

*Start studying Piano notes. Learn vocabulary, terms, and more with flashcards, games, and other study tools.*

In this lesson you can also print free flash cards to continue practicing by yourself. I may receive a commission if you purchase something mentioned in this post. Treble means high pitch. The G or treble clef has gone through many transformations through time. See here how it has changed: As you can see, the clef was originally the letter "G", but became stylized into the familiar symbol we use today. The treble clef is also called the G clef since it "circles" around the line where the note treble G is. G is on the second line where the clef makes a swirl. So, if you know the music alphabet; A,B,C,D,E,F,G forward and backward, and you now know that the treble clef show us G; you actually know all the rest of the notes as well! So the note one step higher than G is A since G is the last letter used. The note one step lower than G is F, then E and so on. If you use syllable names Do, Re, Mi etc here is a quick translation: One commonly used technique is using "mnemonics". Treble Clef Notes on Lines from bottom up: F,A,C,E However, even though these mnemonics are shortcuts that may be useful in some situations, I am not a great fan of them to learn note names, because: Many countries in the world do not use letter naming of the notes, but use syllable names: I also want my students to immediately associate each note with where to play it on their instrument and prefer them to learn the notes by using "Landmarks" or "Guide Notes". I find this method give better and faster results. Using Landmark or Guide Notes When using guide notes to learn the note names, we memorize 5 landmark notes on each staff treble and bass on the grand staff: Here is how to learn it: Middle C can be quickly learned as being in the middle. The G clef shows us G and the F clef shows us F. Next landmark notes are in the spaces. Followed by the top line treble and the bottom line bass. Learn them like this: Top line is F. Bottom line is G. In my studio we practice these landmark or guide notes until memorized, then continue with the notes right next to each, above and below. Learn Faster With Flash Cards Flash cards are a great tool for learning different music theory concepts. When using them for drilling note names you should learn to first say the note name, then immediately play the exact pitch on an instrument. In this way you not only become a better note reader and sight reader, but learn faster and more securely since you use more of your senses see, say, hear, play.

## Chapter 2 : Piano Notes, On The Keyboard & On The Staff

*Learning to recognize notes on the staff is a necessary part of playing music from sheet music. We created some flashcards to help new learners memorize the names of the notes on the staff.*

Flashcards with guidelines, to make cutting easier and faster. Scroll down the page to download the free printable PDFs. These flashcards are a nice size for little hands. I used to send them over to the printer via email, but my printer seems to handle the cardstock just fine. We start with just a few cards -- maybe two or three! Here is what page 2 USED to look like Or, "Separate out all the treble clef cards If there is more than one of a kind there will be! When they have all the cards of the chosen staff I only do one clef at a time - it takes too much time from a lesson otherwise , then I ask them to spell simple words, taking the appropriate cards off each little stack. Mix them up, then ask your student, "Top or bottom? Scramble them again, and tell the student to arrange them from left to right, or lowest to highest, or bottom to top. You may want a double set of cards for that. There are many games you can play with these cards, especially with more than one student, where competition raises the FUN level! They are only one more tool. I suggest making them a tiny part of their weekly assignment lesson after lesson until the notes become very familiar. Here is the PDF link for the flashcards: Choose bright, bold, and pretty colors for the cards, not just white. Try using different colors for treble and bass, or ledger line notes. Ask the kids to pick their own colors! It helps them "own" the flashcards. Music for Music Teachers has other great free resources for teachers!

## Chapter 3 : Flash Cards for Learning to Read Music - Free to Download and Print | Lessonface

*These music flashcards can be used by beginning music students who are becoming acquainted with key music rudiments, all the way up to intermediate and advanced students who wish to fill in gaps here and there or increase fluency with existing knowledge.*
