*Learn Brazilian Portuguese with the Pimsleur Method by carrying on simple conversations using essential vocabulary and grammar. Learn the basics of the Brazilian Portuguese language, plus how to read with correct pronunciation and accent.*

Free Audio Lesson Learn a new language while commuting, while cleaning the house, or working out. Like millions before you, discover the power of the scientifically sequenced and portable Pimsleur Method. Thirty minutes a day is all it takes, and we get you speaking right from the first day. Pimsleur courses use a scientifically-proven method that puts you in control of your learning. Expand your menu, increase your scheduling abilities from general to specific, start to deal with currency and exchanging money, refine your conversations and add over a hundred new vocabulary items. In this phase, more directions are given in the English language, which moves your learning to a whole new plane. Lessons include shopping, visiting friends, going to a restaurant, plans for the evening, car trips, and talking about family. Reading instruction is included beginning in Lesson 10 to provide you with an introduction to reading English. These lessons, which total about one hour, are designed to teach you to sound out words with English pronunciation and accent. A Reading Booklet to be used with the audio lessons is also included. The Pimsleur Method We make no secret of what makes this powerful method work so well. Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. The Principle of Anticipation In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind. Core Vocabulary Words, phrases, and sentences are selected for their usefulness in everyday conversation. Graduated Interval Recall Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory. Organic Learning You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture. Learning in Context Research has shown that learning new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in your native language. The English Language Approximately million people speak English around the world and there are more than 50 countries where English is the primary language spoken, including in Australia, Canada, the Commonwealth Caribbean, Ireland, New Zealand, the United Kingdom, and the United States. Instruction is in Brazilian Portuguese.

### Chapter 2 : Pimsleur Brazilian Portuguese Notes I, II, and III | On Learning Brazilian Portuguese

*Pimsleur's Brazilian Portuguese teaches the Sao Paulo dialect of Brazilian Portuguese The Pimsleur® Method: the easiest, fastest way to learn a new language.*

Whether you are planning a holiday, have a business trip coming up or even thinking of residing in Brazil long term you are probably trying to decide which language course will help you master Brazilian Portuguese fastest. One of the most popular and well recognized of these languages courses is Pimsleur Brazilian Portuguese. This course offers a unique, organic approach to language learning as it is almost entirely based on listening and speaking Brazilian. Instead you simply need to start the CD or MP3 listen and provide the answers in the pauses provided. And for the most part it is but before you choose to purchase this course read my review below so that you are able to see some of the disadvantages of this course as well as the things it does well. You will also find out the type of people who this course most suits and those who may prefer a different approach to Brazilian language learning. The material on both courses is the same and so I recommend if you are going to purchase the course that you go with the cheaper downloadable version. You can also choose to buy the CDs as a bundle. This includes the first 16 lessons in the first level. This is a good choice if you want to tryout the Pimsleur approach or you are just planning a short visit to Brazil and want to know a few rudimentary phrases. With the Pimsleur approach you are constantly being forced to produce sentences and to reply to the questions posed. You can get started quickly - Some course such as Living Languages can be very frustrating when first beginning. All of the features included with software products such as Rosetta Stone and Living Languages may sound great but actually coming to grips with them can waste valuable learning time. Offers an organic learning experience - Another great thing about Pimsleur is that it offers an organic learning experience which closely replicates what you experience if you are trying to actually speak in Brazilian. Cons The pauses could be longer - During the lessons you are provided with pauses where you need to produce your own spoken Portuguese. With the easier lessons or where the material is not new the length of the pauses is pretty ideal, however with harder or fresh material the pause seems to be too short sometimes. If you are driving while learning as many Pimsleur learners are then you cannot pause the audio. While this can be a little frustrating it does force you to try and quickly produce the language which I believe is part of the science behind why the Pimsleur method is effective. Some form of testing would be useful so that you could grade which level of the courses you should begin with. If you are unsure which level you should purchase you may want to try out the sample lessons first which can be found on the Pimsleur website and see how hard you find these. Who would benefit from this course Pimsleur is one of the most divisive companies when it comes to language learning. So who is this course most suited for? Firstly people who are strong auditory learners usually love the Pimsleur approach. If you like to learn by hearing rather than reading a textbook or writing out lessons then you are going to enjoy using this course. Another group of people who really take to the Pimsleur method are those people who are interested in learning Brazilian but dislike a traditional "classroom" approach. There are no complex grammar structures to memorize and no rote learning is required. Even if you failed at language learning at school you can still succeed using this method. Pimsleur is also great for people with full time jobs and those who may not have a lot of time to devote to language learning. Each of the lessons in the course is 30 minutes each which is ideal for a morning commute. With 30 lessons for each level if you use the course every day you will find after a month you will have made good progress in your language learning. Pimsleur is expensive and if you want to cover the written language and grammar in more detail then you will need to invest in a textbook as well. Another group that will probably want to avoid the Pimsleur course are college level students and more advanced learners. These learners will probably need to invest in further material in order to cover the complexities of grammar as well as to expand their grammar. Pimsleur can still be a good place to start provided you can afford the additional expense. Summary Includes a set of great audio lessons. Constant repetition keeps you busy and makes you memorize words quick. Uses an organic learning method, which follows the principles of "how children learn languages". Level IV adds little value for its high price. Conclusion For time poor adult learners and those

