The diversity of diversity This post of mine is based on a comment I made in a Facebook group for bloggers and authors in February Or should we only write about topics we have experienced? My book begins with an antisemitic attack by two teenagers against a Jewish woman. Universities throughout the country are now a breeding ground for anti-Israel and antisemitic behaviour. According to the Community Security Trust, there were 1, antisemitic incidents recorded nationwide in - a record level in the UK. My point was that it will always be difficult to please everyone but you do have to make sure your book is well researched - and others in the discussion agreed. You have the ultra-religious communities, who may dress and behave in a particular way and are most easily identified as being Jewish. And then you have everyone else in between. My book is set in a fictional town based on where I live, with some more observant Jewish families and some who keep very little of their religion but still identify themselves as being Jewish. Despite living in a fairly Jewish area, many people around here including us have experienced antisemitism some openly, some disguised and some completely shocking. Even where I live, members of our Synagogue observe it in different ways, at different levels of religiosity. This is a clear example of diversity within one Jewish community. Pesach, which lasts for eight days, commemorates the exodus of the Israelites from slavery in Egypt. The festival has many different features. We eat special foods. Matzah is made from flour and water and cooked very quickly. We prepare for Pesach with the ultimate spring clean. We cover all the kitchen surfaces. And yes, it can be stressful okay, a nightmare. We have a special family meal on the first two nights. The Seder details, and the story of Pesach, are written in a special book called a Haggadah. Some families only do one Seder on the first night - we do both nights. During the Seder, we sing songs and have discussions. Frogs may be dotted around the table not real ones, I should add - as frogs feature in the second plague. Last year, we had the parting of the Red Sea down the centre of our Seder table - thanks to blue crepe paper, sand-coloured felt, fish stickers, shell-shaped sequins and Playmobil figures Egyptians and builders etc. I think I enjoyed making it far more than my teenagers enjoyed seeing it. We even have a big Playmobil pyramid stored in the loft from when my boys were younger. One of these is the theme of modern slavery and not just the obvious - think about how enslaved we are to technology and social media. Then finally the theme of antisemitism, which returns to my book. But I may not only attract criticism from the wider population, and in some ways this worries me more, turning writing this book into more of a challenge to get it right. As already mentioned above, the Jewish community is diverse. The Jewish characters in my book are also diverse, from a Jewish community like my own. When we read books, they touch us in many different ways, based on our nature and nurture, our upbringing, our past experiences, our present situation. No two readers will read a book in the same way or respond to it in the same way. Ultimately, we should be free to write and read about what excites us, what motivates us, what challenges us and what drives us.

