He was a craftsman who made musical instruments. He lived in Kaiserslautern, Germany at the start of the industrial revolution. In 1845, Mr G M Pfaff, whilst experimenting, made his first sewing machine. And that very machine can still be seen today at the Munich Museum of Science and Technology. But he did of course realize the great prospects of his product which paved the way for a company that would set the standard for some of the most advanced sewing engineering the world had ever seen. A company, still today, internationally recognized as the household name for quality and technical progress in sewing. Georg Pfaff Senior decided that his son also named Georg should pay a visit to America, which he did on July 12th arriving in New York and then Philadelphia on July 15th, where he went on to visit the World Industrial Exhibition. During his son's two year stay in the US, Georg Pfaff studied manufacturing plants, tool factories and ordered tools, drilling machines and universal lathes for the PFAFF factory in Germany and it did not take long before Georg Michael Pfaff completely abandoned individual manual production for steam-driven drilling, milling and planing machines. A huge storey condensed here into a few milestones have been passed along the way. Sewing today is a true hobby for people of all ages and skill levels, just ask any quilter, embroiderer, or dressmaker how much it means to him or her. Over the years Pfaff has transformed sewing from a chore to a creative hobby. In 1889 Pfaff opened a new factory in Kaiserslautern, Germany and the production rate increased significantly, in 1891 Pfaff proudly produced their first million sewing machines. The year saw yet another milestone, launching the famous Pfaff 1, a high-performance zigzag machine to meet the ever-increasing demands on the market. After the Second World War the company continued to expand taking over the Gritzner-Kayser brand in 1945. In 1947 Pfaff became a Limited Company. Then, in 1950, the five millionth Pfaff sewing machine was manufactured, it may have been exactly like this model Belt driven by string.! Later it was superseded by the 100, then models. This model also had a seam tie-off function to automatically reverse a few stitches at the press of a lever. It was the very first time Pfaff included the industrial type dual feed In the year 1955 was revolutionary for the Pfaff. The comprehensive development of a totally new sewing machine began and would forever enhance sewers creativity. This machine came to be called Creative and was introduced to consumers in 1956, later it was superseded by numerous other models based around the chassis, but with even more advanced computer power. This model was fully programmable, i. It was a genuine newcomer in the sewing world, not only in Europe but also in the USA. A feature allowing the sewer to create and copy stitches using a unique add-on unit called the Creative Designer. It was predecessor to an embroidery unit. The first machine with Maxi Stitches up to 40 mm wide. The fabric could be fed not only front to back but also in any of eight directions. This was made possible by the invention of stepping motors that moved the feed dogs in all different directions. And even after years of unparalleled sewing history, we assure you, the best is yet to come.