who dislike a traditional approach to language learning Pimsleur can work out great. However as noted there are some serious limitations that you need to be aware of before you decide to invest your money. Pimsleur is expensive and you should still expect to buy a good dictionary and a grammar textbook. Many other courses such as Rocket Portuguese incorporate effective elements of this approach such as spaced repetition and forced production of the language. With its cheaper price, along with its additional features, many people prefer to purchase Rocket Portuguese. Overall his approach is one which are you are likely either going to love or hate, so make sure that you try out the sample lessons before you decide to buy the full course.

About the Brazilian Portuguese Language  
Brazilian Portuguese is a group of dialects of Portuguese written and spoken by virtually all the million inhabitants of Brazil and by a couple of million Brazilian emigrants mainly in the United States United Kingdom Portugal Canada Japan and Paraguay. The differences between European Portuguese and standard Brazilian Portuguese are comparable to those one might find when comparing British and American English. The Brazilian formal written standard which is defined by law and international agreements with other Portuguese-speaking countries is actually very similar to the European one; but there are nevertheless many differences in spelling lexicon and grammar. European and Brazilian writers also have markedly different preferences when choosing between supposedly equivalent words or click to go

They have spent a fortune in advertising trying to convince us that if we just spend enough money, we can have a computer program hold our hands as we move from step A to step B to step C and so on, eventually achieving our dream of being fluent in a new language. Of course, it will cost us a few hundred dollars. Like most luxury items, Rosetta Stone trades on its high price and slick marketing to create a perception of quality. I think Rosetta Stone is a good, well-produced product. Actual language study is a messy thing, one that requires motivation, a diversity of approaches, and hard work. Rosetta Stone is well beyond the budget of many people who would like to learn a language, and its one-size-fits-all approach ignores the fact that different people learn in different ways, and at different rates. Rosetta Stone also sells us the idea that achieving fluency can be easy if we just spend enough money and then let a computer program take responsibility for our learning. But achieving fluency is not easy! It requires dedication, enthusiasm, discipline, and several years of work a lot of which can be fun. One of the most popular alternatives is the Pimsleur audio course. I got hooked on Pimsleur early in my Portuguese journey and ended up completing all 90 of the Pimsleur lessons. I found my increasing ability to say ever more complex things to be completely addictive and it kept me going through the whole course. But I acknowledge that everyone learns in a different way and may need different tools. I think a method that is truly comprehensive should ideally integrate vocabulary learning, grammar practice, and all four modes of language communication: But in reality, nothing like this exists; every method has strengths and deficiencies in these areas. See the Roadmaps page for some suggestions on creating a complete plan. Computer software, online app, supplemental audio, social website