Participants will read a minimum of 12 library audio or print books in the year. Pick your own challenge level. Library Card on Fire: Though, truth be told, not a tough one. There should be a category, Book Addicted. I read way more than 50 in any given year. Which is one of the great things about reading library books. You only need to read what you enjoy, without feeling guilty about wasting money. Sometimes I post a recipe inspired by the book, or have a little more in depth review, and will add a link, in that event. So, without further ado, here are my ongoing reads: Angel Landing , by Alice Hoffman. Not my favorite of her books, but an enjoyable and absorbing read all the same. Unique, sympathetic characters, though the motivation of Finn, a major protagonist, was unclear. I kept wanting someone to ask him, "why did you do it? The Girl in the Glass , by Susan Meissner. A beautiful story, set partially in 16th century Florence with a Medici princess, but mostly in the present with a young woman who has longed all her life to visit Florence, and how one life impacts the other through another woman she meets there. The importance of imagination balanced by reality. I do enjoy her Victorian mystery series, of which this is Lightweight, English cozies, but usually with a good plots and enjoyable characters. Turbo Twenty-Three , by Janet Evanovich. Another of her hysterically funny Stephanie Plum novels. Plum is an often inept bounty hunter for her cousin Vinnie in Trenton, N. The whole plot, the scrapes she gets into, her sidekicks, family, co-workers, boyfriends, and assorted other characters are so over-the-top, I just laugh my way through the books, and this is no exception. Love it, though perhaps it needs a rude, crude and sexy warning. Further review and food here. I keep hoping for Lady Julia to be a bit more pro-active and less dependent upon others for rescue. After all she knows how to shoot, and has now had boxing lessons. Another terrific mystery with so much added goodness in terms of the food Bruno prepares, and the wines sampled and described. Complex characters, with a helping of romance. I especially like that the hero, Bruno, is one I can admire, with his gardening, hunting, cooking, truffle raising and wine appreciation. These novels are set in the s, sometimes in England, India or France. Eugenics and euthanasia are issues involved here. Our hero, unasked and unprepared, finds himself at the heart of international intrigue, trying to stave off a grave threat to Britain and France, whilst fleeing pursuit from London and through the wilds of the Scottish highlands. Yes I do have favorites. He is the author of a series of wacky mysteries, featuring The Peculiar Crimes Unit, an off-shoot of MI5, or something like it, in London. Starring an eccentric lead duo, entertaining cast of characters, and as with this one, a confounding, seemingly impossible case, they need to be read for full appreciation. Further review with food here. This was a truly excellent book. My complete review is here. It seemed to drag on a bit, bogged down I think by the language and customs of the time, not brought sufficiently to life. Not really a very satisfying conclusion either. Love Story, with Murders, by Harry Bingham was all right as far as murder mysteries go, and I liked that the heroine was able to hold her own and take down criminals using some martial arts skills would like to see more like her though a lot of her life was fairly problematic, due to psychological issues, and smoking weed all the time would certainly not help in the real world with overcoming mental problems. Other characters were well done however. A Fall of Marigolds , by Susan Meissner - I enjoyed this blend of times and the events surrounding two NYC catastrophes, a devastating factory fire in September of and the World Trade Center attacks in September of , with connections between two women and a beautiful scarf, passed down through them. Good characterizations and a well-crafted story-line. The Seven Sisters , by Lucinda Riley - a favorite author of mine, debuts here the first of a new series. This opening novel is the story of six adopted girls, with the main focus in this book on the eldest, Maia. All six are named after the stars of the Pleiades, though the seventh is missing, to be revealed eventually we hope. I enjoyed the settings, in Switzerland and then in Brazil, as Maia discovers her background before adoption, the individual characters and plot were very well done. City of Jasmine , by

Deanna Raybourn - another by a favorite author. I do enjoy her Lady Julia Grey series. This one is an enjoyable stand alone about a aviatrix, who after losing her husband on the Lusitania, takes up flying. What more could you ask for? Well, maybe deep thoughts. She seemed to spend most of her time being tired. Which is tiring to read about. The plot was a bit implausible as well. Persuasion, by Jane Austen - which if I had ever read previously, did not remember. It takes a bit of concentration, getting past the dated language, cultural expectations and expressions, such as "under-hung": But once in the swing of it all, I enjoyed the story, and characters. The Kitchen Counter Cooking School, by Kathleen Flinn - A seriously enjoyable book, not an oxymoron, as it is serious, funny and enjoyable reading. Lots of excellent cooking and healthy food purchasing advice, as well as inspiration and recipes. Jeffries Appeals the Verdict , by Emily Brightwell - one of my favorite "cozy mystery" series, set in Victorian London, with a great cast of characters, and this one better than some with a tricky plot and good resolve. A "re-imagining of Jane Eyre as a gutsy, heroic serial killer", slightly tongue-in-cheek. She considers herself irredeemable, and a horrid person, however we readers will look on it quite differently. Each killing being quite justifiable in an exceedingly wicked world, by a stalwart orphan, often fighting for her very life or that of those dear to her. What can I say, other than that they are terrific, with utterly singular characters, outlandish plots, and wild resolutions, with of course great humor. More on my review post. All very decadent, and lovely with bits added, some of which I would object to, were I Gerald Murphy, or his survivors, being there is no verifiable evidence, though admittedly very politically and correctly expedient for an author. If "he struggled with his sexuality" and overcame, keeping his family intact, that is more to the point. At least Bryant is off the wall, balanced somewhat by his partner, John May. Fowler is an amazingly creative writer. This is a very draw-you-in sort of book. Hard to put down, with characters that make you want to simultaneously wring their necks and give them a hug. Terrifically enjoyable reading, and a further review here. A clever English countryside who-done-it, with good plotting and characterizations. However, Vera is not exactly an appealing central figure. Peaches and Scream, by Susan Furlong - an okay sort of "cozy mystery". I was not particularly taken by the backstory of the leading lady. What a great storyteller, growing in competence with each book. I am totally looking forward to her next, recently released, which unfortunately, our library does not yet have. So sensual with descriptions of nature, animals and especially food. Not to mention a good mystery, criminals to catch. I wish the Renaissance man hero would settle with one girl though. A Spider in the Cup, by Barbara Cleverly, in her excellent Joe Sandilands Investigation series, a tricky political plot in the time of King George and President Roosevelt, with fear rampant that Germany would once again plunge the world into war, Joe is charged with guarding an American senator during a World Economic Conference in London. A good "Cozy" as are the rest. Characters and plot well done. Delightful plotting, good culinary inspiration, with sides of an exotic poison garden, rare orchids and a greedy murderer. Also included are some recipes I want to try. The girl bounty hunter starts off her career in this novel. Does she really have to be so totally inept? The Color of Light, by Karen White, who is fast becoming a favorite author of mine. This novel takes place in the low country of South Carolina, on Pawleys Island. A good story of love, restoration and growth. Great characterizations, plotting, a cold case mystery and local color. I always enjoy his books and will be sad indeed if and when they come to an end. An Equal Music, by Vikram Seth is an involved, often rather technical look into the world of classical chamber musicians, as well as coming close to being classical romantic tragedy. Sad, but an engaging and well written read. A Perilous Undertaking, by Deanna Raybourn, in her new series, the Veronica Speedwell Mysteries about a Victorian era lady lepidopterist, who also solves crime.

