## Chapter 1 : Case Studies & Customer Success - Amazon Web Services

*Smith (Fangruida)--Leader of Philosophy of the World, Mentor of Progress in Human Science (Hubery/Bird) The library is the holiness of human wisdom and reason. The study of physics, the way of all things, the reason of all things.*

Aella Credit Case Study Aella Credit gains a competitive edge, improves identity verification, and grows from 5, to , customers in several months. The organization provides access to credit to customers across Nigeria through an online loan-processing platform. Aella Credit uses AWS to support its loan-processing software and takes advantage of Amazon Rekognition for identity verification. Aftership Case Study Based in Hong Kong, AfterShip provides automated shipment tracking as a service, supporting shipping services worldwide and handling over 30 million packages every month. The company, part of AGC Group, is the largest glass manufacturer in the world and specializes in architectural and automotive glass products. The government agency is responsible for maintaining road infrastructure in the Flemish part of Belgium. AirAsia flies to over destinations across Asia, Australia and the Middle East with an estimated 60 million pax flown annually. Since moving its website and booking platform to AWS, they have been able to better cope with customer demands; auto-scaling to receive almost 10 million to 40 million requests per day on normal and peak seasons respectively. Airbnb Case Study Airbnb is a community marketplace for unique vacation spaces around the world. Aircel offers a range of voice and data services and is the fastest-growing telecommunications provider in India. Today, the company runs its Aircel e-money platform and Aircel Backup app on AWS, using Amazon EC2 instances for web and databases services, and relies on Amazon S3 for storage and CloudWatch services for real-time alert configuration. Airtime Case Study Airtime is a social media company and mobile app that lets users share their favorite music, videos, and messaging in real time on iOS and Android devices. Alameda County is the seventh-most populous county in California, with 14 incorporated cities and more than 1. The county uses AWS Lambda serverless compute and Amazon S3 storage to create maps of election results that are provided to users through the Amazon CloudFront content delivery network. Alert Logic is a cloud-security provider based in Houston, Texas. The company uses Amazon S3 to store and analyze data for its security-as-a-service solution. Allergan Case Study Allergan easily supports 10 percent annual business growth and launches new websites and online campaigns in one day instead of several weeks using AWS. Allergan is a global pharmaceutical firm that creates and markets brands to consumers throughout the world. The organization runs more than product websites and marketing applications on AWS. Alpha Apps Case Study Alpha Apps uses AWS to develop services faster, helping it keep ahead of the competition and deliver cost-effective services to its clients. The firm is a leading mobile app developer based in Abu Dhabi, specializing in original Arabic content and education apps. Alpha Vertex uses artificial-intelligence tools to build a model of the global financial system so it can provide investors with returns predictions, research assistance, and automated monitoring and analysis of worldwide financial media. Founded in , amaysim is an Australian mobile service provider that sells SIM-only mobile plans. The online-led business has moved nearly all of its applications, services, and databases into AWS. The online streaming, video-on-demand service offers original content as well as movies and TV shows for purchase. By using AWS, Amazon. Amplframe Case Study Founded in , Amplframe is a photography community platform in Taiwan where avid photographers can list and explore various lenses. The website features photos uploaded by users categorized by different types of lenses. Amway offers more than products and operates in more than countries and territories globally. The company is one of the first to use the new Just-in-Time certificate registration for AWS IoT, a process that automatically registers device certificates as part of the initial communication between a device and AWS IoT. AOL Case Study Using AWS, AOL has been able to close data centers and decommission about 14, in-house and collocated servers, move mission-critical workloads to the cloud, extend its global reach, and save millions of dollars on energy resources. AOL is one of the original Internet companies and today has several lines of business, including digital advertising, multiple web

