*Presidential Administration Profiles for Students is the third volume in Gale's U.S. Government for Students series, following Federal Agency Profiles for Students [RBB JI 99] and Special Interest Group Profiles for Students (). This volume provides biographical profiles of each president, from George Washington to Bill Clinton, and shows.*

Read public media article about presidential campaign commercials. View campaign ads and come to class prepared to discuss findings. Discuss selected ads and compare reactions. Introduction Presidential candidates running in the election have spent millions of dollars to create a series of biographical campaign ads along with ads that attack opponents. Events such as presidential debates will help candidates to shape new ads, but it will be up to the voters to decide if the ads will influence their decision in the election. Students will explore historical presidential campaign ads and then create their own TV ads. Warm Up Activity Although the cost and worth of television ads are questioned by some political scientists in the age of the Internet and social media, candidates have continued to spend big bucks on TV ads since What ads have students seen online? While presidential candidates currently focus many of their ads in battleground states, they also sponsor national ads that run in all markets. Historically, ads have been memorable for a variety of reasons, and they have often played a role in choosing the winner of the presidential election. Main Activity For homework the night before, the students should read the following article about effective presidential campaign commercials: In class, students should revisit the campaign commercial page: As they watch the commercial, they should fill out the Presidential Historical Advertisement handout. As a class, students should come together and discuss the ads that they selected. Students who chose the same ads may compare their reactions to the commercials as well as whether they would have been persuaded to vote for the candidate. Students should also discuss the different impressions they gathered from positive vs. Also, they can talk about whether they think the candidates should focus on positive or negative ads. After they have completed the worksheet, they should go to the PBS NewsHour website that will allow them to create their own campaign ads: While the website states , it will work for the current election. Once students have logged in using Facebook, they should create two ads – one biographical ad and one attack ad. Students may create the ads without hitting publish or share at the end. They should use their knowledge of historical ads to select visual images and messages that would be compelling, and they should be prepared to explain how their own ad was influenced by their favorite historical campaign commercials. Extension Activities Students may share the ads that they created with their peers during class, and the class can discuss which ads are the most persuasive. Students may also look for ads that are running in battleground states in order to see individual messages that are targeting specific states. They can see how the ads connect to the issues concerning voters in these states. Stephanie has an A.

Chinese graduate students in some fields may now receive 1-year visas. Department of State today began applying tougher restrictions on some Chinese graduate students. The new policy shortens from 5 years to 1 year the duration of visas for those planning to study aviation, robotics, and advanced manufacturing. Although the ostensible reason for the change is to improve national security, U. The revised visa policy was initially reported last month by various media outlets and confirmed last week by a senior departmental official during a hearing on student visas by a Senate panel on border security and immigration. The title of the hearing paints the dilemma in stark terms: Protecting Educational Opportunity and National Security. It may also curtail periodic visits back home. When added to other policies by the current administration that affect non-U. And the relationship became more strained after the terrorist attacks in the United States prompted increased vetting of all visitors to the country. Consular officers were given authority to grant 5-year visas to Chinese students, up from the 1-year limit that had long existed. For example, his administration has proposed analyzing the social media activity of millions of visa applicants going back 5 years. Any additional roadblocks for foreign graduate students are potentially worrisome for U. And China provides nearly one-third of those students after a decade of steady growth see graph, below. The State Department, he added, is already tracking graduate students at research universities who change their majors or chose a new research area after starting their training. At the movies After leaving the hearing, Ramotowski declined to answer questions from Science Insider about how the new policy would be implemented. But experts on U. S visa policy used their knowledge to make some educated guesses about its impact on Chinese students. One expert likened the key visa issue to needing a ticket stub to re-enter a movie theater after going out for refreshments or a bathroom break. Instead, they must go back home—or to a closer U. The process could take weeks or months. The implications for graduate training are what troubles Chodzko-Zajko, whose university hosted Chinese graduate and professional students, along with undergraduates from China this year. But it puts them at a competitive disadvantage against students from the U. Parents can also be easily spooked, says one Chinese graduate student who requested anonymity. The unstated reason for the shorter visas is that the U. But the former deputy chief of mission at the U. He is skeptical that it will improve homeland security, arguing that the consulate officers who vet visa applications are ill-equipped to ferret out potential spies. If the goal is to detect such people ahead of time and deny them access to U. But he thinks those steps must be consistent with traditional U. To the extent that we work against those strengths, we are not going to be successful.

