Rumor was that the vehicles could go to monocoque crossovers; [citation needed] those were shelved, as General Motors plans to add to the traditional body-on-frame truck-based SUV, as the Chevrolet Colorado-based Trailblazer debuted in for international markets, the Colorado debuting in for North America as a model , and truck owners wanting a smaller truck-based SUV, instead of the monocoque crossover. Production on the Tahoe and Yukon began in December with the first completed SUVs being used for testing purposes, [13] and started officially shipping the vehicles to dealerships on February 5, Like its larger siblings Suburban and Yukon XL, the front fascias of the Tahoe and Yukon are distinct, but from the base of the A-pillars back, they share most of the same styling cues. This now includes inlaid doors that tuck into the door sills, instead of over them, improving aerodynamics and fuel economy, and lessens interior noise. The hoods and liftgate panels now are made of aluminum in an effort to reduce vehicle weight. A more-efficient, direct-injected EcoTec3 powertrain coupled with improved aerodynamics help increase fuel economy for the SUVs. The front headlights features projector-beam headlamps that flanks the Chevrolet-signature dual-port grille "chrome on all models, sweeping into the front fenders, while the LTZ trims feature high-intensity discharge headlamps and light-emitting diode daytime running lamps. Also new are the addition of fold-flat second- and third-row seats, now a standard feature but can be equipped with an optional power-folding feature for the upgraded trims, and an additional two inches of leg room for second-row passengers. The third-row fold-flat feature is accomplished using a raised platform that reduces available cargo space behind the third-row seats. Standard third-row seats and raised "fold-flat" platform significantly reduce available cargo space compared with previous Tahoe models. Multiple USB ports and power outlets are now spread throughout their interiors, including one volt, three-prong outlet, with the Tahoe adding an available eight-inch color touch-screen radio with next-generation MyLink connectivity along with an available rear-seat entertainment system but will not feature a Blu-ray option that is exclusive to the Suburban for , while the Yukon added a standard eight-inch-diagonal color touch screen radio with enhanced IntelliLink and available navigation. The Yukon interior has more features including seats stuffed with dual-firmness foam, a standard Bose sound system and SD card slots, and laminated glass for the windshield and front windows, decreasing interior noise. Both SUVs feature sound deadening material to improve cabin quietness. The Tahoe and Yukon went on sale in February as an early model year vehicle. And despite reports that it is under consideration at this point, GM is mulling plans to bring the SS and RS package back for the Tahoe. As with the previous Z71 Tahoe, this version will continue to be offered in a 4WD LT trim only, featuring a front skid plate, off-road tires mounted on inch wheels, a unique grille, running boards and "Z71" identification inside and out. Fog lamps, front tow hooks and front parking assist are also included. The Texas Edition will be available in both LT and LTZ trims, featuring a maximum trailering package, twenty-inch polished aluminum wheels on LT models , twenty-two-inch premium painted aluminum wheels on LTZ models , and an exclusive "Texas Edition" badge. The Texas Edition Tahoe package will be part of a lineup that will also use the Texas Edition package, alongside the Suburban and Silverado. The cause of the fire was traced to an oil leak and an engine malfunction. The MyLink with Navigation feature became standard on the LTZ trim, while E85 capability is removed from retail orders [24] The Yukon, in addition to receiving the aforementioned features, sees the 6. The changes included power-adjustable pedals, forward collision alert, IntelliBeam headlamps, lane keep assist and a safety alert seat as part of the newly introduced enhanced driver alert package as an available option on the LS trim. The inside floor console with storage area-SD card reader was removed and a new infotainment system was introduced, officially ending the CD player era for the Tahoe; the 8-inch MyLink feature was expanded to the LS trim and became standard replacing the 4-inch display , although the navigation feature remains as an option on LT and standard on LTZ. A new liftgate shield was added to the

Theft Protection Package, along with the new lane keep assist which replaced the lane departure warning. The capless fuel fill tanks became standard on all trims. The instrument cluster was re-configured with a new multi-color enhancement and a heads-up display was introduced as a standard only on the LTZ trim. However, only one of their phone brands at any one time can be used. The and LTZ and Denali packages come equipped with a "wireless" charging accessory. New additions include the teen driver feature, the App Store feature, a rear seat reminder, and low speed forward automatic braking. Two new colors, blue velvet and peppercorn metallic, were added to replace four colors. The inch wheels option was expanded to three, and the rear seat entertainment system was overhauled. Chevrolet also made changes in the level trims, with the standard LS badge now removed from all LS models and the LTZ trim is renamed to Premier, which will continue to be the top of the line model. Two new colors, Dark Blue Sapphire Metallic and Mineral Metallic were introduced, the latter exclusive to the Denali, which is also adding a new inch ultra bright aluminum wheels with midnight silver premium paint and a head-up display to its features. The interior backlights changed from red to blue. The heated and vented driver and front passenger seats are now standard on the SLT and Denali trims. The Chevy Tahoe LS trim level will feature a chrome grille, 18" painted aluminum wheels, 18" all season blackwall tires, and third row seat delete which reduces passenger capacity to 5 seats from 8 seats if ordered with the Custom Edition package. One exterior color, Shadow Gray Metallic, will replace both Havana Metallic and Tungsten Metallic, and the Premier