Chapter 2 : Anabezi | Anabezi

One of the three titles from the New Stories series for Advanced Level 3 and 4 I completed secondary school in Lusaka in Zambia. I needed money badly. There were so many nice clothes and shoes that I wanted to buy.

Due to the rainfall distribution, northern tributaries contribute much more water than southern ones, for example: The s and s were particularly wet decades in the basin. At the rate of a few cm per year, this river, the Middle Zambezi, started cutting back the bed of its river towards the west, aided by grabens rift valleys forming along its course in an east-west axis. As it did so it captured a number of south-flowing rivers such as the Luangwa and Kafue. Eventually the large lake trapped at Makgadikgadi or a tributary of it was captured by the Middle Zambezi cutting back towards it, and emptied eastwards. The Upper Zambezi was captured as well. In a few of the oldest maps, the entire river is denoted as such. But already by the early s, a new name emerged, the Cuama river sometimes "Quama" or "Zuama". Cuama was the local name given by the dwellers of the Swahili Coast for an outpost located on one of the southerly islands of the delta near the Luabo channel. Most old nautical maps denote the Luabo entry as Cuama, the entire delta as the "rivers of Cuama" and the Zambezi river proper as the "Cuama River". Map by Willem Janszoon Blaeu, dated, showing the course of the Zambezi, and its source in a great lake. They call it Zambeze, of a Nation of Cafres dwelling neere that Lake which are so called. Santos Ethiopia Oriental, [13] Thus the term "Zambezi" is after a people who live by a great lake to the north. The Bisa had a reputation as great cloth traders throughout the region. The Monomatapa notion reported by Santos that the Zambezi was sourced from a great internal lake might be a reference to one of the African Great Lakes. One of the names reported by early explorers for Lake Malawi was "Lake Zambre" probably a corruption of "Zambezi", possibly because Lake Malawi is connected to the lower Zambezi via the Shire River. The Monomatapa story resonated with the old European notion, drawn from classical antiquity, that all the great African rivers—the Nile, the Senegal, the Congo, now the Zambezi, too—were all sourced from the same great internal lake. The Portuguese were also told that the Mozambican Espirito Santo "river" actually an estuary formed by the Umbeluzi, Matola and Tembe rivers was sourced from a lake hence its outlet became known as Delagoa Bay. As a result, several old maps depict the Zambezi and the "Espirito Santo" rivers converging deep in the interior, at the same lake. However, the Bisa-derived etymology is not without dispute. Livingstone records other names for the Zambezi—Luambeji, Luambesi, Ambezi, Ojimbese and Zambese—applied by different peoples along its course, and asserts they "all possess a similar signification and express the native idea of this magnificent stream being the main drain of the country". In, the Zambezi delta, under the name "Rivers of Sena" Rios de Sena formed a colonial administrative district of Portuguese Mozambique. Exploration of the river[edit] Satellite image showing Victoria Falls and subsequent series of zigzagging gorges The Zambezi region was known to medieval geographers as the Empire of Monomotapa, and the course of the river, as well as the position of lakes Ngami and Nyasa, were given broadly accurately in early maps. These were probably constructed from Arab information. The final report of these explorations revealed the importance of the ports of the upper Zambezi to the local trade system, in particular to East African gold trade. Two or three years later he descended the Zambezi to its mouth and in the course of this journey discovered the Victoria Falls. During 1860, accompanied by John Kirk, Livingstone ascended the river by the Kongone mouth as far as the Falls, and also traced the course of its tributary the Shire and reached Lake Malawi. Portuguese explorer Serpa Pinto examined some of the western tributaries of the river and made measurements of the Victoria Falls in Two expeditions led by Major A. St Hill Gibbons in 1890 and 1891 continued the work of exploration begun by Livingstone in the upper basin and central course of the river. Economy[edit] The population of the Zambezi river valley is estimated to be about 32 million. As well as fishing for food, game fishing is a significant activity on some parts of the river. Between Mongu and Livingstone, several safari lodges cater for tourists who want to fish for exotic species, and many also catch fish to sell to aquaria. The dams along its length also provide employment for many people near them, in maintaining the hydroelectric power stations and the dams themselves. Several parts of the river are also very popular tourist destinations. Victoria Falls receives over,

visitors annually, with , visitors reported in [23]. Mana Pools and Lake Kariba also draw substantial tourist numbers. Along some stretches, it is often more convenient to travel by canoe along the river rather than on the unimproved roads which are often in very poor condition due to being regularly submerged in flood waters, and many small villages along the banks of the river are only accessible by boat. However, depending on the water level, boats could be paddled throughâ€” Lozi paddlers, a dozen or more in a boat, could deal with most of themâ€”or they could be pulled along the shore or carried around the rapids, and teams of oxen pulled barges 5 kilometres 3. Caia Bridge â€”construction started in of a 2. Above Mongu in years following poor rainy seasons the river can be forded at one or two places. In tourist areas, such as Victoria Falls and Kariba , short-distance tourist boats take visitors along the river.

Chapter 3 : Mongwe - Wild Zambezi

Zambezi Grande exclusive Safari experience is situated near the Lower Zambezi National Park, on a prime sector of the Zambezi River front, offering visitors an unforgettable personal retreat, with all the sumptuous indulgences a discerning guest would appreciate.

Read more Starlings not that Common If there were a lion behind every second bush, or a leopard in every tree, would they be so special? Would photographers want to shoot them to protect them , would photographers drive off-road or into a no-entry road to get a better angle on their million dollar picture? I have in fact seen people drive all over each other to get a closer look at a lion, to get to the front of the scene of the crime. Imagine, for a lion! Luckily no photographer will ever do that. The point I want to make about starlings is that they are too common. Most of the starlings have a metallic sheen flashing back when the sun touches their feathers, but unfortunately they are not so special because they are just too common. This might be where this terrible word is coming from: Possibly it is also because they are robust and gregarious. Read more The Story of Culture, the Captain and a Chief in the East On a recent adventure to Nambwa Tented Lodge, I discovered a new sense of recognition for what makes a place such as this truly special. Read more Top 10 Romantic Namibian Honeymoon Destinations A stunning location like Namibia is bound to have its fair share of isolated spots with which to tempt the starry-eyed newlyweds. Read more Birding on the Chobe River Birding on the Chobe floodplains is like falling into a big bowl of ice-cream, without the negative side effects of eating too much of it. Being a boatman for a bird watcher or bird photographer must be exhausting. Stopping every few metres for yet another bird. Imagine how tiring it must be for the photographer! Read more The Busanga Plains: Read more Built of moon, mist and rain: Mushrooms of the Zambezi Mushrooms are magical because they appear and disappear in an instant, and toadstools are the residence of various elves and fairies. As a result of the limited birding opportunities, my wife Helga had a field-day stopping me every five minutes to take pictures of all the beautiful flowers. Read more Tour through Kavango and Zambezi Cattle graze peacefully in the green pastures, and traditional reed and mud huts stand out between fields of mahangu and sorghum, some right next to the main roads “ to allow better access to resources and transport. Activities can be observed from your vehicle, or better still, from one of the designated picnic spots under the abundant trees. The biggest attraction of the Kavango and Zambezi regions is still the rugged, rural life that can be observed even when only passing through. Read more Paradise has a new name Green. The sun setting beyond tree canopies. Surprise visits from elusive creatures. Welcome to the Zambezi in all its wonder.

Chapter 4 : Kavango and Zambezi - Travel News Namibia

Bulpin transports the reader to the mystical country Rhodesia, today known as Zimbabwe.
