

## Chapter 1 : calendrierdelascience.com - Market Research on India

*With its corporate office in New Delhi, India, RNB Research, which was established in the year , is an ISO certified marketing research as well as data collection company that exists in countries like South Africa, Thailand, India, China, Philippines and Russia.*

Enquire before buying A diaper is an absorbent pad designed to absorb or retain body waste without using a toilet. It is made up of a cloth or synthetic disposable material which prevents the waste from leaking, or soiling the outer clothing or the external environment. Diapers are mostly worn by infants, toddlers and children -who are not trained to use the toilet, and adults with urinary incontinence or other ailments. With rising disposable incomes and improving standards of living, an increasing number of Indian consumers are adopting diapers as they help in maintaining the hygiene, cleanliness, comfort, and independence of the babies and adults. The growing awareness regarding the advantages of using disposable diapers among the Indian consumers has led to an increase in their demand. Additionally, the rising number of modern nuclear families with working parents and improved economic conditions in India have fuelled the growth of Indian diaper industry. Further, disposable biodegradable diapers are influencing the Indian market as they are eco-friendly and prevent environmental contamination. Moreover, increasing online sales of diapers, rapid urbanisation and the massive increase in birth rate are some of the other factors estimated to foster the growth of the Indian diaper market. On account of these factors, the market is expected to reach a volume of more than 6 Billion Units by The report has segmented the Indian diaper market on the basis of product type. Some of the major product types are baby disposable, baby training, baby cloth, baby swim pants, baby biodegradable, adult pad type, adult flat type and adult pant type diapers.
