Chapter 1 : Your Submission Package | WritersServices

Preparing Your Package for for Submission - John Muschelli.

If that is the case â€" then you need to re-examine your first three chapters and really decide whether you are beginning your novel in the best place to really hook the reader and the agent. If the literary agency guidelines state 10, words, submit ten thousand words. If the guidelines state the first three chapters, submit the first three chapters. Take a look at our article here on writing irresistible opening chapters if you think you may need to address your opening chapters. Format your manuscript correctly as per instructions from the literary agency Correctly formatting and preparing your submission package is essential. Literary agents will usually specify guidelines on their website as to how to submit your manuscript. The guidelines will usually include manuscript layout and submission guidelines â€" study these carefully. Professional presentation matters more than ever these days. Take a look at the tips below to see if your manuscript follows these: Arrange your submission letter, synopsis, manuscript sample pages and other material into one document before you start. Multiple attachments leave too much to go wrong at the receiving end. Remember a literary agent will receive many submissions each day. Make sure you are ready to submit your manuscript Submit at the right time for you Make sure you are submitting at the right time in your career. Are you absolutely happy that you have developed your writing skills sufficiently to judge that your manuscript is in the best shape possible. As soon as you submit your work to the literary world, you are setting yourself up for some harsh realities about your work â€" or not as the case may be! If the agent likes your work, chances are, they will ask to see more pretty quickly. As a general rule, give yourself time to finish the book, put it away for a month or so and then come back to it for a final read and proofread before you start submitting. Accept any constructive criticism on your book gracefully and use it to improve. Try not to burn any bridges if you are rejected. It is a small industry and it is based on building solid personal relationships throughout. Have you taken a look at our article on researching the right literary agent before you start to prepare your submission package? Do you want one of our professional editors to take a look at your manuscript to check that it is ready before you send it off to a literary agent? Chapter 2 : Preparing Your Filing Submission | Wdesk - Help

Prepare a Submission Package. Task topic including steps necessary for preparing a Submission Package, which is the deliverable that should be sent to the concerned NCA Acronym: National Competent Authority in the case of an EEA Acronym: European Economic Area.

Print Article In this article: In this part of the wizard, you will complete the steps necessary to package the documents in preparation for filing with the SEC. Expand the Project Panel. On the Filing tab, select Prepare Filing Submission from the list of steps. Click the Start button. The Prepare Filing Submission Wizard dialog box will display. Filing Information Complete the Filer form, where required fields are marked with a red asterisk. Based on the filing type you choose, the required fields will change. If needed, consult your Customer Success Manager. Advanced Options There are three Advanced Options checkboxes you can select: Include Co-Registrant Information - Select this box if you are including co-registrant information in your filing. Is a Paper Copy Confirmation - A confirming copy is not an offical filing. This tag should be used only when the official filing was previously made on paper. When a Confirming Copy is sent, the File Number and value must be entered for non-subject company filings. For subject company filings, a File Number must be used. If any information is entered using an invalid format, the border around the field will turn red and an explanatory message will appear upon hovering your mouse over the indicated field. Co-Registrants If you need to add a co-registrant and selected the option on the previous step, you will need to enter their information on the Co-Registrants step. If you select the option Elected not to use transition period, you will also need to enable the Emerging Growth Company option. For more information on these options, please refer to the following SEC release: Form-Specific Information In this step, enter form-specific information as called for by the wizard. This may include period of report, submission type, fiscal year end, or other information depending on the item being submitted. Attached Documents This step provides you an opportunity to review the documents attached to your filing, listed in filing order. If changes need to be made, click Cancel to exit this step and return to the previous step of the wizard to make your changes. Notifications The Notifications step displays a list of email addresses that will be sent a message informing them when the documents have been filed with the SEC. To add an email address to the notification list: Enter the address in the text box. You can specify which types of filings, test, live, or all, an email should receive notifications on by clicking the pencil in the Notify On column. To remove an email address from the notification list Select the address in the list which will be removed. If you do not want to send notifications, select the option Do not send notification e-mails for this filing at the top. If you need to correct this information, exit the wizard and do so. If the information is correct, confirm using the checkbox at the bottom of the window and click Next to proceed. Validation The final step of the wizard is the Validation. The dialog box will display the project name, submission type, number of attached documents and number of email addresses that will be notified upon filing. You will also be alerted of any outstanding Validation Warnings. The dialog box will list each issue. Return to the mentioned step to resolve the problem. When all Validation Warnings have been resolved, the Prepare Filing Submission dialog box will display a green check mark indicating the project is complete and ready to be submitted for a test filing. Chapter 3 : NYS OMH CFRS - Preparing your CFR Submission for Upload

The number one rule on how to prepare your submission package for sending to a literary agent is 'don't ignore the submission guidelines'. Don't, for example, submit more than requested, explaining that the first 10, words didn't do your book justice and that you wanted to submit it differently.

Advanced 2 Version Control using Git We will use the git version control system for our repositories. Other version control systems exist, such as Subversion and Mercurial, but we require git for our packages as this is the most popular modern version control system. There are other online repositories for git, such as BitBucket and GitLab. Although hosting on these repositories should be valid, we currently require all developers to currently host on GitHub. In order to host your repository on GitHub, you must sign up for an account at https: We highly recommend naming the GitHub repository the same name as the package. In order to use this command, you must have a personal access token PAT from https: You can also put your badges for number of downloads, version on CRAN if applicable , continuous integration status, and code coverage. In order to use Travis, you must have an account. If you have private repositories, those are hosted on https: We recommend adding the following options to your. Although some packages may not be able to compile on Windows machines, we strive to compile all packages on all 3 main operating systems. Once you commit and push to the GitHub repository, then Appveyor should build and check your package. We recommend using devtools:: This will check your package and documentation for consistency and inform you of any warnings or errors. We use the --as-cran as it performs checks additional checks similar to CRAN. You also can do this at the command line using R CMD check --as-cran, but you should build a source tarball of your package first. For example, a new function may work but may not handle a previous case or bug that you had fixed. Creating a unit test for this bug can ensure that if the output changes to something unexpectedly, you are notified. We recommend using the testthat package. In order to use the testthat package, the easiest way is to use usethis:: To create a vignette, run the following command: This will create an R Markdown vignette with the following metadata: You can make multiple vignettes for the different types of analyses or use cases for your package. The covr package by Jim Hester provides a great interface for code coverage in R packages. You can check the code coverage of your package using: The default is to only use the coverage of the unit tests. Thus, you would run: We use Coveralls as we have had better success setting up the API for our backend, but both are very good. The message states to add: Thus, you would add: The maintainer of the package will receive and email to verify this is a valid submission and the package will begin the changes to your package and integration. In general, this workflow is designed if you tag a commit and push that tag to GitHub. I suggest Mac users use the HomeBrew workflow. Once this is installed, in the Terminal, you must change directories to the package directory and run: This will add a deploy field to your confiration file. You should change some things around so that Travis knows that you are deploying. My recommended deploy is: This will push a binary. As long as you have environment:

Chapter 4 : Submission Options | calendrierdelascience.com

Producing the best submission package for your book Given the difficulty of getting agents and publishers to take on your work, it's really important to make sure that you present it in the best possible way.
