"Magoosh was exactly what I needed to kickstart my GRE prep. The practice questions were incredibly addictive and the dashboard progress pie chart very encouraging. The quick turnaround time in email responses was very appreciated."

There are no class meetings, no textbooks, no DVDs, and no specific timeline. All you need is your computer, tablet or smartphone and the ability to focus on getting the job done. The personalized dashboard is a breeze to navigate, it suggests video lessons based on your progress, and compares your results with other students so that you can get an idea of your abilities and can focus on those areas that need it most. Broad Range of Study Schedules One great feature Magoosh provides is a series of study plans that range from 1 week to 6 months, depending on how much time you have left before you take the GRE. Although the study plans do include instructions to practice material from the Premium Magoosh GRE course material which you have to purchase, they also encourage the use of free resources, such as the GRE flash cards as well as suggestions to read articles from major journals and newspapers to boost your vocabulary. It is hard to find such good materials and a well-designed site at that price, so you should take advantage of it while it lasts! They are ranked in order of difficulty so that you can zero in on those questions you need the most practice with to achieve your target score. As an added measure of reliability, the Score Predictor gives you a predicted range for your performance on the actual GRE. Magoosh does this by comparing your performance in the program with data from other Magoosh students, such as their official GRE scores and their performances in the prep program. If after completing the premium program, you do not see a 5 point increase over your old score, you get your money back. See their website for the details to make sure you meet all the requirements. It would have been nice to actually have a teacher or instructor to answer specific questions. The ease of use was good. It was pretty easy to use with little to no difficulty. Navigating it was easy and using all the products within it was not hard. It gave me a lot of study time, and test, and things to go over. I felt much more prepared after using Magoosh than I would have if I had not taken the time to use it. This really helped me succeed in my chosen field of study in college. I would definitely recommend GRE prep courses to anyone seriously considering continuing their education. The teachers were all great, for the most part. Some came off like they had a stick up their butts, but I do realize everyone has a bad day every once in a while. The materials were reasonably priced and easy to use. These GRE prep courses really helped me in school. Helpful 2 people found this review helpful Not sure how to choose? Email Thank you, you have successfully subscribed to our newsletter! Enjoy reading our tips and recommendations. We value your privacy. The teacher was adequate but did not add anything to my experience. I would have rather just had the book and done the problems on my own because they just discussed more about taking the test than the concepts themselves. There was plentiful materials. There were so many practice tests and lessons to read to review concepts that I could not even finish them all by the time I took the GRE. I felt somewhat prepared for the GRE because I could understand the time limits and knew the types of questions to consider, but I was not prepared for a variety of the language comprehension concepts. It helped me a lot. Let me see what to expect, prepare and study for it. It helped me score higher than I would have without it. It was easy to study it yourself and categorized in sections it helped me a lot and was very knowledgeable for me to study for the test. It was very easy and had a lot of study materials, practice test, vocab words and everything. Definitely worth it to buy if you want to do the best you possibly can on your test. The preparation was great nothing short of perfect. The GRE prep course helped me tremendously and was very easy to use. Helped me not be so intimidated of the test itself. Text completion is the most difficult one, reading comprehension is okay, math is very good. Recommend to use mock test, there will be an extra verbal just like the real test. The teacher is very good, he knows about the test very well, his explanation is very understandable. The website is very accessible as long as you have Internet. First, I watched all teaching videos, then practiced a little bit, then I took mock test twice every week for about one month. Finally, I worked the rest of unanswered questions. It was a good experience. Helpful 3 people found this review helpful How do I know I can trust these reviews about Magoosh? We require contact information to ensure our reviewers are real. Our full length practice test questions are drawn from our pool of + questions and you can take about 6 full-length tests before running out of new questions; however we recommend only taking and saving the other questions for more targeted practice.

Watch our first lesson here: The CBT is gone. The PBT, though, does still exist. The iBT is the most common form of the test. In the United States, it is the only test. But, the PBT is a very different test. It has different sections, different strategies, and studying for the PBT is a little bit different from studying for the iBT. We will not talk about the PBT in these lessons. You might already know this. Sometimes you can take a different test, or if you have some experience with English education, maybe you went to high school at an English-speaking school. Or a college at an English-speaking college, then you might not need the test. Now, there are other tests for applying to American universities, especially. These include reading and writing, and other English sections. But they are not for foreign speakers, they are for native speakers of English. So, these are actually very difficult. The GRE, if you are studying for it, has some very difficult vocabulary. These are for high school students going to college. If you do take one of these other tests, then the scores from those tests might be enough. So again, check with your schools, check with the programs that you want to apply to, and find out if you need to take the TOEFL. It actually looks very similar to the GRE. And the format is a little bit different. They are both Internet-based tests, they have a lot of similar formatting, a lot of similar styles. You can find out where to take the test at this website. This is just a very, very general idea. There are four skills there, reading, listening, speaking, and writing. As I said, these are communication skills. So, this means that you need to know how to communicate at a school, at a university, at a college. There is a reading section, a listening section, a speaking section, and a writing section. Chapter 5 : GRE Prep App Landing Page

Kaplan's program is one of the most comprehensive GRE prep courses on the market, with + hours of content, 7-full-length computer-based practice tests, and over 5, practice items so that you can get the most out of your studies and achieve a high score on the GRE.

