*Moon Metro Montreal by Avalon Travel (Compiled by) starting at \$ Moon Metro Montreal has 2 available editions to buy at Alibris.*

The redivision of the continent begun by the American Revolution had been intensified by rivalry in the fur trade. The French fur trade of Montreal had been taken over by British American traders who conducted the trade with the aid of French. Character of the city Montreal is a city with considerable French colonial history dating back to the 16th century. It began as a missionary settlement but soon became a fur-trading centre, a role that was enhanced after the conquest of New France by the British in 1763. Montreal proved to be a major advantage in its development as a transportation, manufacturing, and financial centre. From the time of the confederation of Canada, Montreal was the largest metropolitan centre in the country until it was overtaken by Toronto in the 1950s. French Canadians are the majority population in Montreal, which is often said to be the second largest French-speaking city in the world after Paris, though the accuracy of that statement is sometimes questioned principally by those who make the same claim for Kinshasa and Algiers. Montreal remains a city of great charm, vivacity, and gaiety, as well as one of unquestioned modernity. Bonsecours Market Bonsecours Market, Montreal. The St. Lawrence was a large sea that eventually drained, leaving the fertile sedimentary St. Lawrence River valley, which is shaped like a funnel—narrow at the Quebec city end and considerably wider upriver at Montreal. Those physical conditions eventually translated into a settlement pattern with more farms and people in and around Montreal than around Quebec city. Old Port Old Port section of Montreal. The St. Lawrence River, draining the Great Lakes, provided a natural waterway and transportation corridor to the heart of the North American continent. Its location at the confluence of the St. Lawrence and Ottawa rivers made it an important staging centre for a fur trade to the west and north as far as the Hudson Bay. While the Lachine Rapids on the St. Lawrence just west of the city prohibited some larger vessels from continuing upriver, fur traders were nevertheless able to follow the river to the Great Lakes and, via Lake Michigan, on to the largest river system in North America—the Mississippi - Missouri rivers. The Lachine Canal National Historic Site preserves the path of the ship canal at the southern end of Montreal Island that was used to bypass the rapids until the seaway was constructed. The city is built around and up Mont Royal Mount Royal, which rises to 475 feet (146 metres). Map of Montreal c. Climate Montreal has a continental climate, but its proximity to the Great Lakes, in combination with prevailing westerly winds, modifies temperatures for both winter and summer. The prevailing winds and Great Lakes also influence precipitation, which is relatively even year-round amounting to approximately 41 inches (1,041 mm) annually. In winter, though, that precipitation is mainly in the form of snow, and totals often exceed 7 feet (2.1 metres). A memorable ice storm in 1998 took a number of lives, made travel on roads impossible, and caused major damage to hydroelectric transmission lines and trees. City layout The rapid economic growth of Montreal following World War II was accompanied by administrators intent upon grand designs. Expo 67 Man and His World involved massive construction and was located on two islands in the St. Lawrence. Montreal City Hall. While the Place Ville-Marie remained an important landmark, taller buildings were constructed at the end of the 20th century. While visitors often note the European flavour of Montreal, downtown Montreal is definitely North American in style. Particularly popular is the Jean-Talon market, which hosts hundreds of vendors in summer months. Offering an abundance of haute-cuisine restaurants and art galleries, Old Montreal is popular with tourists and locals alike. Northwest of Mont Royal is Outremont, which merged with Montreal City in 1982 and has long been home to the Francophone elite. At the beginning of the 21st century, Outremont was also home to the second largest Hasidic Jewish community in North America after the one in New York City. Also noteworthy is the monumental St. Joseph's Oratory. The renaissance-style oratory is easily recognizable with its large white dome surmounted by a cross that marks the highest point in Montreal 475 feet (146 metres) above sea level. It is a common ritual for pious pilgrims to climb its 99 front stairs on their knees. The growth of Montreal as a manufacturing centre required plenty of labour; in answer, some came from Europe, but most of those who sought work were French Canadians, which eventually led to conflict. The owners and controllers of the Montreal economy were, for

