

Chapter 1 : Quotes about Sky, Clouds, Sun, Stars, Sunrise, Sunset, Moon, etc

The Blue Horizon? by jerry calendrierdelascience.comday didnt happen. Tomorrow is just a possibility with the future of the world in the hands of war mongers.. Page.

The sky is that beautiful old parchment in which the sun and the moon keep their diary. It feels an impulsion But the sky knows the reasons and the patterns behind all clouds, and you will know, too, when you lift yourself high enough to see beyond horizons. A Biography, translated from German by Charles T. Brooks, Clouds come floating into my life, no longer to carry rain or usher storm, but to add color to my sunset sky. Do you see that wondrous, winged cloud? As if all the garden flowers had taken flight Into the blue air for a holiday, And left their tall green stalks beteared with dew? They shift and drift and beg interpretation May your mountains rise into and above the clouds. I therefore turn my clouds about And always wear them inside out To show the lining. Merwin And they were canopied by the blue sky, So cloudless, clear, and purely beautiful, That God alone was to be seen in Heaven. A trillion asterisks and no explanations. Knowles A cloudy day is no match for a sunny disposition. We see what a little speck we are in the universe, so insignificant, and we all take ourselves so seriously, but in the sky, there are no boundaries. No differences of caste or religion or race. VI, edited by James Hamilton, The latest authority among men of science says that little is known of the causes which balance the clouds in the air. They are formed of water, and water, however minutely divided or blown into bubbles, is always heavier than the air. And yet these flying fountains of all the rivers of earth, these armed and thundering legions of the storm, that beat down the forests with hail and bury the mountains in snow, and flood the plains with water, go floating over us at vast heights with all their mighty magazines when all our philosophy would require them to sink to the earth. How is the water-dust suspended in the atmosphere? Sometimes we see a dense heavy mist lying so thickly over the fields that it seems as if nothing could dissipate it, yet it is so thin and frail that the sun rapidly melts it away. At other times we look on colossal mountains of cloud, and see the sunlight beating on them all day long; yet they resist him victoriously, and shine in more wonderful splendour when he sinks below the horizon, and then they mysteriously steal away, and bright stars shine serenely where they stood. You are standing in the sky. When we think of the sky, we tend to look up, but the sky actually begins at the earth. Behind me and before me is God and I have no fears. It is the poetry of Nature; it is that which uplifts the spirit within us. Do your work with mastery. Like the moon, come out from behind the clouds! VI, edited by James Hamilton, Never waste any amount of time doing anything important when there is a sunset outside that you should be sitting under! Yet the powers of numbers cannot compute its enormous age,â€”lasting as space and time,â€”embosomed in time and space. Book Le Grand," , translated from German by Charles Godfrey Leland, Pictures of Travel, Mirth is like a flash of lightning, that breaks through a gloom of clouds, and glitters for a moment; cheerfulness keeps up a kind of daylight in the mind, and fills it with a steady and perpetual serenity. It dusked the quiet meadow, And the glistening grass; It dimmed the forest fountain And the clover lea; It deepened on the mountain, Darkened on the sea. VI, edited by James Hamilton, The vast space above usâ€”so near, and yet in many respects so far beyond our reach, so familiar, and yet so strange

Smith's latest Courtney family adventure (after Monsoon), set in colonial South Africa in the early 18th century, follows Jim Courtney, scion of the English shipping and adventuring family seeking.

Chapter 8 : Love - what is love | Best Love Poems

The blue horizon goes there, Beyond the deep light sky. Every life has its horizon, As blue as the ocean. We swim there to look out Beyond the charismatic #buttimegoesalongway #english #poem.

Chapter 9 : Blue Horizon (Courtney, #11) by Wilbur Smith

The sun would rise from the eastern horizon, and cut it's way across the empty sky, and sink below the western horizon. This was the only perceptible change in our surroundings. And in the movement of the sun, I felt something I hardly know how to name: some huge, cosmic love."