Political History via CQ Press Also available in print Explores the events, policies, activities, institutions, groups, people, and movements that have created and shaped political life in the United States. With contributions from scholars in the fields of history and political science, this seven-volume set provides students, researchers, and scholars the opportunity to examine the political evolution of the United States from the s to the present day. The colonial period witnessed the transformation of thirteen distinct colonies into an independent federated republic. This volume discusses the diversity of the colonial political experience—a diversity that modern scholars have found defies easy synthesis—as well as the long-term conflicts, policies, and events that led to revolution, and the ideas underlying independence. No period in the history of the United States was more critical to the foundation and shaping of American politics than the early American republic. This volume discusses the era of Confederation, the shaping of the U. Constitution, and the development of the party system. This volume examines three decades in the middle of the nineteenth century, which witnessed: With the withdrawal of federal soldiers from Southern states the previous year, marked a new focus in American politics, and it became recognizably modern within the next 40 years. This volume focuses on race and politics; economics, labor, and capitalism; agrarian politics and populism; national politics; progressivism; foreign affairs; World War I; and the end of the progressive era. Between and , the U. This volume examines the postwar era with the consolidation of the New Deal, the onset of the Cold War, and the Korean War. It then moves into the s and early s, and discusses the Vietnam war; the era of John F. Wade; Watergate; and the end of the Vietnam War. The troubled Carter Administration, “, proved to be the political gateway for the resurgence of a more ideologically conservative Republican party led by a popular president, Ronald Reagan. The last volume of the Encyclopedia covers politics and national institutions in a polarized era of nationally competitive party politics and programmatic debates about taxes, social policy, and the size of national government. It also considers the mixed blessing of the change in superpower international competition associated with the end of the Cold War. Each volume includes approximately one hundred documents covering the most significant events of the year. These documents range from presidential speeches, international agreements, and Supreme Court decisions to U. Program history[ edit ] The PMF Program was established by Executive Order in , [3] and amended by Executive Order in [4] to attract to the Federal service outstanding citizen-scholars from a variety of academic disciplines and career paths who have a clear interest in, and commitment to, excellence in the leadership and management of public policies and programs. Program regulations were amended again in December by Executive Order [5] establishing the PMF program as one of the three student Pathways to federal employment. By drawing graduate students from diverse social and cultural backgrounds, the PMF Program provides a continuing source of trained men and women to meet the future challenges of public service. In September , OPM added a new STEM track to the PMF process to increase opportunities for science and technology students and meet the demand for qualified candidates for these roles in government. Eligibility[ edit ] There are two situations where graduate students may be eligible to apply to the PMF program. Graduate students from all academic disciplines who expect to complete an advanced degree from a qualifying college or university by August 31 of the academic year in which the competition is held are eligible to become Fellows. Individuals who previously applied for the program, but were not selected as a Finalist, may reapply if they meet eligibility requirements. Potential fellows should demonstrate breadth and quality of accomplishments, capacity for leadership, exceptional oral and written communication skills, and a commitment to excellence in the leadership and management of public policies and programs. The initial application occurs during autumn of each year; OPM announces finalists names in early spring the following year. Those who are nominated as finalists remain finalists for one year, unless appointed by an agency during that year. Finalists may reapply to the Program before the year of appointment eligibility ends; however, status as a current Finalist is forfeited upon accessing the on-line assessment. Following satisfactory completion of each year of the Fellowship, Fellows are eligible for promotion to the next GS level or equivalent pay band, depending on agency but cannot be promoted higher than GS during the Fellowship. After successful completion of the Fellowship, agencies may noncompetitively appoint Fellows to permanent positions and grant Fellows career or career-conditional status. Gaining agencies must provide Fellows at least eighty hours of formal classroom training each year of the Fellowship that addresses the core competencies required of the occupation or functional discipline in which Fellows will most likely be placed upon completion of the Fellowship. Gaining agencies must allow Fellows at least one developmental assignment "rotation" of four to six months in duration in any occupation at any U. It is not uncommon for gaining agencies to prohibit Fellows from completing rotations outside gaining agencies. PMFs are individually assigned a personal mentor during the Fellowship. Mentors assist Fellows with completing the requisite Individual Development Plan , identifying valuable developmental assignments, providing career advice, being a confidential sounding board, and act as advocates for Fellows. As employees of the U. Student loan repayment varies widely by agency. The membership comprises former and current Fellows, and other individuals interested in recruitment and development of Federal Government career managers.