Can Facebook Cause Cancer? Posted by my student to our on-line course discussion-- about technological substitution for a personal touch! It could also impair mental performance. This could increase the risk of problems as serious as cancer, strokes, heart disease and dementia, Dr Sigman says in *Biologist*, the journal of the Institute of Biology. Classmate Two shared my own predicament. Both of us had our school e-mail systems down on St. No mail could go in or out for anyone surnamed "H" through "R. And, no, dear wife, I cannot somehow do all my composition separately in Word and then cut-and-paste. Classmate Four had no Time Warner cable or Net access. The one element most people cut in a recession, we expand. Drinking from the plasma firehose. Firehoses also spray those of us teaching where I do with a lot of blowback. What my wife termed "comically dystopian" certainly captures the George Saunders-like story I find myself a hapless character within, trapped as much as any creation by an omniscient narrator as distanced from my occupational plight as any clockmaker Deity. One reason-- despite the thrill of finding out a part-time, young English instructor enrolled in the teacher training with me is also a medievalist, a lover of Malory and the Scots, and with an M. It calls itself a University. It also requires my increasingly dispirited submission to the Combine. No Nurse, no electro-shock, no Indian. Its centrally-placed warden can peek through the blinds at his prisoners arrayed in cells all around him. Those immured never know when or where he spins his telescopic scrutiny. Similarly, an electronic system for the past year has required all of our courses to be taught in eight weeks, compressed and accelerating the time taken to advance in supposedly three years towards graduation and the hi-tech careers that my employer advertises as the carrot after the stick of the B. The boss of my boss corrected me recently. I asked in the teacher-training modules I am now taking if any "prestigious" college had used the "blended" model in which we were being schooled so as to school others-- once all of our courses had been converted to this top-down, McDonaldized format. I found out that, no, while universities had used hybrid systems similar to ours, that no, none had combined this blended approach with a standardized course implementation. Blame my dissenting nature. I play my role with spirit, but also with a sense of being cast by a director in a part that portends my own breaking on the wheel, my capitulation on this peda-technological rack. I glance at the technical faculty. They reveal in their comments that they were not hired for their English skills. The techies also show no signs of rebellion. We humanists did, backs watched by one business lecturer. Now, joined by trusties, week two of our work-service non-furlough, my spirits ebb as the routine that we will soon ourselves oversee surges. We upload humdrum homework and log-on regularly as we punch the clock and tote that bail, albeit by tapping at a mouse. Power, conveyed by electricity, by networking, by the substitution of the byte for the blab, the post for the chat: We share therefore the same cells my students will, if on a different wing. If riots break out and take down this network, I am not sure how we will work, teach, eat, or survive. Those who could arguably benefit from holding the carceral system hostage themselves occupy cells down the row from ourselves. Any subversives or anarchists would be fouling their own nest. Out of some desert or Darfur outpost, one day in a century wracked by global warming, refugee revolts, and globalized backlash, who will storm the Bastille? Who may find us cowering behind dead laptops and dying BlackBerries? Meanwhile, since we digital inhabitants earnestly believe that by staying indoors and off the roads, we hole up at Starbucks or on the beach, if we believe the ads. We work and teach and telecommute and gossip. We must now progress by keystrokes. Perhaps we truly ease the burden on our planet while avoiding confrontation; maybe we find the upside of fewer face-to-face encounters? After all, my time on bus and train weekly does not inexorably enhance my love for my fellow man and woman in this smoggy megapolis. So, I retreat to my lair, surrounded by books and plugged into music. I wire myself willingly for some tasks, and perhaps obediently for others, just as my students do. On Facebook I can send Little Green

