HomefortheFallidays Decor Game Hola! Everywhere you go it's getting there in Maryland. The kids started school and it gives me some time to start transitioning my Summer decor to Fall. The HomefortheFallidays decor game starts today and we are challenging you to post how you have started to transition into Fall. Whether it's your front porch, entryway, mantel, table centerpiece, etc. I started last week with my dining room and created a Fall vignette that used marbled dollar store pumpkins. I have also started pinning great Fall projects like crazy! Check out my Pinterest account to follow along with me. One of my favorite pins this week is this amazing wood slice pumpkin by A Night Owl Blog. Make sure to pin this to your Fall decor board using the link here. I also love this Fall terrarium idea from 2 Bees in a Pod. Great use of a pumpkin and would look right at home on a table or mantel. Be sure to pin this idea using the link here. Last favorite of the week, but certainly not least, is this early Fall wreath by Stone Gable. I love the use of apples and fall florals in this wreath. It has inspired me to refresh my Spring wreath for the Fall. Pin this amazing wreath using the link here. Show off any of your Fall decor on Instagram using the hashtag, HomefortheFallidays and you could be featured on 17 Instagram accounts. Thanks for stopping by my casa!

Chapter 5 : Ready, Set, Decorate!.. |

Ready, Set, Decorate! Ever wonder how a show house room comes together, and what ideas and tips you can incorporate into your own home? Decorator Stan Topol, designer of this year's living room (who installed this entire space in less than two hours!) offers up this valuable advice.

September Views Since this is a show house, you essentially have a blank canvas from which to work, but you chose not to paint the room. If you are a really good decorator, you start with what people already have and add to it—and this room had potential. Did you see it as a challenge? Anybody can paint a room. When I took on this show house space, I wanted to do it like a decorator would work with a client. That is, work with what was given to me. The only things I did to the space were to remove the crown moulding and add a chandelier. Where did you go from there? The lost art of conversation still exists in my life. I thought they sat with their laptops while watching TV. There are not many show houses in this country that can claim to have a DeKooning, Ruscha and Frankenthaler all in one room. Decorating is an art form. You never start with the rug, the furniture or the art. You start with a plan. But people say there are no rules to decorating anymore. I can tell you how it should be done and why it should be done. This room looks like it cost a million dollars. But there is value here. I got really upset over the price of a sofa I was planning to use for the show house, so I went shopping at AmericasMart, having forgotten what it is like to buy store-bought furniture. It was a fantastic experience. I was able to customize it, and then mix and match it. I was then able to take great antiques and put them in a situation with great upholstery and great fabric and be proud of my results.

The book goes room by room, each covered in three sections; ready, set and decorate. The getting "ready" section covers the different styles and materials used in decorating (i.e. fabric and window shapes in the window section) - this section clearly defines where to begin and what can be used to change it.