badge are added to the top of the line level trim models of the Chevy Tahoe. In the interior, in addition, the Denali features luxury options not available in the Yukon. These included an upgraded leather interior, power seats, heated seats front and rear, Bose stereo system, and some woodgrain on the dashboard. It was not until that the Denali and Escalade were redesigned. Embossed side body panels and slightly reworked headlights with projector-beam lenses along with 17" polished wheels and different grille and front bumper differentiate the Yukon Denali from the regular Yukon. The biggest change was in the styling, such as the flattened tailgate reminiscent of the new Tahoe, and particularly the grill and headlight shapes, which made the Yukon look less aggressive than previous models. The only exterior difference between the Yukon Denali and the standard Yukon are the chrome grille and extensive use of chrome accents; and of course the insignias, embossed rockerpanels, chromed headlights and the Vortec engine which it shares with the Cadillac Escalade. The battery is charged either directly by generating electricity through driving one or both electric motors using the gasoline engine while the vehicle is coasting or being driven by the gasoline engine, or by the wheels driving one or both electric motors through what is called " Regenerative braking " when the vehicle is decelerating, thus regaining some of the energy invested in forward momentum. The Tahoe is considered a strong or full hybrid, in that it can run entirely on the battery for a limited range at low speeds. The Tahoe outside the United States[edit] In Brazil the Tahoe GMT was sold under the name of "Grand Blazer", sourced from Argentina with rear-wheel drive only, regionally-sourced 6-cylinder engines the late-type 4. Chevrolet straight-6 as the only gasoline-powered option and the 4. The Tahoe name was not used in Brazil because it would be unfamiliar to most Brazilians since it refers to the Lake Tahoe on the border of Nevada and California. The Tahoe was also assembled in Venezuela from CKD kits for 3 generations, being phased out in along most of the local Chevrolet range due to unfavorable economic conditions and political circumstances. The 4th generation of the Tahoe has not been available in Venezuela. In Ecuador, due to fiscal benefits to hybrid vehicles, the 3rd generation of the Tahoe had been offered only in the Hybrid versions until A review of the benefit to exclude hybrid vehicles with a displacement greater than 1.

Government and society Constitutional framework The status of Yukon as a political entity within the Canadian federal system of government is defined by a statute of the federal government the Yukon Act [], in contrast to the provinces, whose existence is enshrined within the Canadian constitution. The head of government is the premier, the leader of the majority party in the Legislative Assembly. The head of state is the commissioner, who is appointed by the government of Canada to a term of no less than five years and performs a role similar to that of a provincial lieutenant governor. General elections are held every three to five years and are called by the premier. Residents of the territory are represented in the federal Parliament by one elected member of the House of Commons and one senator, who is appointed by the Canadian prime minister. Nutana Health, welfare, and education Educational, health, and welfare services are administered by the territorial government with financial assistance from the federal government. Comprehensive medical and hospital services are provided on the same publicly financed basis as elsewhere in Canada. Major hospital facilities are located in Whitehorse , and a system of nursing stations serves remoter centres. Police services are provided by the Royal Canadian Mounted Police. Primary and secondary education are provided by a territorial school system, and Yukon College, with its main campus at Whitehorse and a network of community branches, provides two years of university-level courses and a number of vocational and adult education programs. There are a range of programs aimed at encouraging the development of crafts, literary and visual arts , and new media. Promotions, both public and commercial, help keep alive the romanticized image of the Klondike gold rush era, which was embodied most famously in the poems of the English-born writer Robert W. Service as well as by the writings of Tom MacInnes. Some historical sites, notably the Palace Grand Theatre in Dawson, have been restored as tourist attractions. Sports and recreation Big-game hunting , fishing , river rafting, and camping are popular summer outdoor activities. In the winter many people enjoy dogsledding, snowmobiling, skiing, hockey, and snowshoeing. Athletes from Yukon are regular participants in the annual Arctic Winter Games, which have been held in Whitehorse several times since their inception in Satellite television is available throughout the territory. A number of publicly and privately operated radio and television stations serve the region. Radio and television programs reflecting aboriginal interests are produced by Northern Native Broadcasting, Yukon, located in Whitehorse and owned by the 14 Yukon First Nations. History Early inhabitants and nonnative settlers The earliest inhabitants of the region are thought to have been descendants of those who migrated from Asia via the Bering Land Bridge many millennia before. Archaeological research into early human occupation has centred on the Old Crow Basin, in the northern part of Yukon, and has suggested that humans were established there some 20, to 12, years ago, making it possibly the oldest site of human occupation in North America. Yukon was among the last areas of North America to be explored by nonnatives. Some First Nations groups in the area had established trade relationships with one another and were concerned that the newcomers would disrupt those relations. The company subsequently built trading posts in the south, but the hostile actions of First Nations peoples soon forced them to be abandoned. Farther north, Fort Yukon now in Alaska was established in on the Yukon River in what was then Russian territory. Relocated after the U.