Siddur and Jewish liturgy Piyyut Classical Jewish poetry Many traditional Jewish texts are available online in various Torah databases electronic versions of the Traditional Jewish Bookshelf. Many of these have advanced search options available. Jewish legal literature Main article: According to rabbinic tradition, there are commandments in the Torah. Some of these laws are directed only to men or to women, some only to the ancient priestly groups, the Kohanim and Leviyim members of the tribe of Levi , some only to farmers within the Land of Israel. Many laws were only applicable when the Temple in Jerusalem existed, and only of these commandments are still applicable today. These oral traditions were transmitted by the Pharisee school of thought of ancient Judaism and were later recorded in written form and expanded upon by the rabbis. The Oral law is the oral tradition as relayed by God to Moses and from him, transmitted and taught to the sages rabbinic leaders of each subsequent generation. For centuries, the Torah appeared only as a written text transmitted in parallel with the oral tradition. Fearing that the oral teachings might be forgotten, Rabbi Judah haNasi undertook the mission of consolidating the various opinions into one body of law which became known as the Mishnah. The commentaries from each of these communities were eventually compiled into the two Talmuds , the Jerusalem Talmud Talmud Yerushalmi and the Babylonian Talmud Talmud Bavli. These have been further expounded by commentaries of various Torah scholars during the ages. In the text of the Torah, many words are left undefined and many procedures are mentioned without explanation or instructions. Such phenomena are sometimes offered to validate the viewpoint that the Written Law has always been transmitted with a parallel oral tradition, illustrating the assumption that the reader is already familiar with the details from other, i. The Halakha has developed slowly, through a precedent-based system. The literature of questions to rabbis, and their considered answers, is referred to as responsa in Hebrew , Sheelot U-Teshuvot. Over time, as practices develop, codes of Jewish law are written that are based on the responsa; the most important code, the Shulchan Aruch , largely determines Orthodox religious practice today. Jewish philosophy Jewish philosophy refers to the conjunction between serious study of philosophy and Jewish theology. Major changes occurred in response to the Enlightenment late 18th to early 19th century leading to the post-Enlightenment Jewish philosophers. Modern Jewish philosophy consists of both Orthodox and non-Orthodox oriented philosophy. Soloveitchik , and Yitzchok Hutner. Rabbinic hermeneutics 13 Principles of Hermeneutics: A law that operates under certain conditions will surely be operative in other situations where the same conditions are present in a more acute form A law operating in one situation will also be operative in another situation if the text characterizes both situations in identical terms. A law that clearly expresses the purpose it was meant to serve will also apply to other situations where the identical purpose may be served. When a general rule is followed by illustrative particulars, only those particulars are to be embraced by it. A law that begins with specifying particular cases, and then proceeds to an all-embracing generalization, is to be applied to particulars cases not specified but logically falling into the same generalization. A law that begins with a generalization as to its intended applications, then continues with the specification of particular cases, and then concludes with a restatement of the generalization, can be applied only to the particular cases specified. The rules about a generalization being followed or preceded by specifying particulars rules 4 and 5 will not apply if it is apparent that the specification of the particular cases or the statement of the generalization is meant purely for achieving a greater clarity of language. A particular case already covered in a generalization that is nevertheless treated separately suggests that the same particularized treatment be applied to all other cases which are covered in that generalization. A penalty specified for a general category of wrongdoing is not to be automatically applied to a particular case that is withdrawn from the general rule to be specifically prohibited,

