The show has ended, but these real places offer lots of ambiance while you wait until the next season arrives. Travel + Leisure Relive 'Westworld' at These 7 Destinations While You Wait for Season 2.

Gadget Hacks Since early March, iOS users have been able to enjoy the most popular video game sweeping the rounds. Android users have been left envious as they wait for a "few months," the only vague release date given by Epic Games. In the meantime, there are a few ways we can still satisfy our urge to play. Somehow, a few months has turned into half a year now. There are a few games on the Play Store that offer a similar experience to the upcoming Android version of Fortnite Battle Royale that are currently out now. While none of the solutions listed below are a perfect replacement, they will help you get your fingers ready as you wait for the official version to come out. PUBG Mobile I expect you might have seen this coming, but the mobile version game that put the battle royale genre on the map is already available on the Play Store. Tencent Games is also better versed in the mobile space, as demonstrated by their widely successful Arena of Valor. There are more weapons that borrow their style and names from real-world counterparts. Additionally, PUBG Mobile lets you configure the graphics settings and frame rate on your device to get the best experience. Battlelands Royale Let me get this out of the way: Battlelands Royale copies a lot of Fortnite Battle Royale. The familiar layout of the lobby, its use of a pass for additional content which is also called Battle Pass, and its in-game currency called Battle Bucks are some of the ways it blatantly rips off Fortnite Battle Royale. Chinatown Wars, Battlelands Royale places the camera above, radically changing how the game is played. With this camera angle, Futureplay had to make some changes to gameplay. First, parachuting is conducted automatically. You pick the location, then you will parachute to that area, with control only returning a few feet above the ground. Second, picking up weapons is automatic and based on a timer. Stand over the weapon and a progress bar will turn green. When you pick up the weapon, you will notice that shooting is handled differently as well. Similar to old Contra games, you select and hold in the direction you want to fire, then a line will appear designating both the direction and distance of the bullets. Third, there is no way to hold more than one weapon. Instead, when you move over to a new weapon, you switch to it and lose the old weapon for good. Using the app Steam Link, you can connect your phone to your computer and stream the game onto your phone. Assuming you already have Fortnite installed on your computer, you should see Epic Games Launcher. This is the library which contains Fortnite, which needs to be added to your Steam library. Follow the instructions in the Steam Link Beta app and connect your phone to your computer. Once connected, select "Start Playing" to begin the link. Select "Library" and locate Epic Games Launcher. I would strongly recommend using a controller. You can check this list to see if your controller of choice supports Steam Link. The performance of the game is completely dependent on your computer, so while you can run this using an old laptop, for the best experience, use a gaming PC. Since it streams the game, you can run it either on your Wi-Fi network or cellular data. Install Vortex Cloud Gaming for free from the Google Play Store There is no installation or downloading needed to play game since the entirety of the game is run from their servers. Instead, once you have the app, you can select the game you want and start enjoying. Each one of these methods will bring the addictive battle royale experience to your Android device.

Wait at leisure while the enemy labours It is an advantage to choose the time and place for battle. In this way you know when and where the battle will take place, while your enemy does not.

