Chapter 1 : Conferences by Wim Vandebussche (Historical sociolinguistics in Flanders)

Modeling change: A historical sociolinguistics perspective on French negation. France Martineau Published online: 26 March

In recent years, however, there has been an increasing interest among language historians of the late 18th and 19th century in the study of documents from the lower social classes, paupers and working class emigrants. It is striking that these unschooled writers present us with a picture of language use that defeats many traditional accounts of standard languages at the time. Across language borders, it appears that this group had a relationship to language norms that was different from the small upper class layer whose language use has traditionally been the main basis for language histories. Recurring themes included the study of literacy, schooling practices and the evolving role of language norms for the creation of a specific social identity. It consisted of the following papers: France Martineau, University of Ottawa Mind the gap: Lukas Pietsch, University of Hamburg Back-waters of standardisation: All details can be found in this flyer. Drawing on their personal research experience, all speakers addressed key research issues for the years to come. The invited scholars were: Terttu Nevalainen Helsinki Prof. Rosita Rindler Schjerve Wien Prof. Suzanne Romaine Oxford Prof. Peter Burke Cambridge Prof. Klaus Mattheier Heidelberg Prof. The contributions focussed on the matter of language choice and language prescription in the official domain chanceries, law, administration, education , comparing language legislation with actual language use in archive documents. Ample attention was devoted to the methodological aspects of this type of research especially concerning discourse analytical approaches and to possible future research in this domain. Reviewing language policy and language choice in 19th-century Flanders. Instead of focussing on standard or prestige varieties, it highlighted the importance of non-prestigious varieties and writers and of data which were largely ignored or neglected in language historiography, so far. The proceedings of the meeting were published as Bister-Broosen, H.

Chapter 3 : French Oral Narrative Corpus

This chapter examines the evolution of French negation markers, focusing on certain facts connected to negation markers and the left periphery which have been too often neglected and sometimes.

For sale in all countries except Japan. For customers in Japan: Also in this collection, we consider the timeless linguistics issue of "variation" by utilizing the corpus analysis method. Whether socio-linguistic, stylistic or individual, variations manifest in a variety of ways throughout time and space and are closely related to issues surrounding linguistic theories. Additionally this volume includes other research upon diverse themes such as diachronic variation analysis, lexical variations, second language acquisition and bilingualism.
