

Chapter 1 : The Liveship Traders by Robin Hobb – BARBARIAN BOOK CLUB

The Liveship Traders Trilogy is a trilogy of books by Robin calendrierdelascience.com trilogy follows the lives of Bingtown Trader families.

I remember loving it so much that I proceeded to push it on all the people that I knew at the time. My expectations were high. After my really enjoyable reread of the Farseer trilogy, they actually went up. In this case, I at least remembered the characters and the beginning of the trilogy in particular, mainly because I think I read it after both the Farseer and the Tawny Man trilogies the first time. But by the time I was in the middle of the second book it was like experiencing everything again with no knowledge of what had come before. Anyway, on to this particularly trilogy. The books are set in the same world as the Farseer trilogy, but further to the south in Bingtown, a small settlement on the Cursed Shores. After three deaths, a liveship awakens, as the wizardwood figurehead has absorbed enough life experience and memories to take on the characteristics of a member of that family. But when Ephron Vestrit dies, nothing goes as expected, and the small saga of the Vestrit family becomes wrapped up in many larger events. The main thing that appeals to me about this series, especially this time, is the amazing ladies who make up the cast of the books. Keffria, who thought she just wanted to hide behind her husband but actually has the strength and will to take care of herself. Ronica, who has been capable all her life but has to admit her mistakes. Even Malta, starting off a spoiled and incredibly irritating girl, eventually sees the wider picture. The huge changes that take place for everyone, the way they learn and develop and change, are a big part of the book, even as the events sweep them along as much as the readers. The people who start out these books are not the same people who end them, and it feels realistic and believable. Kyle Haven, for instance, acts in a way that is incomprehensible to many of the characters, but in his own head, his views make sense which is disturbing as a reader. Malta is kind of similar to this, and in fact Althea even says she could see herself in Malta, had she been stuck in the house and forced to conform to the stereotypes of female behavior when it ill-suited her personality. I adore Fitz, from the other two trilogies, but I even more appreciate seeing so many viewpoints and understanding the population of this society. The plot, of course, is fantastic, and had me completely swept up in it, particularly in the final book. It is wide-ranging across lots of different territories, involves king-making and romance and danger and friendship and madness and healing and so much more. It has both that appeal of a closed environment – the liveships – and the sense of a wider, varied world, along with a rich and fascinating history. The only part that I felt was somewhat less appealing was the sections about the serpents. But this is a very small part of a series of books that consumed my thoughts and culminated in a very happy reader. No real need to read the Farseer trilogy first, but of course, they do loosely tie together and are actually chronologically immediately after in terms of the wider world story, so I would recommend it.
