

## Chapter 1 : Spelling the long vowel sound /a/ a-e, ai, ei, ay

*Long Vowel Sounds - a Word List a Make, Take & Teach a \_ e acorn apron alien agent basic data baby lady cable radio shaky paper label potato hazy maple table tomato.*

How are the words organized? The cards in this deck are organized by word structure type. You will notice that the consonants and vowels used here describe the sounds in the word, not necessarily the letters. Spelling in the English language is so much fun, right? Who would benefit from using these cards? The children who would benefit most from using these decks of cards are children who have multiple speech errors and have difficulty putting together simple words such as these. Children with apraxia of speech, autism, Down Syndrome, and severe phonological processes are all good fits for these cards as long as they are still working on putting together sounds to form simple words. You can always move to more difficult words later when your child is ready. How do I choose which cards to start with? Start with the consonant-vowel CV and vowel-consonant VC word cards. See if your child can say the word on his own. If not, these will be the decks you start with. If he cannot say these words most of the time, choose this deck to start with. If your child cannot say these words correctly most of the time, use this deck to start. If your child is able to say all of those words, go back through and write down which particular sounds your child had trouble with when saying these words. Focus on teaching him that particular sound. How do we practice the cards we chose to start with? First, have your child imitate the word after you. Say the word for your child and have him repeat it back. Practice it a few times until it sounds pretty good and then move on to the next word. You can do this while taking turns in a game or while playing with a favorite toy for example, you could make him say a few words before he gets another piece of the train. Have him attempt to say the word on its own. If he can say the word, praise him and move to the next one. If he cannot say the word, go back to imitation for that one and have him repeat it back after you. Then, move on to the next word. Once your child can say these words on his own most of the time, you will want to move on to having him say them in two-word phrases. Once your child is able to do this, you have a few options. If your child is speaking in sentences already, you can try having your child create sentences with the target word. How can I make this fun so my child wants to do it? You can entice your child to want to work on speech sounds by making it fun! Try some of these ideas: Play a game while you work Trace something while you work Give them a piece to something after they do a little work like a piece to marbleworks Hold yoga poses while doing work Perform actions while doing work can you say your word while hopping on one foot?

## Chapter 2 : Multisyllabic Word Lists Organized by Vowel Sound

*Long vowel sounds are typically produced when a single vowel is found at the end of a word or syllable, such as "go". Another rule for long vowel words is simply stated in the rhyme, "When two vowels go walking, the first one does the talking."*

Examples with phonetic symbols: That means some and sum are homophones: So are son and sun. See the course below for more examples and practice. Different English dialects pronounce certain vowels differently than the general rules given above. English speakers can almost always understand people speaking other dialects of English without difficulties. For the exact pronunciation of any word, consult a good dictionary. Most list the sound symbols they use on one of the front pages. This dictionary gives both British and American pronunciations of each word. It can help you recognize more of the words you know when you read them. It will also help you spell better and pronounce new words. Most importantly, it also teaches a way I just learned to remember the different vowel sounds using colors. These are easier for most of us than learning the International Phonetic Alphabet. The Vowel Sounds and Spellings course includes lessons on the ways each vowel and its digraphs can be pronounced and spelled, including times when a letter is used for a different vowel sound. It should make English pronunciation and spelling simpler for you. If there are certain things you especially want to learn about vowel sounds or spelling, you can also leave a comment or question in the box below. This Form cannot be submitted until the missing fields labelled below in red have been filled in Questions or comments? Please note that all fields followed by an asterisk must be filled in. I have read and accept the privacy policy. I consent to you using my contact information to reply to my request for information or my questions about English on this form. If you would like, you can also download a pdf as requested in the comments with an expanded section on the short and long vowels from this page. It adds color images to help you recognize each sound, as mentioned in the course information above. Because English has adopted words and often some of their sounds, from so many other languages, none of these rules is always true. However, these English vowel rules will help you guess at the pronunciation of words you read. For that reason, they may also help you guess their meaning, if you have heard them but not read them before. They should also help make English spelling a little easier. It also links to the website of the teachers who designed the chart.

## Chapter 3 : Short Vowel Sound - Word Lists

*A long vowel is a vowel that is pronounced longer than others. Some examples of long vowel words help you to understand the concept. A long vowel is a vowel that is pronounced the same as the name of the letter.*

## Chapter 4 : Teaching Long Vowel Spelling Patterns - Make Take & Teach

*List of Short Vowel Words. Words with only three letters are the easiest to make the short vowel sound out of, due to the fact that only having three letters typically doesn't allow for a second vowel to force the long vowel sound.*

## Chapter 5 : Scrabble Vowel Words List

*The short vowel sheet\* features 80 common word patterns and the long vowel sheet features common word patterns. There is great power in the words because when the first letter {onset} is changed, thousands of words can be spelled!*

## Chapter 6 : Articulation Cards: CV, VC, CVC, CVCV - Speech And Language Kids

*A list of vowel-only words that can be also be used in the Scrabble® Crossword Game. This vowel word list will help you when you're stuck with a rack with nothing but vowels in it. Never fear though, there are still a lot of options for such*
