

Chapter 1 : 5 Ways to Improve Your Reading Comprehension - wikiHow

Master Skills Reading Comprehension, grade 2 is the perfect workbook to help children "master" reading comprehension skills necessary to succeed in school!. Designed by educational experts, specifically for children in second grade, this essential workbook teaches children the basic concepts and skills of reading comprehension and then offers a variety of activities for skill-and-drill.

ELLs often have problems mastering science, math, or social studies concepts, for example, because they cannot comprehend the textbooks for these subjects. ELLs at all levels of English proficiency and literacy development will benefit from improved comprehension skills, which allow them to Read more accurately. Follow a text or story more closely. Identify important events and concepts in a text. Master new concepts in their content-area classes. Complete assignments and assessments. Feel motivated to read in school and for pleasure. This article focuses on strategies that are part of three main approaches: Students may already possess content knowledge that they cannot yet demonstrate in English. Allow students to use their native language with peers for a quick brainstorm to discover what they know about a topic before presenting their ideas to the whole class. Students with limited or interrupted schooling may not have the same level of knowledge as their peers, especially when it comes to historical or cultural topics. When starting a new lesson, look for references that you may need to explicitly explain. Take students on a tour of the text. Each time you hand out a new textbook, take students on a "virtual tour. Explain how the text is organized, pointing out bold print, chapter headings, and chapter summaries. Once students learn how to recognize these elements, they will be able to preview the text independently. Remember that students need to know how to use a tool in order for it to be helpful. Walk through the book with the students, pointing out photographs, illustrations, and other graphic elements. Ask them what they notice about the pictures and how they think those details may relate to the story or content. Use outlines to scaffold comprehension. Provide a brief, simple outline of a reading assignment or an oral discussion in advance of a new lesson. This will help ELLs pick out the important information as they listen or read. Focus on key vocabulary: Choose the vocabulary that your students need to know in order to support their reading development and content-area learning. Provide student-friendly definitions for key vocabulary. Include signal and directional words: Remember that students may also need explicit instruction in signal or directional words "because" and "explain" , in addition to key content vocabulary "photosynthesis" and "evolution". Use a "picture-walk" for vocabulary: Teach students to actively engage with vocabulary: Teach students to underline, highlight, make notes, and list unknown vocabulary words as they read. Give students practice with new words: Ensure that your students can Define a word. Recognize when to use that word. Understand multiple meanings such as the word "party". Decode and spell that word. Incorporate new words into discussions and activities. For students to really know a word, they must use itâ€”or they will lose it. Use new words in class discussions or outside of class, in other contexts such as on field trips. Give the students as many opportunities to use and master the new vocabulary as possible. Use informal comprehension checks: Test comprehension with student-friendly questions: These questions can be at the: Literal level Why do the leaves turn red and yellow in the fall? Interpretive level Why do you think it needs water? Applied level How much water are you going to give it? To probe for true comprehension, ask questions that require students to analyze, interpret, or explain what they have read, such as the following: What ideas can you add to? Why or why not? What might happen if? How do you think she felt? Graphic organizers allow ELLs to organize information and ideas efficiently without using much language. Different types include Venn diagrams, K-W-L charts, story maps, cause-and-effect charts, and time lines. Provide students with many different ways to show what they know: Drawings, graphs, oral interviews, posters, and portfolios are just a few ways that students can demonstrate understanding as they are beginning to develop their reading and writing skills in English. Ask students to use the following strategies to summarize, orally or in writing, what they have read: Retell what you read, but keep it short. Include only important information. Leave out less important details. Use key words from the text. Ideas from the Field

Chapter 2 : Study Skills Guide: Improve Reading Comprehension Skills

Master Skills "Reading Comprehension" for students in grade 3 is the perfect workbook to help children achieve mastery of the reading comprehension skills necessary to succeed in school. Designed by educational experts, specifically for children in grade 3, this essential workbook teaches children basic concepts and skills of reading.

The basic aspects of reading, such as word recognition, phonetics and fluency, can be mastered in just a few years. However, throughout this process reading comprehension must be emphasized. Sadly, classrooms across the United States have students who struggle with reading comprehension. Whether to gain understanding, develop a new skill, or for pure pleasure of reading, full comprehension of what you read is necessary. Reading comprehension is also imperative for a successful career and to excel academically. Students frequently enter college without understanding how necessary good reading comprehension skills are for academic success. The following tips will enhance your ability to understand complicated concepts detailed in textbooks and improve your reading comprehension.

Pre-reading survey Before reading a text, complete a pre-reading survey for a brief summary of it. This will give you an idea of what to expect in the text, so your reading will be more productive. The first thing you should do in a pre-reading survey is read the introduction and review the table of contents. Next, read section and chapter headings and text highlighted with bold print. Throughout the process, be sure to focus on general information, not specifics. Chapter title and subtitles. Focus questions at the beginning of each chapter. Reviewing these questions before reading the text will help provide focus and indicate what to look for while reading the chapter. Chapter introductions and first paragraphs. Reviewing these subheading before reading the chapter will provide you an idea of what major topics to focus on as you read each chapter section. First sentence of each paragraph. It tells you what the paragraph is about. However, in some texts, the first sentence is more of an attention getter. This exercise alone will provide you a very good idea of what the entire chapter is about and the major themes to look for as you read.

Visual aids Look for any material that is presented in list form ie. Bulleted list of information, pictures, diagrams, maps and pictures can all help you identify the most important points of the chapter. Last paragraph or chapter summary. If present, review these materials to get a better idea of the important ideas and concepts to look for as you read. Define your purpose Many texts contain information and details that is unrelated to the most important concepts and ideas. If you have a difficult time concentrating when you read, we recommend reading out loud. Many people comprehend material better if they read it out loud especially if your an auditory learner. Take notes or highlight important concepts Writing something down is one of the most effective memory techniques. As you come across key concepts, facts and ideas, use a highlighter, write them down on a piece of paper, or make a note in the margin.