but without any mention of the penalty. A general prohibition followed by a specified penalty may be followed by a particular case, normally included in the generalization, with a modification in the penalty, either toward easing it or making it more severe. A case logically falling into a general law but treated separately remains outside the provisions of the general law except in those instances where it is specifically included in them. Obscurities in Biblical texts may be cleared up from the immediate context or from subsequently occurring passages. Contradictions in Biblical passages may be removed through the mediation of other passages. Ishmael [60] Orthodox and many other Jews do not believe that the revealed Torah consists solely of its written contents, but of its interpretations as well. The study of Torah in its widest sense, to include both poetry, narrative, and law, and both the Hebrew Bible and the Talmud is in Judaism itself a sacred act of central importance. According to the Talmud, These are the things for which a person enjoys the dividends in this world while the principal remains for the person to enjoy in the world to come; they are: But the study of the Torah is equal to them all. In Judaism, "the study of Torah can be a means of experiencing God". It is a most serious and substantive effort to locate in trivialities the fundamental principles of the revealed will of God to guide and sanctify the most specific and concrete actions in the workaday world Here is the mystery of Talmudic Judaism: In the study of Torah, the sages formulated and followed various logical and hermeneutical principles. According to David Stern, all Rabbinic hermeneutics rest on two basic axioms: According to the Talmud, A single verse has several meanings, but no two verses hold the same meaning. It was taught in the school of R. Just as this hammer produces many sparks when it strikes the rock, so a single verse has several meanings. Observant Jews thus view the Torah as dynamic, because it contains within it a host of interpretations [64] According to Rabbinic tradition, all valid interpretations of the written Torah were revealed to Moses at Sinai in oral form, and handed down from teacher to pupil The oral revelation is in effect coextensive with the Talmud itself. When different rabbis forwarded conflicting interpretations, they sometimes appealed to hermeneutic principles to legitimize their arguments; some rabbis claim that these principles were themselves revealed by God to Moses at Sinai. Ishmael, thirteen baraita at the beginning of Sifra; this collection is largely an amplification of that of Hillel. Jose ha-Gelili listed 32, largely used for the exegesis of narrative elements of Torah. All the hermeneutic rules scattered through the Talmudim and Midrashim have been collected by Malbim in Ayyelet ha-Shachar, the introduction to his commentary on the Sifra. The conflict between iudaismos and hellenismos lay behind the Maccabean revolt and hence the invention of the term iudaismos. Cohen writes in his book *The Beginnings of Jewishness*: It means rather "the aggregate of all those characteristics that makes Judaeans Judaeans or Jews Jewish. During this time, Jews experienced slavery, anarchic and theocratic self-government, conquest, occupation, and exile. In the Diaspora, they were in contact with, and influenced by, ancient Egyptian, Babylonian, Persian, and Hellenic cultures, as well as modern movements such as the Enlightenment see Haskalah and the rise of nationalism, which would bear fruit in the form of a Jewish state in their ancient homeland, the Land of Israel. They also saw an elite population convert to Judaism the Khazars, only to disappear as the centers of power in the lands once occupied by that elite fell to the people of Rus and then the Mongols. Who is a Jew? According to Rabbinic Judaism, a Jew is anyone who was either born of a Jewish mother or who converted to Judaism in accordance with Jewish Law. Reconstructionist Judaism and the larger denominations of worldwide Progressive Judaism also known as Liberal or Reform Judaism accept the child as Jewish if one of the parents is Jewish, if the parents raise the child with a Jewish identity, but not the smaller regional branches. The conversion process is evaluated by an authority, and the convert is examined on his or her sincerity and knowledge. Conversions have on occasion been overturned. Thus a Jew who claims to be an atheist or converts to another religion is still considered by traditional Judaism to be Jewish. According to some sources, the Reform movement has maintained that a Jew who has converted to another religion is no longer a Jew, [83] [84] and the Israeli Government has also taken that stance after Supreme Court cases and statutes. For example, Jews who have converted under duress may be permitted to return to Judaism "without any action on their part but their desire to rejoin the Jewish community" and "A proselyte who has become an apostate

remains, nevertheless, a Jew". Although a minority of modern Karaites believe that Jewish identity requires that both parents be Jewish, and not only the father. They argue that only patrilineal descent can transmit Jewish identity on the grounds that all descent in the Torah went according to the male line. This is still not settled, and occasionally resurfaces in Israeli politics. Historical definitions of Jewish identity have traditionally been based on halakhic definitions of matrilineal descent, and halakhic conversions. Interpretations of sections of the Tanakh, such as Deuteronomy 7: Jewish population by country The total number of Jews worldwide is difficult to assess because the definition of "who is a Jew" is problematic; not all Jews identify themselves as Jewish, and some who identify as Jewish are not considered so by other Jews. According to the Jewish Year Book , the global Jewish population in was around 11 million. In , according to the Jewish Population Survey, there were The Jewish Year Calendar cites Jewish population growth is currently near zero percent, with 0. Jewish religious movements Main article:

