*Fallout 76 - Part 1 - The Beginning TmarTn2. Loading Unsubscribe from TmarTn2? Cancel Unsubscribe. 7 Best And Worst Things About Playing Fallout 76 Solo.*

Plot summary[ edit ] Continuing on immediately from The Answer , Rachel attacks the Yeerks in control of the Blade ship, and kills Tom Berenson and his Yeerk, before being killed at the hands of his Yeerk allies shortly after; before she dies, the Ellimist briefly stops time to tell his own story to her and answer a question about her contribution to the war. As soon as her question is answered, Rachel dies. The Andalite fleet calls off their plan to destroy Earth and, after hours of negotiations, they promote Ax to rank of Prince and declares the war for Earth over. It is also revealed that the Animorphs lived in California, a fact that had not been revealed through the course of the series. The remainder of the book describes the development of the characters over the course of three years after the war. Jake , Marco , and Cassie become instant celebrities, while Ax returns to the Andalite homeworld a hero. Surrendered Yeerks are allowed to choose an animal form in which to become a nothlit. Unable to morph out of his Taxxon form, Arbron is soon killed by poachers. Toby becomes a non-voting member of the US Senate while Cassie serves as an adviser to the President. Humanity develops an alliance with the Andalites. Some developments between the two races are companies such as Microsoft and Nintendo building new electronics and Andalites morphing into humans to experience the sense of taste. Marco embraces his new fame, and winds up becoming the self-proclaimed "spokesman" for the Animorphs, as well as a TV star. Cassie uses her powers in the government to become an activist for the environment and the Hork-Bajir. Jake, however, adjusts less easily than they do to the new conditions and becomes depressed, having minimal contact with his friends and not morphing at all. A year after the conclusion of the war, Esplin formerly Visser Three and later Visser One is put on trial in The Hague and convicted of crimes against humanity. Though this objection is overruled, Jake is deeply shaken by it, as he feels that it, along with many of his actions during the war, was immoral or mistaken. In a bid to cheer Jake up, his friends capture him and dump him into the ocean, thinking that by forcing him into a dolphin morph dolphins being naturally happy they can cheer him up. Jake remains aloof, however. Esplin is forced to live out his remaining days without a host in a purple box constructed by the Andalites. He notes that the United States military is being shrunk back, and that he easily has the most interesting assignment. The ship crew finds a mysterious DNA sample, a polar bear. Ax leads the investigation team. Menderash broke off from the ship, but they were then attacked by pirates. He is the sole survivor. Meanwhile, Jake finally concedes to the government and agrees to train special ops teams to use the morphing power to combat terrorists. Jake agrees to help. He informs Marco and Cassie, the latter of whom is spending time assessing potential new places for the Hork-Bajir to inhabit with her new boyfriend Ronnie. Cassie offers to come, but Jake declines, saying that her role is over and that she is doing what she wants to do the most. Jake also believes that Cassie will be happier if she stays on Earth. Tobias relents and joins Jake on the mission. Marco agrees to come, but only after yelling at Jake, and telling him that he cannot undo his past mistakes, and that, just as during the war, they will only succeed if they follow his instincts, no matter how "crazy, reckless and ruthless. As the mission is top-secret and unauthorized, Jake and the others conduct a very elaborate plan. Marco knocks out two Andalites who are guarding a shuttle. They use the shuttle to take off and board a captured Yeerk cruiser. They then crash the shuttle into the ground. The official story would be that terrorists overpowered the Andalite guards but could not pilot the ship and crashed. Menderash, following an Andalite tradition, believes it bad luck to board the ship before it is named; after Tobias notes that it is "beautiful and dangerous and exciting", the group gives it the only fitting name, the Rachel. After several months in space, the Animorphs find the Blade Ship, only to discover that Ax has been assimilated into an entity only known as The One, which has given Ax a new mouth that splits open the lower part his face. The One threatens to consume the Animorphs, as it had done to Ax. The Yeerks lose, and the Andalites declare the war over. Visser Three is tried and convicted of war crimes and is sentenced to several consecutive life sentences. The Andalites make a single morphing cube available to Earth to combat terrorism, on the condition that it only be used for anti-terror

operations and that it remain in Andalite custody. The series ends with an introduction to The One.