the most part, Anglophones; French Canadians, the dominant population from the mids, worked in the factories. That divide at the workplace was mirrored in a spatial pattern that developed whereby Boulevard Saint-Laurent St. Lawrence Street became a linguistic partition, with Francophones living to the east of it and English speakers to the west. The economic boom following World War II attracted immigrants from Europe, Asia, Africa, and elsewhere in the Americas, transforming Montreal into a diverse multicultural city. Despite that increase in immigrant population, French speakers make up about half of the population in the city proper and some two-thirds of the population on the island. Religious affiliations in Montreal generally follow ethnic traditions. Roman Catholicism is by far the dominant faith, although active religious practice among Roman Catholics has dramatically diminished since the mid 20th century. Economy Manufacturing Transportation improvements were vital in attracting manufacturing industries to Montreal. With canal construction and advancements, oceangoing vessels were able to reach the city, and, with rail developments, by the s Montreal had become a hub for transcontinental and international movement of goods. As a consequence, manufacturing industries lined the Lachine Canal, producing cotton goods, clothing, textiles, shoes, food, and beverages as well as ships, metal goods, and petroleum products. By the mid 20th century the general shift from rail to road transportation of goods was matched by the flight of many industries away from Montreal to suburbs. The restructuring of industry resulted in the loss of manufacturing jobs, but, over time, new often high-tech industries emerged. Other industries include food processing , beverage making, engineering, software development, and the manufacture of telecommunications equipment and pharmaceuticals, along with printing and publishing. Indeed, the operational headquarters of the Bank of Montreal relocated in Toronto, thus assisting the latter city in becoming the financial capital of Canada. Transportation The series of rapids on the St. Lawrence River west of Montreal long served as a barrier to oceangoing vessels accessing the Great Lakes. However, that impediment was overcome in with the opening of the St. Lawrence Seaway, a joint venture of the U. The seaway, along with the introduction of icebreakers in winter, not only provided much-greater access to the centre of the North American continent but also benefited other Quebec port cities, such as Baie Comeau and Quebec city, as ships could now bypass Montreal in the transatlantic trade. In response, Montreal invested in container facilities and became a leader in that vital shipping service. The s also saw the proliferation of automobiles and freeways, and in the Metropolitan Boulevard, an east-west thoroughway that spanned the island, was opened. In the early 21st century Montreal was afflicted by considerable traffic congestion that may have been at least partly a long-term consequence of a cost-driven moratorium on freeway construction from to Montreal is still a railway centre, and, while much of the rail traffic is dedicated to moving goods, there is also regular passenger service to other cities such as Toronto and the Ottawa-Gatineau area. Montreal is served by two international airports both under the same authority: Hussein Abdallah Public transportation in Montreal dates from the intermittent use of horse-drawn omnibuses perhaps as early as the late s. During the winter in the s, sleighs replaced the railcar service that was inaugurated in By the entire system had been electrified and the last horsecars withdrawn from service. Electric trolley buses were used from to The system was inaugurated six months before the opening of Expo Each Metro station has a different architectural design and artistic decor. Underneath the city, some million square feet 36 million square metres of pedestrian walkways, malls, and shops offer protection from the winter cold and snow. Directly connected to the subway system, the elaborate underground network ranks as the largest of its kind in the world. Aboveground, for three seasons of the year, the public bicycle share system, BIXI an amalgam of the words bicycle and taxi , allows riders to rent a bike and drop it off at a docking station near their destination. Administration and society Government As the population expanded, many independent cities and villages were established adjacent to the city of Montreal first incorporated in on other islands, as well as on both shores of the St. One of the dynamics of that population growth was the annexation of many of those villages and cities, beginning in with the city of Hochelaga. More than two dozen others were added by In the remaining separate municipalities on Montreal Island merged into Montreal City as districts of the city. However, a number of those new districts objected to the arrangement, and in most of the former municipalities were permitted to vote for or against continued affiliation with Montreal. Ultimately, 15 communities chose to deamalgamate and became separate municipalities again in For example, Montreal was

in financial trouble as a result of the Great Depression of the s, and the provincial government established a new structure in wherein 99 councillors were elected by individuals who fell into three categories: Each class had 33 councillors, and the city was divided into 11 electoral districts. The class system was phased out by, and the number of districts was increased to Its responsibilities, for the whole of Montreal Island and Bizard Island to the north, included assessment and tax collection, traffic control, water and sewage services, police and fire protection, and antipollution activities. It was governed by a general council and an executive committee. In an urban governance system was created under which councillors were elected from 54 electoral areas in the city. The present model emerged through the annexation of all independent municipalities on the island of Montreal, the dissolving of the Montreal Urban Community, and then the election of a new provincial government under which the annexation of 15 municipalities was reversed through referendum Today Montreal has a two-tier government system composed of the City of Montreal and its 19 boroughs. Each borough has its own council and sends one or more councillors depending on population to represent the borough on the member City Council, headed by the mayor. Since the larger entity of the island of Montreal including the 15 municipalities that chose not to remain incorporated in the city has been governed by an agglomeration council, which establishes priorities for a range of services from public transit to waste management. Moreover, on the regional level, a still-broader institution, the Montreal Metropolitan Community formed in, serves 82 municipalities, encompassing an area of nearly 1, square miles 4, square km and some four million residents. Health The comprehensive Quebec health care system issues a health card to all residents that covers the cost of treatment of a wide range of health issues. Education As throughout Quebec, there is a public school system that supports both French- and English-speaking schools. The majority of those institutions are French-speaking, reflecting the majority Francophone population. There are also a range of private schools. Montreal is probably the outstanding city of Canada in terms of higher education. McGill University founded and Concordia University; formed by the merger of Sir George Williams University, founded in, and Loyola College, founded in offer mainly English-language instruction, whereas the University of Montreal and the University of Quebec at Montreal serve the French-speaking population. Beltz Cultural life With its Place des Arts, museums, public libraries, art galleries, bookshops in most European languages, symphony orchestra, publishing houses, theatre companies, and free public lectures at the universities, Montreal must be accounted as a major cultural centre. The Place des Arts is a complex of concert and theatre halls in downtown Montreal. Adjacent to it is the Museum of Contemporary Art, which was founded in and moved to its present location in Also nearby is the Complexe Desjardins, an exciting example of modern architecture; the complex, with its multilevel terraces, balconies, mezzanines, and sunken plaza, comprises three office towers, a public square, a hotel, and several restaurants and retail stores. Art instruction is given, among other places, at the Museum of Fine Arts. Besides a conservatory of music, faculties or schools of music offer instruction at the universities.

A normal thunderstorm shuts down La Paz due to the poor drainage so it was a couple of days until the boys returned to school. Plenty of trees down but otherwise La Paz came off lightly. It really is incredible that it was 10 years ago he crossed the Atlantic as a toddler, one really needs to enjoy these times, gone far too soon. We now have a week in Puerto Vallarta sin ninos for our 14th wedding anniversary, another milestone I find hard to appreciate, again seems like last week Mel and I were working on Wild B in Italy. Just before we head to Tasmania in November our dear friends from Seattle Rennie and Denny are coming to stay on Sonrisa â€” a great opportunity for us to repay their incredible hospitality. Tasmania will be an interesting time as we sort out our lives, Mexican permanent residency and whether to sell the farm in Tasmania.
