As much as students love them, school officials loathe calamity cancellations, those days off caused by snowstorms, hurricanes, illness outbreaks or power outages. They cost time and money, disrupt the flow of learning and leave parents in a lurch. Read More By mid-February, the Pasco-Waukesha Valley Regional district had already used its three built-in snow days for the school year, and Superintendent P. With snow in the forecast, Gundersen alerted teachers that he expected to cancel classes and asked them to develop lessons students could complete from home. A day later, when students logged in on school-provided laptops, they were able to ask teachers questions, work through assignments or jump into class discussions, even if they sometimes took breaks to shovel the walkways. But the superintendent already counts it as a learning success. Staff and students at Coyle and Cassidy High School in Taunton, Massachusetts, tried their first virtual school days after cancellations began to pile up this year. They were lucky, too, to have the "perfect snow days," said Kathleen St. Laurent, vice principal of academic affairs at Coyle and Cassidy -- no widespread power outages, no long stretches of days off, a forecast that gave teachers time to prepare and a student body that already knew the drill. Parents loved it, and students, well, they "were a little bummed out. Still, participation was high. The virtual school day had higher attendance than they expect on a normal school day, the superintendent said. We do this every day. In Ohio, schools can use "blizzard bags," online or hard copies of assignments to keep students learning and days counting. Even at schools that provide an online bank of activities, it can be complicated to keep an entire class moving forward, said Dick Flanary, deputy executive director for programs and services for the National Association of Secondary School Principals. The real class behind the Super Bowl commercial Even without schoolwide technology programs, individual teachers are finding ways to keep their students on track. The day before a February snowstorm swept through the Atlanta area, teacher Jordan Kohanim sent her students home with the same instructions she repeated all year: Check the class website. Most of her students at Northview High School outside Atlanta have made it a habit, and with the help of tools such as Remind, a service that allows teachers to send text messages to students, she was confident they would follow through. When an earlier stretch of bad weather caught schools by surprise, several students checked the website and completed assignments without her asking, she said. But Kohanim made herself available to answer questions and check work, and it helped to keep students focused until they returned the following week. We have to keep moving. Will Google Glass go to your class? Students were learning other lessons, too. Zak Terzini discovered he had to be concise because he only had 140 characters to make his point about "Malcolm X. Online, he finally heard some quieter classmates speak up. They got us involved. They were assigning the right amount of work.

Let it Snow is an anthology of three short stories, all tied together by a thread, written by Maureen Johnson, John Green, and Lauren Myracle. This book was a gift from a dear friend. Her perfect boyfriend, her busy boyfriend. There are certain concessions one must make to date the perfect guy, right? She should just be happy to be his girlfriend. Her parents who were avid collectors of pieces to their Flobie Santa Village collection, which is a Christmas Village display, have been arrested in their attempt to obtain the latest addition to their collection. So Jubilee is put on a train and sent to Florida to spend the holiday with her Grandparents. They became stuck in a snow drift in the middle of a blizzard in Gracetown. To escape all the chaos, Jubilee gets off the train and treks across the road to a Waffle House. She is rescued by a boy her own age that lives nearby named Stuart. Her time with Stuart teaches her so much about herself. And one kiss makes what once was the worst into the best Christmas ever. They are enjoying themselves until they get a call from a friend that works at Waffle House saying that they absolutely have to get there because there is a group of fifteen cheerleaders stuck there for the night. So Tobin and his friends begin a crazy night trying to get to the Waffle House in the blizzard. But along the way, in the midst of all the chaos, he begins to see Angie as something other than one of his buddies. This could just turn out to be one of the best Christmas days he has ever had. She has been dating her boyfriend, Jeb for exactly one year on Christmas Eve. But they have been having problems. Their relationship has been struggling. And then Addie did something dumber than dumb. Something she regrets with every fiber of her being. So she begs Jeb to meet her at Starbucks to mend things. I loved the ending of this one as the couples from the first two stories are all brought together in a very heartwarming way. These were three very heart-warming short stories that are sure to make you smile and will warm your heart during this very special holiday season.