## DOWNLOAD PDF SAGE, PILOT SCIENTIFIC WORLD LEADERS, HUMAN TUTOR FANGRUIDA CLASSIC STUDY OF THE TIMES

properties, and membership services. It also leverages AWS for hybrid scenarios for particular workloads. ASI , a financial services provider, needed high-powered computing to run financial simulations to value and manage insurance retirement products. The company turned to AWS to run its financial simulation platform to reduce simulation time by leveraging GPU optimized instances. As a result, ASI has been able to lower the calculation and total reporting process time from 10 days to 10 minutes. APUS is a global startup company dedicated to providing the best mobile internet products and experiences for smartphone users. As of the end of , APUS boasts more than one billion global users. Artfinder Case Study Artfinder can match its customers with art they will love thanks to recommendation tools built on AWS. The company is an online art marketplace, allowing thousands of artists to sell directly to buyers. Ascension and PokitDok Case Study Using AWS, Ascension and partner PokitDok provide customers with real-time cost estimates for their healthcare needs, and were able to create and deploy the application within a matter of weeks. PokitDok is a cloud-based healthcare API platform. Together, both companies rely on AWS to quickly launch new products and bring them to scale without the worry of downtime. AsiaInfo is a leading provider of business support systems software and solutions for telecommunications companies that include China Telecom, China Unicom, and Telenor. Askey builds cutting-edge IT solutions that can support smart projects in major cities worldwide. Astro Technology Case Study By using AWS deep-learning technologies, Astro took only six weeks to develop and deploy Astrobot Voice, the enterprise-grade voice email assistant that ships with its Astro email app. Astro built Astrobot by using Amazon Lex for speech recognition and language understanding.

**Chapter 2 : Massachusetts Institute of Technology - Wikipedia**

*The case study approach is particularly useful to employ when there is a need to obtain an in-depth appreciation of an issue, event or phenomenon of interest, in its natural real-life context.*

Bulgarian and Macedonian vampir , Bosnian: The exact etymology is unclear. List of vampires in folklore and mythology The notion of vampirism has existed for millennia. Cultures such as the Mesopotamians , Hebrews , Ancient Greeks , and Romans had tales of demons and spirits which are considered precursors to modern vampires. Despite the occurrence of vampire-like creatures in these ancient civilizations, the folklore for the entity we know today as the vampire originates almost exclusively from early 18th-century southeastern Europe , [1] when verbal traditions of many ethnic groups of the region were recorded and published. In most cases, vampires are revenants of evil beings, suicide victims, or witches , but they can also be created by a malevolent spirit possessing a corpse or by being bitten by a vampire. Belief in such legends became so pervasive that in some areas it caused mass hysteria and even public executions of people believed to be vampires. Vampires were usually reported as bloated in appearance, and ruddy, purplish, or dark in colour; these characteristics were often attributed to the recent drinking of blood. Blood was often seen seeping from the mouth and nose when one was seen in its shroud or coffin and its left eye was often open. In Slavic and Chinese traditions, any corpse that was jumped over by an animal, particularly a dog or a cat, was feared to become one of the undead. In Russian folklore , vampires were said to have once been witches or people who had rebelled against the Russian Orthodox Church while they were alive. Burying a corpse upside-down was widespread, as was placing earthly objects, such as scythes or sickles , [25] near the grave to satisfy any demons entering the body or to appease the dead so that it would not wish to arise from its coffin. It has been argued that instead, the coin was intended to ward off any evil spirits from entering the body, and this may have influenced later vampire folklore. This tradition persisted in modern Greek folklore about the vrykolakas , in which a wax cross and piece of pottery with the inscription " Jesus Christ conquers" were placed on the corpse to prevent the body from becoming a vampire. Similar Chinese narratives state that if a vampire-like being came across a sack of rice , it would have to count every grain; this is a theme encountered in myths from the Indian subcontinent , as well as in South American tales of witches and other sorts of evil or mischievous spirits or beings. The dhampir sprung of a karkanxholl has the unique ability to discern the karkanxholl; from this derives the expression the dhampir knows the lugat. The lugat cannot be seen, he can only be killed by the dhampir, who himself is usually the son of a lugat. In different regions, animals can be revenants as lugats; also, living people during their sleep. Dhampiraj is also an Albanian surname. Folkloric vampires could also make their presence felt by engaging in minor poltergeist -like activity, such as hurling stones on roofs or moving household objects, [34] and pressing on people in their sleep. Garlic is a common example, [36] a branch of wild rose and hawthorn plant are said to harm vampires, and in Europe, sprinkling mustard seeds on the roof of a house was said to keep them away. Vampires are said to be unable to walk on consecrated ground , such as that of churches or temples, or cross running water. This is similar to a practice of " anti-vampire burial ": In a 16th-century burial near Venice , a brick forced into the mouth of a female corpse has been interpreted as a vampire-slaying ritual by the archaeologists who discovered it in In the Balkans, a vampire could also be killed by being shot or drowned, by repeating the funeral service, by sprinkling holy water on the body, or by exorcism. In Romania, garlic could be placed in the mouth, and as recently as the 19th century, the precaution of shooting a bullet through the coffin was taken. For resistant cases, the body was dismembered and the pieces burned, mixed with water, and administered to family members as a cure. In Saxon regions of Germany, a lemon was placed in the mouth of suspected vampires. Blood drinking and similar activities were attributed to demons or spirits who would eat flesh and drink blood; even the devil was considered synonymous with the vampire. Lilitu was considered a demon and was often depicted as subsisting on the blood of babies, [62] and estries , female shape-changing, blood-drinking