**Best for:** Reading, listening **Not so good for:** The interaction and greater variety of activities makes RS a better choice for visual learners, and for those who get bored or are easily distracted. Go at your own pace. Rosetta Stone lets you take as much time as you need. Since Rosetta Stone is more visual, reading is a part of most activities. Pimsleur offers very little reading practice. The main weakness is that Rosetta Stone emphasizes the receptive modes of communication reading, listening over the productive modes speaking, writing. However, I give RS credit for at least trying to incorporate all four modes, so I think it comes close to being Comprehensive. Audio course, mp3 or cd **Good for:** Speaking and listening **Not as good for:** Reading and writing **Cost:** Brazilian and European Pimsleur is an audio-only method consisting of 90 half-hour lessons that will theoretically take 3 months to complete, if you do one lesson roughly every day. In my case, it actually took me 7 months because I ended up not doing them every day and had to repeat them occasionally. Unfortunately, there are a confusing number of different Pimsleur products out there. The only difference between them is how many lessons each product contains “ the lessons themselves are identical from product to product. You can also choose to study the European dialect, although unfortunately there are only 10 lessons offered. What Pimsleur has going for it is that rather than asking you to just memorize and repeat phrases like so many other courses, it actually prepares you for conversation by training you to quickly turn English thoughts into Portuguese speech. Everything in Pimsleur happens in the context of a mock conversation. You can try the first lesson for free on their website to get a feel for how it works. In each lesson new words are introduced. You are asked to use them in your responses, at first frequently, and then as you move them into long-term memory, less so. Paul Pimsleur developed it in the s. But I would suggest at least trying the first 5 lessons of Pimsleur. But it does require some teeth-gritting. So here are the main advantages of Pimsleur over Rosetta Stone: Much better conversational practice. Emphasis on language creation rather than memorization. This means you actually have to focus and use your brain during each unit. Because Pimsleur is so focused on listening and speaking, I think students will come out with clearer pronunciation. You get instant feedback from a native speaker after each of your responses, after which you can try a second time to perfect the response or the pronunciation. And being more secure with your pronunciation gives you greater confidence during conversation. Pimsleur is the obvious choice for aural learners. You can do a Pimsleur lesson while driving, cooking, or even taking a bath. Pimsleur does have its weaknesses: The

Pimsleur series is starting to show its age. The narrator and speakers sound a bit old fashioned. Pimsleur teaches you a very small, though well-chosen, collection of about words. This is one area where Rosetta Stone outdoes Pimsleur in spades. Not enough focus on reading. Pimsleur does include some reading practice, but these are nothing more than short lists of words in a little booklet that you are asked to repeat as a speaker reads them. This means you get little actual practice connecting the sounds you are learning to the written words. In fact, words are rarely pronounced in the way an English or Spanish speaker wants to pronounce them. A final thing I should mention is that Pimsleur teaches you an overly formal way of speaking, especially in the early lessons, that would honestly sound pretty weird to most Brazilians if you spoke like that in everyday conversation. Imagine the Queen of England trying to have a conversation with a random New Yorker on the street and you get the idea. Portuguese is a language that is very sensitive to social register, and the formal structures you are often taught to use in business-oriented courses like Pimsleur can sound very out of place in casual speech. Despite all these shortcomings, Pimsleur still works beautifully. Some people get hung up over the lack of reading practice in Pimsleur. Let me just say that language is at heart about stringing together sounds to produce meaning. Reading and writing are just ways of manipulating symbols that stand in for the sounds. What is your mind doing when you read? When do you really know a word? When you recognize it by its sound, not by its visual transcription. What this means for language learning is that speaking and listening have to come first. Once the sounds are internalized, reading becomes a piece of cake. Of course, no one program is going to do it all. No matter what you choose, you should round out your studying by using several different types of resources. But I still think Pimsleur offers the best value for the price. If you think of Pimsleur as your first gentle introduction to the language rather than a magic key to fluency, and if you have a well-rounded study regimen to make up for the shortcomings, then these disadvantages can all be easily overcome. On a final note, in winter Pimsleur released a new product called Pimsleur Unlimited, which is a software program clearly designed to compete with Rosetta Stone. It looks like this product will address many of the weaknesses I mentioned and turn Pimsleur into more of a comprehensive system, adding tools for reading and vocabulary learning. Unfortunately, it is only available for Spanish, French, German and Italian right now. I have no idea if they plan to release a Portuguese version, but I imagine that if the product turns out to be competitive, they will gradually roll out other languages. Video lessons featuring on-location storytelling Good for: Listening and pronunciation Not as good for: I consider them one of the gold standard Portuguese programs on the web because of their focus on Portuguese as it is actually spoken in Brazilian cities. There is so much material here at so many different levels that this could keep you occupied for a couple years at least. There are audio dialogs, written texts, exercises, spaced-repetition flashcards, wordbanks. I recommend signing up for their email list, because they have sales quite frequently.

