Simple—Police departments all across the country get a constant flood of applications for relatively few openings. They do that using the application. Oh, one more thing—If your application is rejected, you never find out why! One of my friends decided he wanted to be a police officer. He went through the application process and was quickly disqualified. So he went through the process again—but this time he asked me to review his application before he sent it in. I helped him complete his application correctly and trained him for the written exam and fitness test, and finally the oral interview. He aced everything, got on the eligibility list, and eventually got hired within nine months! I can do the same for you! The application is the crucial first step. I will help you make sure it is! Do you need a resume? But rest assured—they ARE watching you to see if you have these qualities! As a result, you have been invited to take the written exam! All the little tricks that are designed to trip you up on your exam. There are tried-and-true ways to do this. Plus more police test tips, tricks, and secrets that will help you breeze through the exam! The second major hurdle is the oral board interview. Some departments schedule this right before the polygraph examination. Unfortunately, the sad fact is police oral boards eliminate more prospective police applicants than all other parts of the police testing process—combined! By the way—how much is it worth to you to get all the secrets you need to know to fill out the department application properly, pass the police written exam, and pass the oral board interview? And to guarantee your results! These bonuses are designed to round out the entire process—from successful applicant—to candidate—to rookie—to seasoned officer. All you have to do is download this book and read it. This can be as tricky as the written exam. Know what questions will be asked during your police oral exam and your battle is virtually won. Get the very best answers to even the toughest police oral board questions. Know why each question is being asked and what the police oral board panel is trying to find out by asking those questions. Avoid making common body language mistakes. Of course, a lot of people thrive on that. But you must still know how to deal with it and remain in control of your emotions. Controlling your fear is the key to this. There is no substitute for real-life experience to really teach you how to do this. Some of them freeze up. The end result is that all their preparation goes out the window and they end up failing the exam, which is a real shame. This bonus book will help you cope with your fears and overcome them. I give you the tips, secrets, and advice you need to make this time as beneficial as possible. Your career will be that much more rewarding if you know how to excel during your time there. An excited applicant makes it through the hiring process, and then the police training academy, and finally through their rookie year. They are genuinely excited about the work they do. They stop caring about their job. They lose that zeal that made them such a good police officer. In this report, I will share with you how a positive attitude can influence and motivate yourself and others. On the contrary, they were sent home for being grossly out of shape. A valuable resource you can look forward to! Keep current with the latest advice for taking the exam. Could I charge double or triple that amount? For that reason I did everything in my power to get the price down as low as it can be. But you have to ask—who wrote them and what kind of credentials do they have? I have—on my first try. Actually, I passed it three times! I have—and my applications were accepted! I go out on patrol every working day. I know what life as a police officer is really like. Most of the people who put out these programs are just fakes sitting in a cubical or at the kitchen table making up practice tests for the exam. I can

truly say that I practice what I preach: And you can too! Remember I asked you earlier how much it is worth to you to get all the secrets you need to fill out the department application properly and pass the police written exam? And to guarantee your results? Have you put a price on that yet? How much is it worth to avoid the frustration and embarrassment of flunking the exams and having to go through the whole process again? Can you put a price on that at all? This really is a no-brainer! You can view it right on your computer screen or print it out if you want to. Too many great candidates are needlessly eliminated at the beginning of the process because of mistakes they make that are completely avoidable. It has always bothered me that so many good people—folks who would make great police officers—never get past the first steps. If only they can make it through the initial screening process, their communities will benefit by having them on the force, and they will have a chance to enjoy rewarding careers. I hate to see these great candidates get kicked out of the system prematurely. So I am determined to give them everything I can to help them survive at the beginning—and into their careers. One Last Thought! Earlier I said that you need to give yourself all the advantages you can to successfully apply and then pass the exams. But you must also be honest enough with yourself to know—for certain—that this is the career you want. Police work is a noble profession with a long proud history. But it requires a special person with special qualities. Most people who start the process give up when they fail just one phase of the process. If you have read this far, my guess is that you are serious about pursuing this path and doing whatever it takes. And let me set you on the path to success as a police officer! This is a downloadable e-book program. You will NOT receive a physical package shipped to you in the mail. The entire package will be immediately available for you to download and get started right away after ordering. This program is NOT available in stores, so you can only access it through this website. See you on patrol!

More articles from this author: Weinblatt While police entrance processes vary widely from state to state, and even from department to department, most law enforcement applicant screening processes begin with the written exam. By starting with the written exam, most sheriffs and police chiefs having been one I understand this concept use the written exam as just that: Written exams are a fairly cheap way to knock out numerous applicants before they get to the more costly aspects of the process. Such more expensive steps could include background investigations, physicals and psychological exams. Some agencies use the written exam as a way to move people out of the process. Other parts of the process such as the oral review panel may be where placement on eligibility lists originates. Other agencies may give you extra points to be applied to your exam score. Among the favored stats groups that may be awarded additional points are: Whatever the use or interpretation of the entrance exam, one thing is clear: Here are ten tips to help you through the exam. As alluded to above, see if any group gets additional points. The agency may have identified a need and tried to encourage the filling of the gap by awarding points. You may be lucky enough to be a member of a group that the agency wants badly. To know what to study, you need to ascertain what type of test is given by the agency. Find out what previous members say about the test. You only want to get a feel for what type of test it is. You may also be able to check with the testing agency. Many agencies offer or can point you to a study guide. Many of those study guides have sample questions that you can use to gauge your baseline ability to score well. Once you have identified the type of test questions being utilized and have done a self-assessment, you need to work to strengthen your perceived areas of vulnerability. For example, some agencies have a math component on their exam. Many people have problems with this section of the exam as it has been years since they have done math problems. The Internet has many sites that you can check out and self-tutor yourself. Try to avoid eating heavily or skipping the meal prior to the test. You want to eat light and avoid sugar-laden or heavily processed foods. Clear answer indicators are especially important if the test answer sheet is a Scantron type. With this type of answer sheet, the test taker fills in a little dot corresponding with an answer letter using a number two lead pencil. False error readings often result if the Scantron scanner reader fails to detect an improperly filled in dot. After years of administering exams, I have found that the old adage holds true: In most cases, when you change the answer, you have changed it to a wrong answer. Your gut reaction is probably right. Cramming the night before and staying up late has proven to bring back very little return for the sacrifice. You want your mind to be alert and fully functional. This is especially true if it is a long exam. Having taken a few exams in my career, I am amazed by the people cramming in their car just minutes before taking an exam. Studying is best accomplished in smaller increments over time. I have always felt that creates additional stress. I have observed that many people fail because they neglected to read the questions with due care. If you are unsure of an answer, leave it blank and come back to it later. Other questions may contain the answer that you were

contemplating. If you do this, be sure to comply with the advice in number ten below. Before you turn in your test answer sheet, be sure to check it over. Test takers often leave answers blank and that impacts their final score. This also gives you a chance to go back and answer those hard to figure out answers. The bottom line in taking law enforcement entrance exams is to take the care in preparation and execution that employers want to see in the actual performance of police service duties. With attention to detail, most people should score well and leap over the first of many hurdles in their law enforcement officer career quest.