demons, were said to roam the night among the population, seeking victims. According to Sefer Hasidim, estries were creatures created in the twilight hours before God rested. An injured estrie could be healed by eating bread and salt given her by her attacker. Over time the first two terms became general words to describe witches and demons respectively. Empusa was the daughter of the goddess Hecate and was described as a demonic, bronze-footed creature. She feasted on blood by transforming into a young woman and seduced men as they slept before drinking their blood. They were described as having the bodies of crows or birds in general, and were later incorporated into Roman mythology as strix, a kind of nocturnal bird that fed on human flesh and blood. Vampire folklore by region Lithograph by R. The 12th-century English historians and chroniclers Walter Map and William of Newburgh recorded accounts of revenants, [18] [67] though records in English legends of vampiric beings after this date are scant. He linked this event to the lack of a shmirah guarding after death as the corpse could be a vessel for evil spirits. These tales formed the basis of the vampire legend that later entered Germany and England, where they were subsequently embellished and popularized. One of the earliest recordings of vampire activity came from the region of Istria in modern Croatia, in Local villagers claimed he returned from the dead and began drinking blood from the people and sexually harassing his widow. The village leader ordered a stake to be driven through his heart, but when the method failed to kill him, he was subsequently beheaded with better results. Even government officials engaged in the hunting and staking of vampires. Blagojevich was reported to have died at the age of 62, but allegedly returned after his death asking his son for food. When the son refused, he was found dead the following day. Blagojevich supposedly returned and attacked some neighbours who died from loss of blood. Government officials examined the bodies, wrote case reports, and published books throughout Europe. The problem was exacerbated by rural epidemics of so-called vampire attacks, undoubtedly caused by the higher amount of superstition that was present in village communities, with locals digging up bodies and in some cases, staking them. Within his classification of demons, he explained the concept through the notion that incubi and succubae could possess the corpse of the deceased and walk the earth. As a devil borrows a dead body, it would seem so visibly and naturally to any man who converses with them and that any substance within the body would remain intolerably cold to others which they abuse. The subject was based on the observation that when digging up graves, it was discovered that some corpses had at some point either devoured the interior fabric of their coffin or their own limbs. Theologians and clergymen also address the topic. A paragraph on vampires was included in the second edition of *De servorum Dei beatificatione et sanctorum canonizatione*, On the beatification of the servants of God and on canonization of the blessed, written by Prospero Lambertini Pope Benedict XIV. In other words, vampires did not exist. Calmet conducted extensive research and amassed judicial reports of vampiric incidents and extensively researched theological and mythological accounts as well, using the scientific method in his analysis to come up with methods for determining the validity for cases of this nature. As he stated in his treatise: These revenants are called by the name of oupires or vampires, that is to say, leeches; and such particulars are related of them, so singular, so detailed, and invested with such probable circumstances and such judicial information, that one can hardly refuse to credit the belief which is held in those countries, that these revenants come out of their tombs and produce those effects which are proclaimed of them. Calmet had numerous readers, including both a critical Voltaire and numerous supportive demonologists who interpreted the treatise as claiming that vampires existed. The persons so sucked waned, grew pale, and fell into consumption; while the sucking corpses grew fat, got rosy, and enjoyed an excellent appetite. The controversy in Austria only ceased when Empress Maria Theresa of Austria sent her personal physician, Gerard van Swieten, to investigate the claims of vampiric entities. He concluded that vampires did not exist and the Empress passed laws prohibiting the opening of graves and desecration of bodies, sounding the end of the vampire epidemics. Other European countries followed suit. Despite this condemnation, the vampire lived on in artistic works and in local folklore. Classified as vampires, all share the thirst for blood. The term Loogaroo possibly comes from the French loup-garou meaning "werewolf" and is common in the culture of Mauritius. There are many documented cases of families disinterring loved ones and removing their

