Some of the killers I write about have lied all their lives, and some have lied only to throw their victims off balance so that they became vulnerable. Once a lie is successful in giving the murderer what he or she wants, it grows and multiplies, burnished and perfected until it works every time. All their crimes were examples of conscienceless cruelty. Perhaps more shocking is the fact that they were so often forgiven and were offered so many chances to start over. In the end, each reverted to type; they were as dangerous as a rabid lion in the street. Hundreds of people send me suggestions about cases for book topics, and a third of them actually offer me stories from their own lives. Many long-time readers can spot the characteristics I look for in a criminal case, and I appreciate that, but I can choose only a small percentage of the suggestions presented to me. Try as I might, I can write only two books a year. My accounts were much shorter, naturally, but I was able to write two crime stories every week. Fortunately, I saved copies of all of them, and some stand out sharply in my memory. In the true-crime files that follow, I came to know many of the people involved very well. Sometimes I knew them before the path to crime escalated to violence, and sometimes it was long after. For twenty years I was a familiar visitor in various homicide units from Seattle, Washington, north to Bellingham, and south to Eugene, Oregon. The detectives I met shared their investigative techniques and their gut feelings about murder with me. This book is different from all the others. To my great surprise, in the long title case—“Last Dance, Last Chance”—I heard from both the would-be killer and the victim, albeit two years apart. She wanted to tell me about a story in her city that she thought would make an interesting book. It sounded interesting—“even more interesting when she gave me the name of the accused, which sounded vaguely familiar. I dug deep into a box of newspaper clippings, letters, and my own notes scribbled on fading yellow legal pads and found something that matched my recall. I finally located what I sought—“notes on a phone call from a physician in Buffalo, New York. He had called to persuade me to write a book that would unveil the shabby treatment he felt he had received from the New York State Department of Health. They had taken away his license to practice medicine for reasons, he said, that were entirely prejudicial. I remember that he was very well-spoken, with a deep authoritative voice, and that I felt some sympathy for him as he told me his life was in ashes. I suggested that he contact a reporter in Buffalo who might be interested in exposing the roots of a medical scandal. He seemed to understand, and he even introduced me to his wife, who was listening on an extension. A few days later, I mailed him the eight-page handout I have put together for aspiring writers. He sent me the manuscript of his biography, which was more than a hundred pages long, single-spaced, and full of details about his life, especially about his career in medicine and its disastrous ending. His wife obviously idolized the doctor, and she went on for chapter after chapter about how wonderful and kind he was, how brilliant and dedicated. At most, it dealt with civil matters and possible medical malpractice, and I had a book deadline to meet. But when someone told me the name—“Anthony Pignataro”—it certainly had a familiar ring. Curious, I reread the manuscript he had sent me and realized that it had to be the same heartsick doctor who had lost his license to practice medicine in By , he appeared to have even more problems in his life. When I heard about the charges against Dr. The Pignataro case was being handled by the chief assistant D. I told Sedita about my short correspondence with Dr. Because I knew that Pignataro had read my books, I sent Sedita two volumes that I thought might have significant ties to his current investigation: Frank Sedita eventually passed them on to Deborah Pignataro, Dr. And one day, she called me. She told me of an all-too-true scenario that seemed almost unbelievable. This story began quite routinely as a civil matter, but it became an incredibly tangled spiderweb of pretense, deception, deadly plots, and tragedy. This time it was western New York State, where I spent two years when my then husband was

assigned to an anti-aircraft battery in the middle of the Tuscarora Indian Reservation. We lived in a small trailer a few miles from the tiny village of Youngstown, New York, in the farthest northwestern corner of New York State. My first child was born in Niagara Falls at Mt. Erie and Niagara Counties were wonderful in the summer and fall when the fruit trees of western New York were laden with apples and peaches, and bitterly cold in the winter when the wind roared inland from Lake Erie and Lake Ontario. But Buffalo gets so cold that Lake Erie turns to ice even as it crashes against the shoreline. Just as I never thought of Dr. Anthony Pignataro after our brief phone meeting in , I never expected to return to Buffalo or Niagara Falls or the thin eastern belt of Ontario where the land barely separates Lake Ontario from Lake Erie. But the twists and turns of our lives are nothing if not unpredictable. In , I went back to the place where I had lived as a very young wife. Fittingly, it was winter. The bitter cold was still a shock, although Buffalo natives barely acknowledged it. They did acknowledge the blizzard that brought ten feet of snow and virtually paralyzed the city at the end of . When I arrived two weeks later, the billowing drifts had diminished, but they were still there. Going back to my own early days was the only way I could explore the labyrinth of lies that defined the story of Anthony and Deborah Pignataro. Their falling in love and getting married once seemed like the happy ending to a dream romance.