Hurd and Denise M. Defining leisure, play, and recreation provides us as leisure professionals with a strong foundation for the programs, services, and facilities that we provide. While we might disagree on the standard definition of leisure, play, or recreation, we are all concerned with providing an experience for participants. Whether we work in the public, private nonprofit, or commercial sector, all three concepts are driving forces behind the experiences we provide. Definitions of Leisure There is debate about how to define leisure. However, there is a general consensus that there are three primary ways in which to consider leisure: Leisure as Time By this definition leisure is time free from obligations, work paid and unpaid, and tasks required for existing sleeping, eating. Leisure time is residual time. Some people argue it is the constructive use of free time. While many may view free time as all nonworking hours, only a small amount of time spent away from work is actually free from other obligations that are necessary for existence, such as sleeping and eating. Leisure as Activity Leisure can also be viewed as activities that people engage in during their free time—activities that are not work oriented or that do not involve life maintenance tasks such as housecleaning or sleeping. Leisure as activity encompasses the activities that we engage in for reasons as varied as relaxation, competition, or growth and may include reading for pleasure, meditating, painting, and participating in sports. This definition gives no heed to how a person feels while doing the activity; it simply states that certain activities qualify as leisure because they take place during time away from work and are not engaged in for existence. However, as has been argued by many, it is extremely difficult to come up with a list of activities that everyone agrees represents leisure—to some an activity might be a leisure activity and to others it might not necessarily be a leisure activity. Therefore, with this definition the line between work and leisure is not clear in that what is leisure to some may be work to others and vice versa. Concepts such as perceived freedom, intrinsic motivation, perceived competence, and positive affect are critical to determining whether an experience is leisure or not leisure. Perceived freedom also involves the absence of external constraints to participation. The second requirement of leisure as state of mind, intrinsic motivation, means that the person is moved from within to participate. The person is not influenced by external factors e. Perceived competence is also critical to leisure defined as state of mind. Perceived competence refers to the skills people believe they possess and whether their skill levels are in line with the degree of challenge inherent in an experience. Perceived competence relates strongly to satisfaction, and for successful participation to occur, the skill-to-challenge ratio must be appropriate. Positive affect refers to enjoyment, and this enjoyment comes from a sense of choice. What may be a leisure experience for one person may not be for another; whether an experience is leisure depends on many factors. Enjoyment, motivation, and choice are three of the most important of these factors. Therefore, when different individuals engage in the same activity, their state of mind can differ drastically. Definition of Play Unlike leisure, play has a more singular definition. Play is imaginative, intrinsically motivated, nonserious, freely chosen, and actively engaging. While most people see play as the domain of children, adults also play, although often their play is more entwined with rules and regulations, which calls into question how playful their play really is. Definition of Recreation There is some consensus on the definition of recreation. Recreation is an activity that people engage in during their free time, that people enjoy, and that people recognize as having socially redeeming values. Unlike leisure, recreation has a connotation of being morally acceptable not just to the individual but also to society as a whole, and thus we program for those activities within that context. While recreation activities can take many forms, they must contribute to society in a way that society deems acceptable. This means that activities deemed socially acceptable for recreation can change over time. Examples of recreational activities are endless and include sports, music, games, travel, reading, arts and crafts, and dance. The specific activity performed is less important than the reason for performing the activity, which is the outcome. For most the overarching desired outcome is recreation or restoration. Participants hope that their recreation pursuits can help them to

balance their lives and refresh themselves from their work as well as other mandated activities such as housecleaning, child rearing, and so on. People also see recreation as a social instrument because of its contribution to society. That is, professionals have long used recreation programs and services to produce socially desirable outcomes, such as the wise use of free time, physical fitness, and positive youth development. The organized development of recreation programs to meet a variety of physical, psychological, and social needs has led to recreation playing a role as a social instrument for well-being and, in some cases, change. There are also for-profit agencies, such as fitness centers and spas, designed to provide positive outcomes. The above excerpt is from:

Chapter 3 : Wait at leisure while the enemy labours - The Thirty-Six Stratagems [Book]

LIFE WHILE-YOU-WAIT. Life While-You-Wait. Performance without rehearsal. Body without alterations. Head without premeditation. I know nothing of the role I play.