### Chapter 2 : 12 Monkeys Series Finale Review: "The Beginning Part 1 and Part 2" - IGN

*The final battle against the Witness begins as the fate of time and mankind hangs in the balance; all the pieces finally come together to mark the end of the beginning.*

This is how it all started. This one single picture spawned a series of threads that dominated the Vs. Debates and would become a part of SB lore forever. This thread, however, was not like the story debates that followed; OBS was a far different beast. Instead of a war of words, OBS started off as a war of pictures. Rules and laws legislated in overly long posts were broken with one touch of the render button. OBS was glorious anarchy. Debates; in nearly every thread, Steve reminded the forumers that his starship was supreme. This constant harassment caused much resentment in the SBverse, but nothing was done. Never before has a member dared to go toe-to-toe with Big Steve, as any such challenge meant certain death. These two pictures changed all of that and sparked a war that engulfed all of Spacebattles. This became the first rule of OBS: Anything can happen, and everything will happen. Kosh and others soon learned that one must be careful in what they show in their pictures. Making a beautiful rendering showing off your fleet oftentimes led to your opponent using it for target practice. This became another rule in OBS: Think before you render. This would change in later wars that took place in the OBSverse. As the war heated up, more members became involved, and they were dedicated to the spirit of OBS: The industrial capabilities of these two powers would become damn-near unstoppable. OBS would soon become a war of attrition, and anyone who is not fully dedicated will lose. During the first part of the war, reports started to come in that the Galaxy-X had been destroyed. A member by the name of Reaperman entered the war and declared that he had destroyed Cool Guy. Reaperman made the rookie mistake of posting a message about the destruction without a detailed picture depicting it. Instead of completely destroying the Galaxy-X, Reaperman only succeeded in taking out the stardrive section. Cool Guy and the rest of the crew were able to safely escape in the saucer section and return to base for repairs. This is something that would become an annoyance to new members who tried to participate late in the thread. Unprepared for war, they would type out their moves and post it with a satisfying grin on their face; they believed that mere words would be enough to take down their opponents. Reality would soon come crashing down on them as no more than two hours later, the new guys would see a nice shiny picture undoing everything that they typed. Most would quit in frustration while some would adapt. OBS is not for everyone as only the strongest survive. The weak were better off playing in a newly created thread called, "Story Debate;" a poor imitation of OBS. After undergoing repairs, the Galaxy-X had a new mission: While out on this search and destroy mission, Cool Guy came across a fleet of ships loyal to Reaperman and obliterated them. This technique was not used often during the first OBS war, but in future wars, it became standard fare. The great OBS war was now in full swing. Cool Guy and Speedy mobilized a fleet for a massive strike against the enemy. As the allied fleet approached imperial territory, Kosh prepared his forces for battle.

**Chapter 3 : A Soldier's Journey, and the Journey of Fame, Part 1: The Beginning | HuffPost**

*The player will be able to use Spider-Man's abilities such as web slinging and wall-crawling as well other gameplay elements, one of which will be the ability to traverse using parkour, and the.*

Prologue and Part One Summary Death introduces himself as the narrator of the book. He lists the main elements of the story to come, and reveals that he has seen the main character, the book thief, three times. The first time he saw her was on a train where he had come to collect the soul of a small boy. The book thief watched him take the boy with tears frozen to her face. The next time Death saw the book thief was years later, when a pilot had crashed his plane. The third time he saw the book thief, a German town had been bombed. The book thief was sitting on a pile of rubble, holding a book. Death followed the book thief for a while, and when she dropped her book, he picked it up. The book thief is nine-year-old Liesel Meminger. She and her younger brother, Werner, are traveling by train with their mother towards Munich, where they will live with a foster family. As the book thief dreams of Adolph Hitler, Werner dies suddenly. One of the gravediggers drops a book, and Liesel, who has been digging in the snow, picks it up. Liesel and her mother continue on to Munich, then to a suburb called Molching. Himmel translates as heaven, though the town is neither hellish nor heavenly. Liesel meets her new foster parents, Hans and Rosa Hubermann. From the beginning of her time with the Hubermanns, Liesel is plagued by nightmares of her dead brother. Often she wakes up screaming, and Papa comforts her. During the day, Liesel attends school, where she is forced to study with the younger children because she is behind in her education. In February, Liesel turns ten, and is given a damaged doll by the Hubermanns. Mama begins taking Liesel along with her when she collects washing from the neighbors in Molching, and soon Liesel is making the deliveries herself. Liesel begins meeting her neighbors on Himmel Street, including her next door neighbor Rudy Steiner. Rudy is obsessed with the African-American track star Jesse Owens, who won four gold medals in the Berlin Olympics. Though Rudy and Liesel initially argue over a soccer game, they soon become best friends. Smitten with Liesel, Rudy suggests they race, and if he wins, he gets a kiss. They both fall in the mud as they run though and Liesel refuses to kiss him. One night, following a demonstration by members of the Nazi Party, Liesel has another nightmare about her brother and wets the bed. When Papa comes to change the sheets, he finds the book Liesel stole from the gravedigger who buried her brother. The lessons progress, and Papa begins taking Liesel with him during the day to study by the river. Overcome with sadness about her failed reading attempt, the death of her brother, and everything that has happened in the past few months, Liesel breaks down, and Rudy comforts her. Analysis With Death as the unconventional, omniscient narrator of *The Book Thief*, the novel immediately establishes that the story will mix elements of fantasy with historical fact. Rather than being stereotypically grim or creepy, Death presents himself as sensitive to color and light, and rather regretful about his unfortunate line of work. He has feelings for the souls he collects, and the humans left behind. Accordingly, the reader may even at this early point understand more of what is happening than Liesel does.

