Most of them came from Java. Suurhof of Nederlands Verbond van Vakverenigingen and Evert Kupers, in his capacity as the vice-chairperson of World Federation of Trade Union, were attending the congress as well. SOBSI was however not formally outlawed, as the organization as such had not supported the uprising. The organization also called for a Lebaran festival bonus to be instituted. These demands became widely popular, and the organization rapidly expanded its base. It claimed a membership of 2. Strikes by oil workers in the same year blocked plans for lay-offs and forced the government to institute a non-contributory pension scheme instead. The policy was by the Natsir cabinet in February. Under the new orientation SOBSI sought to build alliances with the peasantry and non-comprador bourgeoisie for popular democratic revolution and to mobilize resistance against imperialism. In direct contradiction to its earlier line, SOBSI even pledged to help national capitalists and to increase productivity in industries. However, the Communist Party eventually intervened against the notion of productivity-increase at its congress. From that point onwards, May Day rallies were held jointly. At this point, the organization had branch offices and claimed a membership of 2., The vertical and local unions were reorganized into 31 national unions. The organization had eight regional offices and branches by this point. SOBSI demanded that government pay wages to these groups, a demand conceded to by the government as it accepted to pay wages to the unemployed seamen and harbour workers until mid. At the time the organization claimed a membership of 2., SOBSI was however able to defeat the plan. The campaign bore fruit, and the organization claimed to have gained half a million members in two years. The organization became increasingly dissatisfied with the policy of putting national interests ahead of class interests. The strike was broken only after the army used machine guns against the workers. Many union members were killed or imprisoned, many of them on the island Buru. The organization was banned. In there was a decision that Bendera Buruh ought to be distributed to every base-level union organization of SOBSI, but this was never implemented fully. Bendera Buruh was closed down in October

Chapter 2 : New PDF release: Organising Labour in Globalising Asia (New Rich in Asia) - Christian Coin Li

Additional resources for Organising Labour in Globalising Asia (New Rich in Asia) Sample text.) () Developmental States in East Asia, London: Macmillan.

Countering the notion that globalisation holds entirely negative consequences for labour organisation, the authors reveal some of the openings for local activism which can arise from transnational production arrangements. Interdisciplinary in nature, it will be of great interest to students and scholars of Asian studies, development studies and international labour studies. *Consumption in Asia: Lifestyles and Identities* Chua Beng-Huat ed. Is the emergence of consumer society creating moral havoc and cultural confusion in traditional Asia? It does this via a series of case studies that challenge conventional ideas about consumption and consumerism: The book also contains two theoretical chapters. This is the first book to analyse in detail consumerism in the region, and will be valuable reading for students and researchers in Asian studies, economics, politics and cultural studies. Yet they are also a focal point for the cultural restructuring of national, ethnic, religious and class identities in Asia. In this latest volume in *The New Rich Series*, the authors examine the cultural reconfiguration, consumer behaviour, economic success and social status of the new rich. The book includes case studies from Indonesia, Singapore, Malaysia, the Philippines, Thailand, India and China that challenge the narrow political-economic and cultural-determinist approaches that have so far dominated the literature on capitalist development and privilege in Asia. While the new rich are celebrated in some quarters, they are reviled in others. In this book detailed case studies of China, Indonesia, Thailand, Malaysia, Singapore and the Philippines explore such changes in depth. The volume is especially concerned with the links between femininities, public and private spheres and the changing shapes of class and nation in the countries examined. It also reveals the costs of transforming economies and ideologies. But the scenarios may be more complex. This book reveals the diversity of political oppositions in Asia, including analyses of the nature of the social movements and organisations outside institutional party politics which are contesting the exercise of state power. *Political Oppositions in Industrialising Asia* shatters complacent assumptions about the progress of liberal democracy. This has captured imagination in the West, in large part because the new middle class represents massive new markets for Western-style products. Will they bring with them the institutions of liberalism, democracy, rule of law and new institutional freedoms? These are the questions addressed by the *New Rich in Asia* series. This volume introduces a series which will be the first to examine political and social development by analysing the phenomenon of the new rich in East and Southeast Asia. The contributors are acknowledged experts on the social and political systems they dissect. Each study is based upon detailed field research and combines both theoretical and empirical material.