The event will be the largest White House Science Fair to date, with more than students from more than 30 states, as well as student alumni from each of the prior five White House Science Fairs. Highlighting the powerful stories of ingenuity, social activism, teamwork, and civic engagement evident in the projects, President Obama will call on this generation of students—those in elementary, middle, and high schools today—to actively participate in solving the toughest challenges facing our world, from combating climate change to setting foot on Mars. The President created the Science Fair with a simple credo: More than K schools committing to expand access to CS, with support from Code. Commitments to expand STEM learning for more of our youngest learners, from family engagement to innovative use of media. A new online matching platform, supported by US, to help more STEM professionals who want to volunteer and mentor. More than 70 Federal agencies will participate in the Festival. Though each generation of Americans brings with them new ideas and energy, today, because of unprecedented access to cutting-edge physical and digital tools, online and in-person communities, and information about the grand challenges we face, American students are even better equipped to harness their passions towards developing solutions that confront our toughest challenges. They can be the Mars generation, the explorers who first step foot on another planet. Their skills, perseverance, and collaboration can help seed new technologies and solutions to tackle the climate crisis. They can collaborate to harness rapid advances in information technology and nanotechnology to understand the human brain, forge new solutions to cancer, and embrace the American spirit of discovery, invention, and entrepreneurship. Approximately 40 student teams will have the opportunity to exhibit their projects at the White House, and the President will personally view some of these projects. In the past 7 years: Our Nation is more than halfway towards achieving the goal the President set in of preparing , new math and science teachers by Compared to when President Obama took office, 25, more engineers are graduating each year from American universities. This White House has announced more than commitments from college and university leadership and others to provide pathways for students underrepresented in STEM to attain degrees. New Steps Being Announced by the Administration Today Federal agencies are announcing new steps to empower local communities with the tools, people, and support they need to expand their STEM efforts. Federal guidance on advancing STEM education. In particular, this guidance outlines how Federal money can be used to support high-quality, hands-on active STEM learning. These cities will create programs, seminars, and tools that assist students in connecting STEM education with real-world problem solving skills. This partnership builds on the last 2 years of expansion across YMCA of the USA, which reaches over , youth—with a focus on low-income and underrepresented youth—in 48 states and Washington, D. JAMTECH is a hands-on educational experience that gives students with little or no exposure to computer programming the opportunity to build and program their own video games over the course of a day—teaching the principles of game design, coding, and programming in a way that allows students to expand their competencies in areas such as math, physics, analysis, logic, and strategy. Over Federally supported citizen-science projects for students and adults are now accessible from a single place—CitizenScience. Government, to launch CitizenScience. A robust foundation of evidence shows that while active engagement enhances learning for students of all demographics, it has an especially beneficial effect on women and underrepresented students, likely due to a greater sense of belonging that can be achieved in active classrooms. Today, NSF is announcing that it will hold an Active Learning Day later this year, with the goal of empowering and encouraging educators nationwide to use active learning in their classrooms. New partnerships to train teachers and help more than K schools expand access to CS.