Pimsleur English - Learn on the Go! The Pimsleur English course is an all audio course which means you can learn anywhere. No books to hassle with, just pure audio learning. The Pimsleur Method will teach you to speak the most amount of English in the least amount of time. Perfect for your busy lifestyle. What is the Pimsleur Difference? The Pimsleur Method provides the most effective language-learning program ever developed. Because of this, learning to speak becomes enjoyable and rewarding. Other language programs sell only pieces - dictionaries; grammar books and instructions; lists of hundreds or even thousands of words and definitions; audios containing useless drills. They leave it to you to assemble these pieces as you try to speak. Pimsleur enables you to spend your time learning to speak the language rather than just studying its pieces. When you were learning English, could you speak before you knew how to conjugate verbs? Of course you could. That same learning process is what Pimsleur replicates. Pimsleur presents the whole language as one integrated piece so you can succeed. Pimsleur is like having your own personal tutor. Every lesson starts with a conversation in your new language. From there, a narrator will go through the words and phrases part by part. The lessons then become interactive. The narrator will ask you a question to which you will respond. After you have said your response out loud, you will hear a native speaker give the response to make sure you are correct. Paul Pimsleur lets you learn a language the way native speakers do - exposing you to vocabulary, grammar, and pronunciation all at once, in everyday conversations. And by applying Dr. After obtaining his Ph. After years of research and development, including field studies of spoken language training with adults, Dr. Pimsleur created a new method for self-instruction in spoken languages that is based on the way the human brain takes in language as speech. Of the several unique features of the Method, two key principles: Read more about Dr. The Principle of Graduated Interval Recall is a complex name for a very simple theory about memory. In his research, Dr. Pimsleur discovered how long students remembered new information and at what intervals they needed to be reminded of it. If reminded too soon or too late, they failed to retain the information. This discovery enabled him to create a schedule of exactly when and how the information should be reintroduced. The Pimsleur programs are designed to remind you of new information at the exact intervals where maximum retention takes place. Each time your memory begins to fade, you will be asked to recall the word. Through this powerful method, your new language skills move from short-term to long-term memory. Read more about Graduated Interval Recall. The Principle of Anticipation Before Dr. Pimsleur created his unique teaching method, language courses were based on the principle of repetition. On the contrary, however, neurophysiologists tell us that simple and unchallenging repetition has a hypnotic, even dulling effect on the learning process, completely counterproductive to actually learning a new language. The Principle of Anticipation requires you to "anticipate" a correct answer. Practically, what this means is that you retrieve the answer from your memory based on information provided in earlier lessons. Read more about the Principle of Anticipation. Pimsleur Results In short, Pimsleur reinvents natural language acquisition - the way you learned your native tongue - and applies it to second-language acquisition. As sufficient structures and vocabulary are acquired, early reading is introduced in those languages that imply a sound-based alphabet. Learners can then process to see how word-sounds become written language. I am learning much better than the individual lessons I am taking from a personal tutor. Thanks for such an easy and effective program! McIntyre "I think that these are the best tapes that I have every used to learn new languages" --H. Pross "I want to tell you that Pimsleur Hebrew is even better than expected! I have been trying to learn the Arabic language for years and this is the first method I have found that works for me. Vamvas "We are adopting a 13 year old girl from Russia and I have been working my tail off to acquire the language. I studied French in college for 4 years. I actually minored in the French language. I was amazed that I learned more conversation skills from the Pimsleur French I course than I did in 4 years of college.
