro Wash | AZGS Document Repository

*united states department of the interior geological survey r 13 5' 00" a goo r 12 07 wes r meters paul vs cat mountain quadrangle arizona-pima co.*

## Chapter 6 : Pima County Geographic Information Systems - Pima County MapGuide Maps

*Below are cemeteries that are in the vicinity of Jaynes (within 20 miles [ km]).The cemeteries are listed in alphabetical order. This is a new section of our Gazetteer and we're still collecting data about cemeteries and their location.*

## Chapter 7 : Information - Housing at Purdue University

*Rincon Peak quadrangle, Arizona--Pima Co.: minute series (topographic), produced by the United States Geological Survey Resource Information The item Rincon Peak quadrangle, Arizona--Pima Co.: minute series (topographic), produced by the United States Geological Survey.*

## Chapter 8 : Biggs, Thomas | Department of Environmental Sciences, University of Virginia, calendrierdelas

*Mineral production is essential to our civilization because minerals provide the raw materials which allow our society to function. Pima County is endowed with many mineral resources, not only copper mines, but also the important products such as sand, gravel, and limestone used everyday in supporting the infrastructure of our cities.*

## Chapter 9 : Antevs Miscellaneous Maps

*Tucson Mts, Pima Co., Arizona, USA: The Tucson Mountains lie in southeastern Arizona and occupy a large part of the eastern half of the Langhorne quadrangle, between latitude 32°00' and 32°30'N. and longitude 111°00' and 111°15'W.*