**Chapter 4 : THE END OF THE BEGINNING PART ONE | doomism**

*Taro Matsumura, "Fi, the First Smartphone in Japan part 1: in the beginning " Comment posted by Adam Rice on September 24, at pm.*

By Andrew Sullivan Spiraling. One of my favorite words is quickening as a noun. And what this last week suggests to me is that there is a quickening in the crisis of the Trump presidency. We can intuit this because we now know that the Trump campaign official George Papadopoulos knew by April that Russia had thousands of allegedly incriminating emails from Hillary Clinton, and planned to release them. Why on earth would he not? Lavrov is my friend. Lavrov this, Lavrov that – He even show me picture with Lavrov. That summer, Donald Trump Jr. He subsequently lied about this in a statement reportedly co-written by the president and Hope Hicks. His testimony could be devastating. All of this lends considerably more credibility to the notion that Trump may have effectively committed treason during his campaign, and that Mueller may hit pay dirt. It reached a tipping point for me last week. Exposing the petty perks of Scott Pruitt and Ben Carson and Steve Mnuchin adds some background color to the general picture of sleaze and self-serving. At the same time, a remarkable hero is emerging in the fight for the norms of liberal democracy: Fuck off, Mr, President. The result is an increasingly isolated, infuriated, and exposed commander-in-chief. Trump is flailing on policy matters, too. The reckless tax cut, we now know, has benefited shareholders far, far more than the middle or working class, the mounting debt is putting pressure on interest rates, and a sudden spree of tariffs is a further unknowable disruption. Apart from being an absurd and foul fantasy, Trump clearly knows next to nothing about the subject – because the most energetic drug dealers in this mounting epidemic have been family members distributing legal prescriptions. On immigration – thanks in part to the erratic incoherence of the president, we are at a legislative dead end. Then there was the staggering open meeting this week with senators on gun-control proposals. So why not guns? As is his belief that a president can ban bump stocks by an executive order. Sure enough, Trump soon tweeted the following in the early hours of Thursday: Drudge and Hannity are, for me, the best indicators of when Trump is in trouble. The more they bury news, the more important and dangerous it is for the Trump agenda. All the evidence reveals that, so far, he would be right. His 85 percent approval rating from Republicans remains and probably will never decline – regardless of anything he does or might do. At some point, surely even his supporters will have to say that this is finally enough. Cut It Out Why are most infant boys in America circumcised? Damned if I know. If the desert tribal customs of Jews and Muslims had never existed, no one in their right mind would ever contemplate doing this to a newborn. Female genital mutilation is much, much worse, of course, because it involves the removal of all sexual pleasure from a woman, while male genital mutilation leaves most pleasure intact. Some men may be glad to be able to control their orgasms better with a potentially less sensitive penis, I suppose – and many men, myself included, are fine with our mutilated, unnatural dicks. But it seems to me we should have had a choice in the matter, should we not? Iceland is now contemplating banning the surgery altogether, as the New York Times reports. Infant circumcision clearly violates the Hippocratic oath – first, do no harm. If there is no medical reason for operating on a tiny, very delicate penis, wrapped tightly in foreskin, and if the operation can lead to irreparable physical and psychological damage if botched, it is medically unethical. Yes, the botching is rare – but it sure happens. Infant boys have bled to death after a clumsy operation, have had their entire penises chopped off by mistake, have seen their dicks disappear into the surrounding flesh, or have had their genitals burned to a crisp by a cauterizing needle or a laser. All surgery contains risks – which is why it should be done rarely absent a medical need, and why informed consent is required by those who choose to undergo it. But to impose such risks on an infant who by definition cannot consent? There remains the important question of religious freedom, which is why this is such a vexing issue. Even though the procedure is barbaric on its face, and a new religion claiming it was essential would be laughed out of court, Judaism and Islam should surely be grandfathered in. But only Judaism and Islam. The obvious compromise for a humane and civilized country is to forbid routine male genital mutilation of any infant boy for nonreligious or nonmedical reasons. Mercifully, as civilization advances, fewer parents are inflicting this risky trauma on their