We shall start with another orthoparadoxical invocation from the Meister. You may not understand it today, but you will hopefully undergo it by the end of this series, for it maketh perfect nonsense: Distinction comes from Absolute Unity. Absolute Unity is the distinction and the distinction is the unity. The greater the distinction, the greater the unity, for it is the distinction without distinction. In fact, he references Eckhart on the matter: Whatever God gives, he gives through it. Such a person is indeed condemned to live in ultimate conflict and self-contradiction, not to mention at the periphery of the cosmos, where I rarely hang out. Meanwhile, Raccoons are only condemned to the Absolute, which is a much better thing to be condemned to. You might say that our ecstasy is His enstasy. Indeed, Eckhart said as much in his inimitable way: According to McGinn, Eckhart conceived of this divine movement "as the fundamental law of reality taught by the Bible. Here, this explains it: This circle proceeds vertically from Cosmogeneration to Cosmobliteration, hence the absurcular structure of my book -- which begins, by the way, with an Eckhart quote about the negation of negation that eternally precedes the creatio ex nihilo -- you know, the absolutely BLACK PAGE on p. The rivers return to the place from whence they flowed, so that they may flow again. Can I get a wetness? Or do you just need an adult diaper? Now, Eckhart was far from alone in his perfect nonsense. Just yesterday evening I coincidentally stumbled upon a passage by Balthasar in reference to the great Origen. It goes a little like this: Only in orientation towards God is it immortal, only in derivation from God is it ever new in being, only through relationship to him is it good and blessedly happy. Thus the soul must strive for this participation with the most absolute of commitments, and build its life on the foundation of this unmerited grace. Bolton notes that there is a "part" of us that mediates between God and creation. In my case, I call it "Bob," but you can call yours what you want. Each kernel is "unique," and yet, none other than a particular mode of the universal: In ether worlds, just like any other day.

What to do while you wait for the partial to become total. Travel + Leisure How to Make a Pinhole Viewer for the Total Solar Eclipse, and What to Do While You Wait for Totality.

It is given to Henry by the Sasau charlatan once he agrees to become his "apprentice". Magic of all colours and shades, relics, elixirs and talismans - all these miraculous things you can get from him. Naturally, like all trades, he has to stock up now and again, and that, it seems, is where I come in. Objectives Speak to the Sasau charlatan and become his apprentice. Get a branch from the topping out. Bring something to the charlatan. Optional Get the burial shroud. Take the shroud to the charlatan. Wait for the charlatan at his dwelling. Hold the rioters back. You can either persuade Procopius to go to the blacksmith and have the tooth pulled out or you can fight him and knock him out and loot the tooth. If you persuade Procopius to go to the blacksmith you need to escort him there. Procopius will walk around and stall until you have had 3 dialogues with him, its a bit time consuming but if your reputation is low, this is the better option. You can either persuade the Gambler to give you the talisman, pickpocket it from him or win it from a game of dice with him. Either climb the construction tower or shoot a part of the tree down from the ground with your bow. Collect the topping from the ground below. Deliver the three talismans to the charlatan. Get the burial shroud. Talk to the Townsman and he will tell you that there will always be someone watching over the newly deceased man. It it the person watching over the newly deceased man is his son: You can persuade him to donate the shroud but this option seems to be bugged, you will succeed in persuading him into giving you the shroud but you never got it. If you the it from the newly deceased man you will be stealing and he will report you. You can knock him out and then take the shroud. It it the person watching over the newly deceased man is someone else than his son you can lie, choose option that you are from Vlashim, then choose Lucy and you can pickpock the dead man in peace. Talk to the charlatan and he will tell you to be quiet and to meet him at his house. Talk to the rioters and the side quest is complete.

