

## Chapter 1 : GLC 4MATIC Midsize SUV | Mercedes-Benz USA

*The Mercedes-Benz SL (W) was the first iteration of the SL-Class grand tourer and fastest production car of its day. Introduced in as a two-seat coupÃ© with distinctive gull-wing doors, it was later offered as an open roadster.*

These were the largest and most prestigious automobiles built by Mercedes Benz and were comprised of chassis codes , and The type began production in and ended in The type also began production in and ran through The type was produced between and In all, more than 12, M-B Series were built, most of them being type Saloons luxury sedans. Other body styles were phaeton, cabriolet, limousine and coupe. The Series were powered by a three-liter, single-overhead-cam, and inline six-cylinder gasoline engine. This engine produced between and horsepower, depending upon the iteration. Power brakes were introduced in the Series and an automatic transmission was offered in The S Series chassis was available as a coupe, cabriolet or a roadster. The three-liter engine in the S" was rated at horsepower and the later "SC" model was bumped up to hp. The was largely hand built and was marketed as one of the top luxury cars in the whole world. The Series type began production in It was a stretched version of the , the added length providing increased rear leg room. The was a match for any vehicle coming out of the Rolls Royce factory in England. The three-liter engine was now a slightly detuned version of that which was found in the premier Mercedes Benz sports car, the SL gull-wing coupe. An automatic transmission was standard equipment. The type was eventually replaced by the "Grand Mercedes" Series, probably one of the finest and most luxurious vehicles ever built. Throughout its entire life cycle, the Series was a beautiful automobile. The designs were eye catching and there were many chrome highlights; grilles, bumpers, headlight bezels, window surrounds and the emblems. The "three-pointed star" was prominent on the hood and rear deck. The was wonderfully engineered and built to last a lifetime, not just until the next model was ready for release. All of the Series are considered "collectibles", but in particular the type coupes with landau roofs , cabriolets and roadsters are highly sought after by collectors today. These beauties are representative of a great era in automobile manufacture as epitomized by Mercedes Benz vehicles.
