Enjoyment 8 After seeing most of the reviews of this show, not much is explain why people love it or hate it but mostly people love this with the exception of one that is top rated at the moment. Here is my review of rave master and hope this is helpful to you. So why is this enjoyable? There is so much back story that explains what going on and goes deep to make this not bland and shows a lot of time is put into this. As the plot goes on, the objective changes. This clearly show that this is gonna last like more episodes but then they end it with a cliffhanger. I should also say that the anime is a little different to the manga which might disappoint some people who read it but to me its not a huge deal as I expected this but at least give it a non open ending! Now I know people might say its glad to end it because it might of drag like the other ongoing shonen jump titles and I can understand that but not to me. The characters looks is just like the manga which is nice. The animation is also very fluid and seems to be done well. But the backgrounds looks very crappy as not a lot of detail goes into them. So overall the art is very good and fits well. The BGM is pretty bland but fits when it comes to humor and serious moments. The ops and eds are good and can be pretty catchy. The BGM in that fits since the anime is goofy and seems to go well in the scene but its still pretty bland. The op they use is just one of the best dub themes I heard. Well to me anyway. English dub vs english subs: Now the subs is really well acted as Tomokazu does a good job of being Haru as he captures his personality very well. The rest also did a good job so no need to go in detail but what about the dubs. For one thing it is very corny almost to the point of bad and seems to be for kids which is no surprise since this is licence by Tokyo pop and this aired in cartoon network but thats the charm of it. The actors manage to work around it. And I notice that one of them is voice by Tom Kenny who voice spongebob and he fits so well with the scripts he is given. Also I notice that the jokes are very funny to make a teen laugh. They all basically follow a certain shonen stereotype as we seen in many other shonen anime. But as the plot goes on, it give lots of development for are characters. It will keep you happy but its not great do to some lacking in areas like in plot. But give this a watch as this is one of the better shonen animes out there.

Most of the main members of the Rave Warriors team use weapons to defend themselves or to attack enemies. Haru Glory wields the Ten Commandments sword and the power of Rave, giving him the ability to rapidly switch the form of his sword, and each form granting him a different, strong power. He has also proven himself to be physically vigorous and very tenacious to his goals. Haru is also a master swordsmanship specialist and has both an immense endurance and durability. Elie uses her signature weapon the Tonfa Blasters, a dual gun that is capable of firing normal bullets and, when using Magic, Magical bullets. Elie also employs a Magic Staff that belonged to her from long ago; 50 years. While not as physically powerful as the Rave Master and most members of the team, Elie has proven herself to have an immense endurance and a vast amount of Magical power dwelling within her. Etherion, if used incorrectly, can destroy an entire world. However, when in controlled of said power, Elie gains a tremendous amount of power that makes her become a nuisance to any opponent, even to the most powerful Mage, Shakuma Raregroove. Hamrio Musica is claimed to acquire a similar amount of power as the Rave Master. He uses his Silver Claiming abilities to attack opponents. He keeps a skeleton-like necklace around his neck that gives him the silver he needs to form the desired weapon. Hamrio has an incredible resistance and holds his own when in battle. Let Dahaka and Julia prefer to fight their opponents with their bare hands displaying their mastery over hand to hand combatant in the fray. However, Let and Julia are not limited to only their fits, they can also call upon their Dragon powers and abilities that hold an immense amount of power. Just like Elie, Belnika is also a Magic user that is more of a support to the team, being able to heal wounds and cure the injured, rewarding her with a crucial responsibility. Belnika is also able to use her Magic to fight, as shown when she fought Jiero alongside Niebel and Julia, proving herself to be a tough opponent. Plue is a key member to the team, but is incapable of holding his own against an opponent. However, Plue does have an ability that grants him the power to create a force-field strong enough to block incoming attacks, done with the help of the Rave of Combat. Ruby assists the members of the team with his money, helping them maintain travel expenses and so on at a reachable price. He also has combat abilities when using the Holy Bell he receives from Dalmatian. Griffon Kato is capable of changing the form of his body, sometimes even providing the members of the team a method of transportation, with such ability named "Shapeshifting". Tanchimo provides the team with transportation. The members that join the team temporarily display an abundant amount of power. The power their allies employ differ, raging from swordsman to Mages and even regular characters with fighting capabilities only. Even though most members were once the enemy, the Rave Warriors hold no grudge against any of them. Chapter 28, Pages 19 Navigation.

Because it let me start reading volume 1 without being influenced by the t. Plus we are also introduced to some of the members So I vaguely remember watching episodes of Rave Master on t. Plus we are also introduced to some of the members of the Demon Card, Shiba, the previous Rave master, and the Rave stones. If there was any specific way to describe the difference I guess it would be that Rave seemed more "cartooney". But the ones that are in the book, are very interesting, they had a lot going on in them. Plus they are funny! There are a few pages where the author gives little tidbits on the characters, but not little notes on every page. It made it slightly easier to read straight through without stopping every page to read the authors notes. But there were things that I wish had been explained. For example when Shiba takes off his "disguise" he pretty much looks the same as he did with it on. Overall it seems very well balanced so far, and I am eager to begin reading volume 2. I just had to know what he was. This snowman-faced, dog-like creature stole my heart, as well as stole the spotlight of the entire story. This debut manga by Hiro Mashima tells the story of a young boy named Haru Glory, who lives on Garage Island with his sister Cattleya very, very odd name. When Haru goes fishing one day and pulls up the strangest fish anyone has ever seen, it triggers an avalanche of events that will forever change their lives. Later on, Haru meets an old stranger named Shiba, who tells him the tale of the Dark Bring, Rave, Plue, and the part they all had in the war 50 years ago. Soon Haru learns of his destiny and must face the decision to take on that responsibility or to stay with his sister on Garage Island. This is a fairly interesting story that I feel curious to continue, but in no rush to do so. There are so many other great adventure manga out there that it is pretty hard to compete. I think if I were new to manga and this was my first foray into it, this may have been amazing to me. For those who have been reading manga for a while, you may want to stick to One Piece for your adventure fix. This could get really amazing so I may be premature in my judgment. Y ya la tiene liada: It is only him and his sister, they live on an island called Garage Island. It all starts when this old man named Shiba comes to the island and trouble starts. Shiba is not the one causing it but Shiba was hunted down by a tall man with headband with a symbol on it. To defeat him shiba pulls out a stone and goes for a punch but nothing happens and shiba gets a surprised look on his face. The man punches shiba and Haru runs to him. Shiba giv This book is about a 16 year old boy named Haru Glory. Shiba gives the stone to Haru and the stone glows. Haru lands a direct hit on the man and an explosion happens and the man is defeated. Haru later learns that the stone shiba gave to him is called Rave. Shiba was the master of rave but now rave has chosen a new master, Haru. Haru also learns that the man he defeated was apart of this organization called demon card. They are people who use dark bring which is the opposite of rave to try and rule the world. The stone Haru received from shiba was ony a piece of rave and must travel the world to find the other pieces of rave and stop demon card. My opinion on this book is absolutely fantastic. It has a perfect balance of comedy and action. This series was amazing. Haru meets lots of friends on the way which makes the book all the more better because they help him with his journey. Anyone who loves books with their own universe and powers and comedy all mixed together, I think this is a series for you.
