

Chapter 1 : Gettemy, Charles F. (Charles Ferris), | The Online Books Page

The Massachusetts bureau of statistics, ; a sketch of its history, organization, and functions, together with a list of its publications and illustrative charts [Massachusetts.

It also serves as a basis for future work towards a Ph. This program is designed to provide the student with a background in basic theory along with experience in various applications, including computational aspects. As part of their training, students will receive comprehensive exposure to popular statistical software packages. In addition to courses offered within the department, the program allows room for the students to take statistics courses in other departments on campus. Students entering the M. The requirements for the M. Courses The student must complete 30 hours of coursework with grades of C or better, including at least 24 hours with grades of B or better Pass or fail grades cannot be used to satisfy this requirement. In addition, the student must have at least an overall B average. The required 30 hours must include Stat Regression Modeling, Stat Statistical Computing, At least five other courses which are either Statistics courses numbered or above, from within the department, or some courses outside the department numbered and above subject to prior approval by the Statistics coordinator. Basic Exam Students doing the M. The Basic Exam is given twice a year, in January and in August. Project The project is completed under the guidance of a faculty member. This project must have prior approval of the Statistics coordinator and involves 3 credit hours which may be used to satisfy the 30 hour coursework requirement. The project can take many forms; an expository report on a particular area, an examination of methods through simulations or a detailed statistical analysis of real data. A final report is required. This requirement is typically satisfied by the successful completion of the project seminar course Stat P. The Fifth Year M. Entering the fifth year M. Finishing the fifth year M. Typically an incoming Ph. Student seeking a Ph. Coursework The student must complete successfully 36 hours of coursework, including Math or Math , or Math , Stat , , , , and The exams are administered during the week preceding each semester August and January. The student must pass three Basic Exams at the Ph. The student must pass the Advanced Exam in advanced statistics and the oral literature-based exam. The advanced statistics exam version I is based on advanced topics in Stat and Stat , and topics from Stat The advanced statistics exam version II is based on advanced topics in Stat and Stat , and topics from Stat The two versions are offered in alternate years depending which of Stat and Stat is offered in a year. For the literature-based exam, students need to choose a topic from the list of topics in the Axioms and form an exam committee that includes the primary faculty of that topic and two secondary faculty. Students are then given reference papers on the chosen topic to read. The exam is in the form of oral presentation and responding questions in front of the exam committee. A student may select a non-standard exam topic, in which case, the student must have the agreement of their committee members on the topic and the reading list. In order to take the literature-based exam, a student is responsible for forming an exam committee by the end of September for a January exam, or by the last day of spring classes for an August exam. Decisions on passing the exam are by unanimous consent of the exam committee. A student who does not pass will have one more chance to pass the literature-based exam. The second attempt may be on the same or a different topic. Dissertation After passing the Advanced Exam, the student becomes a Ph. The student must write a satisfactory dissertation and pass a final oral examination primarily a defense of the dissertation , and must satisfy all other requirements of his or her dissertation committee. The student is required to register for a minimum of 18 dissertation credits.
