Call us for the dealer nearest you! E7E 2S6 Email: Conceived to cater for a wide range of applications: Ideal for farms approaching mechanization for the first time, but also as additional tractors to work alongside more powerful machines, with a low centre of gravity and integral braking, the Agrofarm range offers go-anywhere capability in complete safety, even in the roughest terrain conditions. These attributes come together with state of the art Deutz engines matched to perfection with efficient ZF Powershift transmissions and a high performance hydraulic system to create an astonishingly effective package. The range also includes agile, more compact models with a shorter wheelbase that are ideal for any application, to match this superlative efficiency with remarkable versatility. With powerful Deutz engines, tried and tested Powershift transmissions and instantly recognizable, attractive style with clean, bold lines, the 6 Series sets the standards for others to follow. The 7 Series consists of three extraordinary, unique models embodying the perfect union between advanced technological solutions and style, with attractive, futuristic forms shaping every component of these superb machines. The model won the Tractor of the Year and the Golden Tractor for the design in With convenient transmission options, ergonomic workstation, hydrostatic power steering and a single lever joystick, hard work has never been so easy. Chapter 2 : mccormick compact tractor | eBay

McCormick Tractor service manuals are available for immediate download. This service is available for only \$ per download! If you have a dirty old paper copy or a PDF copy on your computer and it crashed we can help!

The compact tractors come with a range of engines, providing rugged dependability and operating with the best noise reduction technology on the market. Some of the features found on a McCormick tractor are hydrostatic or mechanical transmission, mechanical hitch control for durability, and ergonomic design for ease of use. Several attachments can be used, including front loaders, backhoes, mowers, rotary cutters, box blades and landscaping rakes. With so many options, the McCormick Compact Tractor is one of the best choices on the market. This gives you the assurance that your purchase is protected as you work your farm or property. See your local McCormick dealer for details. Hydrostatic 2 Range X Hydrostatic 3 Range 2 X They are powered by 3-cylinder, water-cooled diesel engines delivering 22, 28, and 34 HP, respectively. Both models are available in ROPS or cab with either a mechanical or hydrostatic transmission providing reliable performance in any situation. The synchro-shuttle lever, integrated into the steering column, has a neutral feature for ease of operation between vineyard and orchard rows or inside greenhouses. These tractors are perfect for landscaping, small farm jobs and hunting. The stylish, sloping engine hood design and the rounded fender shape make for outstanding all-round visibility and excellent maneuverability. They feature all of the technical characteristics expected from a traditional tractor. They are comfortable to operate and have good all-around visibility. The cab features heating, air conditioning, radio, sunroof, four field lights and a roof hatch. The radio is optional on the X A mechanical suspension seat adds further comfort to these high-performance utility tractors. MFD provides traction to the front wheels. By engaging the MFD, the front wheels lock in for added traction. Daedong Engines Hydraulic Power Steering Powered by water cooled, Daedong 3 cylinder indirect injected diesel engines, the X10 tractors will provide plenty of power and performance. With hydraulic power steering it is easy to turn the steering wheel, even under the heavy loads encountered when the loader bucket is full. Serviceability Differential Lock A one piece hood and removable side panels no tools required make servicing the X10 tractors a breeze, even with the loader installed. To further increase traction the rear drive wheels can be locked together. Depress the pedal to lock the rear wheels, let up on the pedal to disengage the differential lock. Comfortable Seat with Suspension Hydraulic System A high quality, adjustable, suspension seat maintains operator comfort for long hours of work while minimizing operator fatigue. The fully retractable seatbelt assures operator safety. Two separate hydraulic systems keep tractor hydraulics isolated from the transmission hydraulics. This ensures a long life on the transmission. Simple to Operate While providing rollover protection for the operator, the ROPS can be temporarily folded down without tools. This is an important feature if you encounter low-hanging obstructions as you work. The anti-rattle feature incorporated into the ROPS eliminates unwanted noise during operations. Integrated joystick design and logical control placement keeps the operator focused and safe. Whatever the season, McCormick has the attachment for that. No longer do users have to buy more cutter than they need. McCormick by Woods cutters come in a variety of models both single and multi spindle, as well as Flex Wing cutters with single or dual wing control. Compact Loaders McCormick by Woods loaders provide users with the ability to complete virtually every rugged job faced, while delivering years of worry-free service. Loader mounts utilize the structural integrity inherent to the tractors for which they are designed and feature a center-point attachment for most models, reducing obstructions and providing a cleaner, more integrated look. A wrenchless, two pin mount design allows for quick attaching and detaching of the loader boom from the tractor. Simply set the bucket on the ground, roll to release pressure on attachment pins, and set the loader stand. Pull the attachment pins by hand, detach hydraulics and drive out. These powerful diggers are simple to service and require no tools to attach or detach the equipment. From yards and gardens, to pastures and farms, we have backhoes specifically engineered for tight and hard-to-reach places. The strong curved boom reaches over objects and further under sidewalks and obstacles than does a straight boom. And these loaders can just as easily excavate a pond for a rock garden, or dig a hole for planting trees. From hauling feed to animals,

mowing the fields, or doing odd jobs, you need a tractor that you can depend on. We have a tractor for that. You need a tractor that is versatile to move hay around the pasture to feed the dairy cows. Baling hay is hard work and you need a tractor with horsepower that can handle the load without sacrificing maneuverability. You need versatility and attachments that are easy to change. Perfect for Building Quality Deer Habitat We know that you want your food plot to produce the next trophy buck. We know you need a tractor that can help prepare the land as well as maintain it. We know that we have a tractor that is right for you. With the exception of my land, my McCormick X. Pat Lefemine - Bowsite. Successful plots require maintenance. From spraying for weeds, spring and summer cuttings, and applications of lime and fertilizer your plots will thrive with the help of a McCormick X. Building quality deer habitat means more than just planting seeds. With a McCormick X. Fuel Tank Capacity Gal. Power Steering Gear Tandem Ground Clearance in Turning Radius ft 7.