The mystery aficionados among us will recognize the first six names as fictional detectives. As for the seventh, well, in the U.S. But for most of us, I suspect, the idea of actually going into that field never seriously crossed our minds. David Cohen, however, did start thinking along those lines by the time he was in high school and college. Over the years, Mr. Cohen's activities have ranged from forensic accounting investigating, which can be done from an office, to surveillance that entails following someone all day. Because he is a shomer Shabbos, he simply does not accept cases that require Shabbos or Yom Tov work. I was able to get in touch with the daughter and connect them. The daughter was uneasy at first, but after I spoke with her a few times, she agreed and was ultimately happy that she did. Being an investigator can involve danger. Cohen has to be wary of some people who approach him for hire. In one case, a man was trying to locate his ex-girlfriend. It seemed to Mr. Cohen that he was trying to disguise his voice over the phone. Cohen sensed that getting the information for the man would put the woman in danger. He alerted the police and the woman and was later questioned by the police about this fellow. Although they take longer than U.S. These are not as easy to do, but Mr. Cohen does have contacts he can turn to for help. Cohen attended Yeshiva University and considered going to law school. When he was in his junior year, a friend was looking into the investigative field, and Mr. Cohen thought it sounded interesting. After taking some sociology courses at YU, including some on criminal behavior and others related to the criminal justice field, he began to supplement his courses by studying on his own. In his senior year of college, Mr. Cohen did an internship at the Department of Investigation in New York, which investigates city agencies for monetary fraud and other economic issues. Cohen attended a three-year graduate program at the John Jay College of Criminal Justice in Manhattan, where he received a broad overview of the field. While engaged in these studies, he was also employed by the New York City Office of Revenue Investigation, verifying whether people were eligible for welfare. He met people from all walks of life, interviewed welfare recipients and landlords, reviewed documents, and verified that the system was not being defrauded. The majority of cases were legitimate. About a year-and-a-half later, Mr. Cohen got a job with the federal agency Occupational Safety and Health Administration OSHA, which investigates unsafe workplace practices that can lead to injuries as well as employee claims that they are not given proper safety equipment. Sometimes, an employee might file a complaint and then be fired shortly afterward. In the discrimination unit where Mr. Cohen was working, he investigated whether the firing was for a valid reason or was merely in response to the complaint, which is a violation of federal law. This type of footwork took him into all types of businesses, from stores and factories to nuclear power plants. Cohen worked for a private law firm, now called Milberg, where he investigated many interesting cases of white-collar crime, whistle blowers, consumer fraud, medical fraud, and pharmaceutical fraud. The firm was involved in some high-profile cases, including the Bernie Madoff and Martha Stewart investigations. One of the consumer fraud cases Mr. Cohen worked on involved car sunroofs that would spontaneously explode while the car was being driven. Consumer Reports found that the issue was well known to the auto industry but was for the most part not being acknowledged or resolved. Class action lawsuits are still moving through the courts, and exploding sunroof glass continues to be a not-so-uncommon occurrence. Cohen began working independently, taking cases from individuals as well as from larger investigative firms. Many of his cases involve locating people, such as runaways and tenants who leave after defaulting on their rent. His profession has also brought him into contact with all types of people whom he might otherwise never have met. There was a sports-related case, in which wrestlers were being fired after getting a concussion. The company would use them when they were popular and then cut them loose. One rather unique service that Mr. Cohen offers is background checks for potential shidduchim. Although the parents and the shadchan may have done some asking around, Mr. Cohen's is of particular interest for remarriages and older partners, where there are many more

years of potential hidden history. Of course, everything is kept very confidential, and Mr. Cohen moved from New York to Maryland in . Although he and his family currently still live in their Annapolis home, they are migrating to Baltimore, where his kids attend school and where they have purchased a house. They have already been spending Shabbos and the holidays in Baltimore. Happily, it seems that Mr. Cohen did fulfill his goal of finding a unique and satisfying profession where he can assist people. Although he is not in a position to offer internships, he does give advice about how to get into the field, and if anyone is interested in getting their feet wet, he would consider taking on part-time volunteers. Once in a while, Mr. Cohen gives presentations about his job in schools, tailored to the ages of the kids, such as the one he gave at Cheder Chabad. The Case of the Missing Piece of Chametz. The dog ate it. He presented them with magnifying glasses to show their parents. You never know in the investigative field.

