

Chapter 1 : Thieme E-Books & E-Journals

Dr. Askold Mosijczuk, MD is a pediatric hematology-oncology specialist in Columbia, MD and has been practicing for 40 years. He graduated from U Of Buffalo SUNY Sch Of Med & Biomedical Sci in and specializes in pediatric hematology & oncology.

Acute lymphoblastic leukemia with the 8;14 q24;q32 translocation and FAB L3 morphology associated with a E-precursor immunophenotype: A Pediatric Oncology Group study. Intensive high-dose asparaginase consolidation improves survival for pediatric patients with T cell acute lymphoblastic leukemia and advanced stage lymphoblastic lymphoma: Significance of commonly used prognostic factors differs for children with T cell acute lymphocytic leukemia ALL , as compared to those with B-precursor ALL. Burkitt lymphoma is immunophenotypically different from Burkitt-like lymphoma in young persons Hutchison, R. Burkitt lymphoma is immunophenotypically different from Burkitt-like lymphoma in young persons. Effects of cranial radiation in children with high risk T cell acute lymphoblastic leukemia: Benefit of intensified therapy for patients with local or regional embryonal rhabdomyosarcoma: New recurring cytogenetic abnormalities and association of blast cell karyotypes with prognosis in childhood T-cell acute lymphoblastic leukemia: BLOOD, 96 7 , 1167-1172 Attitudes and practices among pediatric oncologists regarding end-of-life care: Results of the American Society of Clinical Oncology survey. What constitutes optimal therapy for patients with rhabdomyosarcoma of the female genital tract? Thyroid carcinoma after successful treatment of osteosarcoma: A report of three patients Verneris, M. A report of three patients. Controversies in the management of paratesticular rhabdomyosarcoma: Seminars in Pediatric Surgery, 10 3 , 115-119 Presurgical window of carboplatin and surgery and multidrug chemotherapy for the treatment of newly diagnosed metastatic or unresectable osteosarcoma: Pediatric Oncology Group trial Ferguson, W. Pediatric Oncology Group trial. Which patients with microscopic disease and rhabdomyosarcoma experience relapse after therapy? Efficacy of ifosfamide and doxorubicin given as a phase II "window" in children with newly diagnosed metastatic rhabdomyosarcoma: A report from the Intergroup Rhabdomyosarcoma Study Group. A Pediatric Oncology Group trial. Dose escalation and pharmacokinetics of pegylated liposomal doxorubicin Doxil in children with solid tumors: A pediatric oncology group study Marina, N. A pediatric oncology group study. Bone marrow stroma-supported culture of T-lineage acute lymphoblastic leukemic cells predicts treatment outcome in children: Results of a prospective clinical trial Donaldson, S. Results of a prospective clinical trial. Minimax two-stage-designs with applications to tissue banking case-control studies Shuster, J. Minimax two-stage-designs with applications to tissue banking case-control studies. Assessment of lymphadenopathy in children Twist, C. Assessment of lymphadenopathy in children. Children from ethnic minorities have benefited equally as other children from contemporary therapy for rhabdomyosarcoma: A report from the intergroup rhabdomyosarcoma study group Baker, K. A report from the intergroup rhabdomyosarcoma study group. National action plan for childhood cancer: Prognostic factors and clinical outcomes in children and adolescents with metastatic rhabdomyosarcoma - A report from the intergroup rhabdomyosarcoma study IV Breneman, J. Prognostic factors and clinical outcomes in children and adolescents with metastatic rhabdomyosarcoma - A report from the intergroup rhabdomyosarcoma study IV. Presurgical chemotherapy compared with immediate surgery and adjuvant chemotherapy for nonmetastatic osteosarcoma: Pediatric oncology group study POG Symptom Management in Cancer: Pain, Depression, and Fatigue, July , Journal of the National Cancer Institute, 95 15 , 1715-1721 High-dose methotrexate pharmacokinetics and outcome of children and young adults with osteosarcoma Crews, K. High-dose methotrexate pharmacokinetics and outcome of children and young adults with osteosarcoma. Symptom management in cancer: Journal of the National Cancer Institute. Monographs, 32 , 91-100 Epstein-Barr virus-associated peripheral T-cell lymphoma and hemophagocytic syndrome arising after liver transplantation: Case report and review of the literature George, T. Case report and review of the literature. Results and prognostic indices Lieskovsky, Y. Results and

prognostic indices. BLOOD, 79 9 , â€” Review of tonsillar lymphoma in pediatric patients from the Pediatric Oncology Group: What can be learned about some indications for microscopic examination? Intensive therapy with growth factor support for patients with Ewing tumor metastatic at diagnosis: Magnetic field exposure and long-term survival among children with leukaemia Foliart, D. Magnetic field exposure and long-term survival among children with leukaemia. BLOOD, 77 4 , â€” Therapy-related myelodysplasia and acute myeloid leukemia after Ewing sarcoma and primitive neuroectodermal tumor of bone: BLOOD, 1 , 46â€” Magnetic field exposure and prognostic factors in childhood leukemia Foliart, D. Magnetic field exposure and prognostic factors in childhood leukemia. Nodular lymphocyte-predominant Hodgkin lymphoma presenting as fulminant hepatic failure in a pediatric patient: A case report with pathologic, immunophenotypic, and molecular findings Woolf, K. A case report with pathologic, immunophenotypic, and molecular findings. Non-anaplastic peripheral T-cell lymphoma in childhood and adolescence: Variations in Attitudes and Application of Regulatory Standards. BLOOD, 77 2 , â€” BLOOD, 77 5 , â€” Intensive sequential chemotherapy for children with acute myelogenous leukemia. Haematology and Blood Transfusion, 33, â€” Chemotherapy Drug Shortages in the United States: Genesis and Potential Solutions Link, M. Genesis and Potential Solutions. Adolescent and young adult oncology. Clinical practice guidelines in oncology. Journal of the National Comprehensive Cancer Network , 10 9 , â€” Extremely low-frequency magnetic fields and survival from childhood acute lymphoblastic leukemia: BLOOD, 76 3 , â€” BLOOD, 76 6 , â€” BLOOD, 66 6 , â€”

Chapter 2 : Dr. Arlynn Mulne, MD â€” El Paso, TX | Pediatric Hematology & Oncology

Background. Children diagnosed with medulloblastoma whose tumor involves the brain stem or has spread through the cerebrospinal fluid pathways to other areas of the brain or spinal cord have a poor prognosis despite therapy with surgery, craniospinal irradiation (CSI), and chemotherapy. Preradiation.