hearts in the belief that the deceased was a vampire who was responsible for sickness and death in the family, although the term "vampire" was never used to describe the dead. The deadly disease tuberculosis, or "consumption" as it was known at the time, was believed to be caused by nightly visitations on the part of a dead family member who had died of consumption themselves. Her father, assisted by the family physician, removed her from her tomb two months after her death, cut out her heart and burned it to ashes. There are two main vampire-like creatures in the Philippines: The mandurugo is a variety of the aswang that takes the form of an attractive girl by day, and develops wings and a long, hollow, thread-like tongue by night. The tongue is used to suck up blood from a sleeping victim. They use an elongated proboscis-like tongue to suck fetuses from these pregnant women. They also prefer to eat entrails specifically the heart and the liver and the phlegm of sick people. She is able to detach her fanged head which flies around in the night looking for blood, typically from pregnant women. She appeared as an attractive woman with long black hair that covered a hole in the back of her neck, with which she sucked the blood of children. Filling the hole with her hair would drive her off. Corpses had their mouths filled with glass beads, eggs under each armpit, and needles in their palms to prevent them from becoming langsuir. This description would also fit the Sundel Bolongs. Films like Encounters of the Spooky Kind and Mr. Vampire were released during the jiangshi cinematic boom of the 1980s and 1990s. Vampire hunting societies still exist, but they are largely formed for social reasons. Amateur vampire hunters flocked in large numbers to the cemetery. Several books have been written about the case, notably by Sean Manchester, a local man who was among the first to suggest the existence of the "Highgate Vampire" and who later claimed to have exorcised and destroyed a whole nest of vampires in the area. Local police stated that no such crime had been reported and that the case appears to be an urban legend. According to the paper, if the first vampire had appeared on 1 January, and it fed once a month which is less often than what is depicted in films and folklore, and every victim turned into a vampire, then within two and a half years the entire human population of the time would have become vampires. The "chupacabra hysteria" was frequently associated with deep economic and political crises, particularly during the 1990s. In some cases, especially in small localities, beliefs are still rampant and sightings or claims of vampire attacks occur frequently. In Romania during February, several relatives of Toma Petre feared that he had become a vampire. They dug up his corpse, tore out his heart, burned it, and mixed the ashes with water in order to drink it. An alternative collective noun is a "house" of vampires. Rates of decomposition vary depending on temperature and soil composition, and many of the signs are little known. This has led vampire hunters to mistakenly conclude that a dead body had not decomposed at all or, ironically, to interpret signs of decomposition as signs of continued life. This causes the body to look "plump", "well-fed", and "ruddy" changes that are all the more striking if the person was pale or thin in life. This could produce a groan-like sound when the gases moved past the vocal cords, or a sound reminiscent of flatulence when they passed through the anus. The official reporting on the Petar Blagojevich case speaks of "other wild signs which I pass by out of high respect". This can produce the illusion that the hair, nails, and teeth have grown. At a certain stage, the nails fall off and the skin peels away, as reported in the Blagojevich case—the dermis and nail beds emerging underneath were interpreted as "new skin" and "new nails". In some cases in which people reported sounds emanating from a specific coffin, it was later dug up and fingernail marks were discovered on the inside from the victim trying to escape.