The site offers videos on nearly every possible GRE topic, along with lots of practice questions, vocabulary flashcards, math formula sheets, and other GRE-related info. There is a ton of information on their site - a lot of it is free - and the quality is good, in general. Watching videos is passive. Speaking of problems, Magoosh provides a lot of GRE practice questions - over Just leaves a bad taste in my mouth. As a colleague of mine says, "There are businesspeople, and then there are educators. And of course, there are lots of reviews and testimonials for Magoosh GRE I have noticed that bigger, more popular companies in the test prep industry become entrenched because their size allows them to market to more people, which in turn, increases their size even more. But check out the fine print. And then you have to watch the video explanations for the questions you get wrong! And a 5 point total score improvement? The indiscriminate video library. Text completion questions are really not that complicated; there is no need to watch 3 whole hours of videos just on how to do them. Quantity is not what should make you select a GRE prep product; quality should. Remember, watching videos is not a substitute for working through GRE questions from scratch. Give yourself several months, since watching videos is a lot slower than reading a book. I am now a competitor to the Magoosh GRE video course: But I seriously think my GRE video course is worth considering for a couple of reasons. I get to the point. To illustrate, my course is about videos; theirs is over , and my average video length is about half theirs. They need 30 videos and 3 hours to explain text completions to you; I need 8 videos and you can watch them all in about 20 minutes. All my GRE videos were recorded and edited by Lynda. And of course, make sure you eventually can do the ETS math questions as well. This can make you develop bad habits, introduce confusion, and in general, prepare inadequately for the real test. Here are a couple of sample videos for you from the course demonstrating some aspects of quantitative comparison technique and sentence equivalence technique. And realize that the consensus about certain products is often not very informed. This can create a vicious cycle of low-information, since the more good reviews from inexperienced GRE studiers a product gets, the better it can seem. The time you spend on the front end regarding developing a smart GRE study plan will be well worth it in the long run. Good luck, and happy GRE studying!

Magoosh's GRE test prep including expert-crafted GRE schedules, GRE practice questions and a complete guided GRE prep course. With this app, you can bring all of Magoosh's expert content with you on the go as you prepare for graduate school.

Reading Comprehension Paragraph Argument Watch a sample verbal lesson here I know the guy is a little boring, but they lessons are good. Writing is a pretty difficult thing to teach. Magoosh has 10 videos that give you an overview of the task, and then focus on writing strategies and tips for each section. Also, some of the best videos in the section show you how to analyze the tasks in order to approach them properly. The stuff in the videos is useful, but honestly the only way to improve your writing is to write. But when you watch the video, the instructor applies the material to the exam. After reviewing the basic points of fractions, the instructor shows you how they might appear on the exam in parts of other problems. Also, everything starts super easy and gets more difficult as the videos go on. Plus if there is a related concept that you need to work on, there will be little recommendations next to the video. Practice questions After the video lessons, these are the most important part of Magoosh in my opinion. Have you ever tried to answer a test question, got it wrong, and wondered why? Each of the practice questions, has its own individualized explanation video. The explanation covers how to answer the questions, shortcuts to getting the answer, and common mistakes. Also, below each video is a link to the lessons you might need to watch and links to any blog posts that Magoosh has written on the topic. It has 3 important sections 1 Suggested Lessons: Online Support Finally, the last big component of Magoosh is that its entirely online. One thing I was worried about in regards to that was being able to ask questions if I needed to. Everyone has a little bit different learning style and way of working. So, you might wonder if Magoosh will fit your needs. Because the program is all online, it does require some self-motivation to get it done. One thing I recommend doing is setting aside a specific time and place for your studying. If you happen to live far away from a place with in-person classes, Magoosh is definitely for you. I live in Mexico City right now and Magoosh is the perfect option. Magoosh is the best choice if you need flexibility. Is It Easy to Use? I have one question for you: Do you know how to watch a video on YouTube? The layout is really user friendly. Everything is really clearly labeled and easy to find. What are other GRE prep options? I made a table comparing apples to apples " which here means comparing Magoosh to other online, self-paced GRE prep courses. I looked at Kaplan, Manhattan, and Princeton Review. I just got the information I could from their websites. Looking at the numbers, they all come across pretty evenly except in price.
