

Best Lawn Mower Manuals Collection on the Internet from honda,john deere to ames and more.

Headlights will drain the battery rapidly if key switch is left in headlights on position B with the engine off. Children or bystanders may be injured by runover and rotating blades. Before traveling forward or rearward: Stop machine movement before shifting between reverse and forward to prevent transmission damage. Move transmission shift lever B to desired travel speed. Travel in Reverse MX 1. Any operating attachment and the engine will stop as the gear shift lever is moved to R reverse with attachment engaged. Pull PTO lever C back to the off position to disengage attachment. Look behind the machine to be sure there are no bystanders nearby. Move shift lever B to R reverse position. Any operating attachment and the engine will stop as the reverse foot pedal is depressed with attachment engaged. Touch the reverse travel pedal D with front of foot and slide foot over pedal from front to rear. Rotating blades are dangerous. Before backing up, carefully check the area around the machine. Backing up while the mower is engaged is strongly discouraged. The Reverse Implement Option should be used only when operating another attachment or when the operator deems it necessary to reposition the machine with the mower engaged. Look behind the machine to be sure there are no bystanders. Push and hold in the reverse implement switch A while depressing reverse foot pedal slightly for automatic transmission or moving the gear shift lever to the R reverse position for gear transmission. Start engine and engage mower. Begin again with Step 2. Release the reverse implement switch and reposition the machine as the machine begins to move rearward. The mower should continue operating. Repeat procedure to position the machine again. Do not use cruise control when going down hills. Machine speed will increase. Operate machine in a large, open area to learn how the cruise control works. Use cruise control when you want to maintain travel speed without having to hold the forward travel pedal down. Cruise control operates only for forward travel. Engage Cruise Control 1. Push forward pedal down until you reach desired travel speed. Pull lever A up and release forward pedal to lock the cruise control. Stay clear of rotating drivelines: Start engine and run at half speed for a couple of minutes to warm up. Lower mower to desired cutting height position. Pull PTO switch A up. Push PTO lever B forward. Push throttle lever C up to the full throttle position. The mower and engine will stop as the reverse foot pedal is depressed for Automatic Transmission or when the gear shift lever is moved to the R reverse position for Gear Transmission with mower engaged. Disengage mower blades before moving in reverse. Pull PTO lever back. Push PTO switch down. With the free-wheeling valve open, the machine will have unrestricted motion. Transmission damage may occur if the machine is towed or moved incorrectly: Unlock the park brake. Put transmission in N neutral. Pull out on free-wheeling lever A. Push machine to desired location. The transmission might be damaged if the free-wheeling lever is not pushed back to operating position before attempting to start the engine. Do not start or operate the machine with the free-wheeling lever in the push position. Push free-wheeling lever back in. Do not attempt to unplug attachment with machine running. Shut off the engine and remove the key before getting off the seat to inspect the machine and attachment. Make sure all machine parts are stopped before raising hopper top or removing chutes. If grass builds up in front of mower discharge chute, check for plugged chute or problems with blower assembly if equipped. If there is a trail of clippings behind mower or clippings blow to the side, check for plugged chute, full collector bags, or problems with blower assembly. Removing Debris From Inspection Points: Wait for all moving parts to stop before getting off to inspect machine. Remove chute from mower deck or blower assembly. Check under mower deck for debris. Transporting Machine on Trailer Be sure trailer has all the necessary lights and signs required by law. Use extra care when loading or unloading the machine onto a trailer or truck. Park trailer on level surface. Drive machine onto heavy-duty trailer. Lower mower to trailer deck. Turn off machine and remove key. Fasten lawn tractor to trailer with heavy-duty straps, chains, or cables. Both front and rear straps must be directed down and outward from tractor. Before adjusting or servicing mower: Make sure bagger blades are not installed for maximum side discharge operation. Raise discharge chute A and metal deflector B. Install mulch cover C onto mower deck D. Mulch cover lip E must be seated in mower deck groove. Hook mulch cover to mower deck: Lower discharge chute and metal