## Chapter 7 : Chaiky Halpern (Author of The House On Kyverdale Road)

*Minu the Detective and the Mystery of the Missing Chametz. Story & pictures by Chalky Halpern. Story & pictures by Chalky Halpern. Jerusalem; New York: Feldheim Publishers, [].*

You almost never saw the crew eating, and when you did, it was usually at some kind of a state dinner with a lot of aliens eating some really weird stuff. I am not kidding. The cookbook was written by Ethan Phillips, the actor who played Neelix, and who has written stuff like: This is my chicken sandwich and coffee! In the meantime, both of my freezers are busting at the seams. Whose really cruel and stupid idea was a foreclosure bus tour? What is wrong with this country? If I saw a bunch of greedy buzzards riding around my neighborhood in a foreclosure tour bus complete with window curtains, a karaoke machine, and a disco ball, like the really cool tour bus we rode in Korea , I might be inclined to give them the one-finger New York salute. Well, they might think twice about getting stuck with all those houses, which means they might work a little harder at cutting a reasonable break for the owners who are going through bad times. Whatever the reason, these are people that I would rather not have to exchange polite greetings, and I know they share my feelings. Unfortunately, they all seem to shop in "my" Publix, making for the occasional awkward moment. This morning was one of them, although I must admit I never expected to see this dude pushing a cart while trotting obediently behind a lady. This male troglodyte person, who happens to be opposing counsel on a case of mine, several months back committed the unpardonable sin of getting in the face of one of the young female case managers, and when I told him not to speak to her that way, he turned on me. Well, I may be only half the woman I used to be, but my mouth is still the same size and I do not ever put up with some oversized male ego intruding into my personal space and raising his voice to me. Since that encounter, he scurries away when I enter a room, giving me a big goofy scowl. Come to think of it, he had the same goofy scowl on his face when he passed me in the Publix produce section. Rest in peace, dear lady - Geraldine Ferraro , who in became the first woman vice presidential candidate on a major party ticket, died Saturday in Boston, a family spokeswoman said. A three-term congresswoman from the New York City borough of Queens, Ferraro catapulted to national prominence in when she was chosen by presidential nominee Walter Mondale to join his ticket against incumbents Ronald Reagan and George H. In the end, Reagan won 49 of 50 states, the largest landslide since Franklin D. And here comes my feminist rant, originally posted over on my Facebook page: It is unbelievable to me that after the trailblazing efforts of this lady, we still have not elected a female president, or even vice president. We talk about racism and are able to point to the amazing changes that have taken place over the past century, the best evidence being the presidency of Barack Obama. Now somebody needs to give sexism a good, swift kick in the nether regions because, with all due respect to Mr. Obama, Hillary Clinton should have won the Democratic nomination for President. It seems a whole bunch of people are terrified at the thought of women in power. And it is bee-yoo-tee-ful! Rob had their steak special, and one of our friends ordered the Pear and Brie Pork Tenderloin, a grilled tenderloin of pork topped with candied bartlett pears and brie, and served over butternut squash risotto. We started by sharing their signature Hot Olives appetizer, diced black olives and Asiago cheese, breaded and deep fried, and served with a cheese and sweet chili sauce. Delicious with a glass of chilled chardonnay.

## Chapter 8 : Popular Passover Books

*"Death moved in the night, in search for blood, and when it found Life, it passed on by, like a cloud that moves by the face of the moon. When he found those dead without the red, he took the life before them born first, and the mourning emptied itself till the morning."*

*The mystery aficionados among us will recognize the first six names as fictional detectives. As for the seventh, well, in the U.S. at least, it's less common to associate an obviously Jewish name with the concept of working as a professional private investigator.*