newborns, as the nature of the surgery becomes more widely understood. If all else fails – and it almost certainly will! In my view, they should do what nature urges and most humans have instinctively done: In a sardonic tweet recently, Matt Yglesias put his finger on it: Bennet is a longtime friend and former boss. One Times staffer, in a leaked Slack comment, thought her mistaken idea that an Olympic skater was an immigrant rather than the daughter of immigrants triggered visions of internment camps! Even though he, like Weiss, is a Zionist fanatic of near-unhinged proportions. But hey, I like a good neocon provocation from time to time, and such provocation in good faith is emphatically not the same as trolling. I actually like to get pissed off by columnists. I like it when they have strange obsessions. I love a good rant as much as anyone. The idea that hiring Stephens is some kind of sacrilege is, to my mind, deranged. In , it seems to me you need to have someone who can represent the Bernie left. The way in which no one on that page saw Trump coming, and had no grip on the populism gaining in strength everywhere was a pretty giant indictment of the insularity of left-liberal groupthink. And you also need someone who is pro-Trumpism. Ross Douthat is a brilliant social conservative – in my view the real star of the section – but the NYT needs someone with the perspective you find in, say, The American Conservative or the Claremont Review of Books. And someone not quite as relentlessly careful and smooth. The premise behind these suggestions, of course, is nonetheless a belief in free speech, and the battle of ideas, which is sometimes messy and never perfect. The prissy policing of words and thoughts by social justice liberals – the kind you see reflected in the leaks and quotes emerging from some NYT staffers – is anathema to opinion writing. What the world needs right now is precisely what Bennet is attempting: And the shift in revenue sources from advertising to subscriptions gives these reader sentiments real power and makes editing in a non-tribal way a constant struggle. The economic and political incentives are increasingly lined up against diversity of thought in journalism. And in some ways, advertisers are easier to resist than a mob of impassioned readers, especially those whipped up into a frenzy on social media. We need some space for liberal democratic values in our culture. Make a clearing in the woods. History will remember who did what in these illiberal times. And you have an institution and some essential principles to save. See you next Friday.

### Chapter 5 : OBS 1 Part 1: The Beginning. - OBS Memorial

*Scripture teaches that the "fear of the Lord is the beginning of knowledge." But what does it mean to "fear the Lord"? Alistair Begg answers that question on Truth For Life as we revisit one of the most popular messages from this past year.*

Thus began a wild ride for my husband and our family. Sabin began the journey with a great deal of cachet in the art world. His skills as a draughtsman and as a sculptor are extraordinary, of a level not seen in a hundred years. He has a talent stack that includes business acumen, an aesthetic sense, charisma, and public speaking. He taught for over a decade; the experience in front of a classroom gave him a flair for showmanship and understandability as a public speaker. The point is, Sabin can command a room. When he and Joe won the competition, Sabin already had hundreds more friend requests on FaceBook than FaceBook allows. He was on the map as an artist of note and his name on the map had a star beside it. Winning the Memorial Competition catapulted him to a new level of visibility. This memorial is privately funded, and the World War I Memorial Commission works hard to raise the funds to build the Memorial. Creating a memorial of a global, paradigm-changing war that is largely forgotten in our country strikes a chord with me. People like me, families like my family of origin, men like my dad, made sacrifices. They fought and died and grieved. They returned from World War I profoundly changed. Many men were shattered beyond repair, even with victory. There is a personal human cost to a war; even years later, that cost deserves to be honored. In the same way, there is a personal, human cost to making this memorial, and I am writing about it in this series to memorialize that. Artists and their families are people, too. He got actors and our daughters in to his studio to pose. Fountain pushed Sabin to revise. I give Fountain credit for this. Pushing Sabin on anything can be like waving a red flag in front of a bull. Sabin wanted to please Fountain and revised, revised, revised. And Fountain was right about what was necessary. The drawing that emerged at the end of the process is passionate, energized, poignant. Fox News came calling. The actors who participated in the photography also promoted the Memorial. Hundreds of people, most of them artists though many veterans as well, posted respectful, sometimes gushing comments on various social media platforms. In addition to commemorating a war of vast and tragic proportions, the National World War I Memorial will disrupt the current art world assumptions. This is secondary to its purpose, but it adds a special spark to the project. Hitched to the level of artistry is the narrative aspect of the Memorial. As film does, this relief tells a story that will reach people on a gut level. This post was published on the now-closed HuffPost Contributor platform.