As thirty-six is the square of six, it therefore acted as a metaphor for numerous strategies. Instead, the prevailing view is that the Thirty-Six Stratagems may have originated in both written and oral history, with many different versions compiled by different authors throughout Chinese history. Some stratagems reference occurrences in the time of Sun Bin , approx. It was subsequently reprinted and distributed with growing popularity. The first three chapters generally describe tactics for use in advantageous situations, whereas the last three chapters contain stratagems that are more suitable for disadvantageous situations. The original text of the Thirty-Six Stratagems has a laconic style that is common to Classical Chinese. Each proverb is accompanied by a short comment, no longer than a sentence or two, that explains how said proverb is applicable to military tactics. These 36 Chinese proverbs are related to 36 battle scenarios in Chinese history and folklore, predominantly of the Warring States period and the Three Kingdoms Period. The Thirty-Six Stratagems consists of 6 chapters, each chapter consists of 6 stratagems. Know that he cannot be superior in all things. Somewhere there is a gap in the armour, a weakness that can be attacked instead. The idea here is to avoid a head-on battle with a strong enemy, and instead strike at his weakness elsewhere. This will force the strong enemy to retreat in order to support his weakness. Battling against the now tired and low-morale enemy will give a much higher chance of success. The idea here is to cause damage to the enemy by getting a third party to do the deed. In this way you know when and where the battle will take place, while your enemy does not. Encourage your enemy to expend his energy in futile quests while you conserve your strength. When he is exhausted and confused, you attack with energy and purpose. The idea is to have your troops well-prepared for battle, in the same time that the enemy is rushing to fight against you. This will give your troops a huge advantage in the upcoming battle, of which you will get to select the time and place. This is the time to attack. Keep gathering internal information about an enemy. If the enemy is currently in its weakest state ever, attack it without mercy and totally destroy it to prevent future troubles. Even when face to face with an enemy, surprise can still be employed by attacking where he least expects it. The idea here is to get the enemy to focus his forces in a location, and then attack elsewhere which would be weakly defended. Make somebody believe there was something when there is in fact nothing. Another method is to create an illusion that something does not exist, while it does. As the enemy concentrates on the decoy, he will miss you sneaking up to him. This tactic is an extension of the "Make a sound in the east, then strike in the west" tactic. In the present day, "sneak through the passage of Chencang" also has the meaning of having an affair or doing something that is illegal. Then go in at full strength and pick up the pieces. When you have gained his trust, move against him in secret. This is the scapegoat strategy whereby someone else suffers the consequences so that the rest do not. More widely used as "[Do not] startle the snake by hitting the grass". An imprudent act will give your position or intentions away to the enemy. Revive something from the past by giving it a new purpose or bring to life old ideas, customs, or traditions and reinterpret them to fit your purposes. Instead lure him away from his position thus separating him from his source of strength. To prevent this you let the enemy believe he still has a chance for freedom. His will to fight is thus dampened by his desire to escape. If the commander falls the rest of the army will disperse or come over to your side. If, however, they are allied to the leader through loyalty then beware, the army can continue to fight on after his death out of vengeance. This is the very essence of indirect approach: Literally, take the fuel out of the fire. This strategy is mainly used to escape from enemy of superior strength. Do not rush into action. The battle fields are close to your own country, thus it is easier for your troops to get supplies and to defend the conquered land. Make allies with nations far away from you, as it is unwise to invade them. Once the enemy is defeated, use those resources to turn on the ally that lent you them in the first place. In this way you remove the supporting pillar, the common link that makes a group of men an effective fighting force. Without directly naming names, those accused cannot retaliate without revealing their complicity. Lure your opponent into underestimating your ability until, overconfident,

he drops his guard. Then you may attack. Then cut off his lines of communication and avenue of escape. To save himself, he must fight both your own forces and the elements of nature. Through the use of artifice and disguise, make something of no value appear valuable; of no threat appear dangerous; of no use appear useful. Initially, pretend to be a guest to be accepted, but develop from inside and become the owner later. This strategy can work on three levels. First, the ruler becomes so enamoured with the beauty that he neglects his duties and allows his vigilance to wane. Second, the group of men will begin to have issues if the desired women courts another man, thus creating conflict and aggressive behavior. Third, other females at court, motivated by jealousy and envy, begin to plot intrigues further exacerbating the situation. It works best by acting calm and at ease when your enemy expects you to be tense. This ploy is only successful if in most cases you do have a powerful hidden force and only sparsely use the empty fort strategy. While he is preoccupied settling internal disputes, his ability to attack or defend is compromised. In the first, the enemy is lulled into relaxing his guard since he no longer considers you to be an immediate threat. The second is a way of ingratiating yourself with your enemy by pretending the injury was caused by a mutual enemy. Keep different plans operating in an overall scheme; however, in this manner if any one strategy fails, then the chain breaks and the whole scheme fails. When your side is losing, there are only three choices remaining: Surrender is complete defeat, compromise is half defeat, but escape is not defeat. As long as you are not defeated, you still have a chance. This is the most famous of the stratagems, immortalized in the form of a Chinese idiom:
