

Chapter 1 : 35+ Baby Booties & Shoes : calendrierdelascience.com

Soft baby shoes (or booties) let your little one build proper foot muscles and feel the ground while crawling or walking about. They also provide necessary protection from hot pavement or cold air. But baby feet grow fast and come in many shapes and sizes, so making your own soft shoes is a great way to get a custom fit at almost no cost.

This section is worked in continuous rounds. They are not joined until the end of R3. Start with the main color yarn pink. Hdc-inc in 2nd ch from hook. Insert 5 hdc in last ch from hook, bringing you to the other side of the chain. Insert 3 hdc in last ch. Hdc-inc, hdc x 2. Hdc-inc, hdc x 5. Insert a hdc and sc in next st. Insert a sc in last st. Join with a sl st. Upper Part of Shoe Note: The rounds in this section will be joined, starting with a ch 1 and ending with a sl st to the first stitch. The ch 1 and sl st do not count as stitches in the end-of-round count. The right-side RS of the sole will be the bottom of the shoe. The wrong-side WS will be the inside of the shoe. With the RS facing up towards you, insert your hook into the middle of the heel, in the back loop. Start with the secondary color yarn white. Insert a hdc into the same st as the ch. Ch 1 and hdc into the same st. Ch 1, and hdc into the same st. Ch 1, and sc into the same st. Dec, sc x 6. You are done with one shoe! Use your creativity to make these shoes unique! Any amount is greatly appreciated and will go towards the yarn and supplies I use to keep creating new designs!

Chapter 2 : 70 Free Baby Shoe & Bootie Patterns

I've rounded up 8 different tutorials to make your own baby shoes. The free DIY tutorials include everything from darling ballet shoes to sandals to traditional booties. Any of these would make.

Download the free pattern here. My son wears a size 5 shoe or mo. If your child wears a different size, just scale the pattern up or down. Cut out the half circle pattern piece out of felted wool. You will need two of this piece. You will also need to cut two rectangles of wool that are 2. I used this awesome vintage wool suit coat that I thrifted and felted. Now cut two of the oval pattern piece out of soft leather [I upcycled mine from a vest]. This is optional, though. Fold over the edge of the half circle piece and top-stitch. Fold over one long edge of the rectangle piece and top-stitch. Use that pin to thread the elastic through the rectangle piece of wool. When your elastic is just barely sticking out of your wool, zig-zag the end to attach it. Then pull the rest of the elastic to the end [the wool will bunch up slightly as you do this] and zig-zag the other end. Now pin the rectangle onto the half-circle, as seen above. The finished edges should be facing away from you. Use a straight stitch to sew the two pieces together. Sandwich the leather and sweatshirt piece together. The sweatshirt piece should be on the bottom. Then pin the wool pieces around the leather. The finished side of the wool should be facing the leather. Zig-zag stitch along the edges, making sure to capture all layers of fabric as you go. Repeat all these steps for the second shoe. Now turn your shoes right side out and admire your handiwork! And attempt to capture them in action! but of course, a 16 month-old will not sit when you want him to and does not yet understand bribery! Stacey at Boy, Oh Boy, Oh Boy has a great stocking stuffer over at her place today. Super hero hand warmers!

Chapter 3 : Ravelry: Baby's Soft Shoes pattern by Sweet Softies

make soft sole baby shoes, free pattern several sizes Haha. So I just spent two plus hours building my own pattern for and sewing this style of baby shoe. This could.

Follow the package instructions. Also, if you would like to add some additional body to the lining pieces, add your single-sided fusible interfacing to the wrong side of the lining pieces at this time. Make the strap for both the shoes. Fold the rectangle pattern piece in half, lengthwise, with right sides together. Sew one short end and down the long side. Clip the corners, turn right side out and press. You can use a chopstick or a tube turner to make quicker work of turning the little straps. Sew the velcro to the straps and the main shoe pieces according to pattern markings. Sew all the way around the rectangle velcro piece. Pay careful attention to sew them on opposite sides since you will want the shoes to open and close in the opposite direction. Refer to the image above. Sew the straps to the main shoe piece with the velcro side up. Place the strap directly across from the velcro marking on the pattern piece. Line up the raw edge of the interior curve of the main shoe piece and the raw edge of the strap. Sew the back of the main shoe piece for the exterior and the lining: Fold the main shoe piece in half, right sides together, lining up the back short, straight edge. Sew along the short edge for all four pieces 2 exterior and 2 lining. Pin the shoe sole to the main shoe piece, right sides together, lining up the front and back of the sole and main pieces according to pattern markings. Sew all the way around the shoe sole. Do this for all four sets of pieces 2 exterior and 2 lining. Here is what it will look like after you have attached the shoe sole to the main shoe piece. Place the shoe lining inside the shoe exterior with the right sides together lining up the top raw edges. Clip the curves, turn right side out and press. You will then be tucking the lining back into the exterior of the shoe. Press really well so that the inner curve of the shoe looks nice and professional. Do this for both shoes. Hand sew your little button in place on top of the velcro on the strap. Make sure to secure it very well. If buttons make you nervous on baby items, then simply leave it off. And there you have it!

Chapter 4 : 8 Free DIY Tutorials for Making Your Own Baby Shoes

DIY Soft Sole Baby Shoes - Baby Shoe Pattern - PDF Sewing Patterns for Baby Girl or Baby Boy - Instant Download Printable - DIY Crafts Baby shoe pattern, Baby.

Email Ready for some cuteness? This is the list for you! Here are dozens of free tutorials for making baby booties, shoes and slippers. Chapter 5 : How to make soft-sole leather baby shoes | eHow

This pattern was designed by a Craftsby independent design partner! You'll purchase through PayPal and all profits go to the designer. After purchase find your pattern in your pattern library. This pattern is for soft soled baby shoes - perfect for babies who are not yet walking or learning to walk.

Both sites also have basic directions as well. Purchase a Pattern You also have the option available to purchase a pattern and directions. Pattern makers who sell their patterns normally offer a wider variety of sizes and more detailed instructions. Both of the stores below sell patterns in all sizes as well as leather. You can also purchase sample kits that contain all leathers needed to make a complete pair of shoe; out of recycled and prepared leather. This store has several options on purchasing leather by the pound. If you are lucky enough to have a local leather store, check and see if they have "scrap bins" where leather is sold by the pound. The reason you need to do this is that you can not purchase leather by the foot or yard like you do fabric. Leather is priced by the foot but sold by the "hide" only, and who really needs 25 feet of one color of leather? Here is a link to their location web page, check and see if there is one near you. Check your local thrift stores for leather pants, skirts, and jackets that you can cut up and reuse. After cutting the leather into smaller flat pieces, be sure to pre-wash any leather you are going to use in hot water, with a color catcher, and dry in a dryer before use. This will preshrink the leather so you can machine wash the shoes you are making. Cutting Out Your Pattern You can not pin your pattern to leather as the pin holes will remain after you remove the pins. Simple trace the pattern pieces onto the back side of the leather you will be using. Gel pens seem to work best, use a light colored one on dark leathers and a darker one on light colored leather. Be sure to flip your pieces over so you end up with a right and left facing piece of all patterns. Also keep in mind that you can use standard hole punches in many different sizes to achieve different affects; eyes, center of flowers, center of tires, etc. Reinforcing the Top Most patterns will have you cut two 2 pieces of the Top side for each shoe; one for the actual top and one as a lining. The lining piece of each Top will also have slits cut into it for elastic. When you cut the slots for the elastic to run through, cut through the lining and the reinforcement. Completing the Shoe The rest is pretty simple. You will sew a Top piece and a lining Top together across the top edge. Clip triangles out of the seam allowance to allow it to easily curve. Turn right side out and run a seam across top edge to reinforce. Sew the casing onto the top of the heel. Be sure to reinforce the ends of each seam as their will be a lot of stress against them. Lay the sole with the bottom side up down and center the Top piece, with the outer leather layer down, over it. You can use paper clips or binder clips to position your pieces and make sure the two edges of the top piece align on either side of the sole correctly. Follow same directions for attaching heel. Reinforce seam and trim. Turn right side out. She has over 20 years experience sewing with all fabrics and is currently teaching classes on making leather shoes at the University of Texas.