## Chapter 3 : Henry David Thoreau - Wikipedia

1, Likes, 13 Comments - TED-Ed (@tededucation) on Instagram: "Have you read "A Wrinkle in Time"? What did you think? We've listed it on our #TEDEdBookRec page".

Patterson-Petty instructed the would-be quilters at Bluffview Head Start Center to interview their partners and then create symbols representing their interests and fitting their profiles. The symbols were fastened to red hearts and the more than 30 felt fabric pieces were glued to a white Unity Quilt. Kathleen Appleby is the Center Coordinator. Art is an opportunity to bring people together, said Patterson-Petty, who devised the idea when asked to develop an arts and crafts project. Patterson-Petty, an East St. Louis resident, is a multi-media artist and one of nine artists chosen to create designs that will be replicated in art-glass triptychs for freestanding glass wall partitions in the Lambert St. The artwork is scheduled for installation sometime between May and August of next year. The nine art glass triptychs are the first public art commissions for Lambert as part of the Airport Experience Program. The Public Art and Culture Project is an art initiative to create gathering places and visual high points by commissioning permanent artwork installations and rotating exhibitions in the airport, Patterson-Petty said. All nine artists will go in two groups to Munich, Germany, on Nov. Dunn cuts ribbon to be used on the heart for Ms. Not shown is Ms. Putting the finishing touches on her heart is Akia Moore right Bluffview Head Start parent, while her four-year-old daughter, Jayden, carefully crafts her contribution to the quilt. Proudly displaying their finished product is the Bluffview Head Start team: Along with entertainment a five-course meal will be served. Reservations can be made by calling The number of people involved in the event each year has more than doubled, taking the event outside Cougar Village into the campus community, said Stephanie Matteson, event planner and general assistant in University Housing. Komen, but I also like that we are educating students on breast cancer and providing a way for them to be involved. Participation was free, but donations were accepted. Komen Society and donations still are being collected. For more information, contact Matteson, , smattes siue. The event will take place at the Gateway Center in Collinsville. The regional association is comprised of housing professionals from Illinois, Indiana, Michigan and Ohio. More than delegates are expected to attend. More than 70 educational program sessions will be offered, along with two keynote speakers talking about partnerships with faculty and the economic impact on student housing. About 35 exhibitors will showcase their products during the conference, and the traditional Monday Night on the Town event will take delegates to the St. The newer members of our association will find many opportunities for continued professional and personal development. Jackson, which will be decorated in holiday decor. The reception will be held from p. Admission includes the appetizer buffet and host bar. Tickets may be purchased online, over the phone, , or in person at B. University Housing staff member awarded Regional Recognition 29 October , 1: After being recognized as the campus winner, the nomination was submitted regionally. The region includes campus winners from Indiana, Illinois, Michigan and Ohio. Students, staff and NRHH members have the opportunity to nominate an individual who has made an outstanding impact on some aspect of Residence Life. Winning awards on each campus are submitted to a regional board where they are voted on once again. Regional winners, like Mallory, are few and far between and have the great honor of national submission. Vandegrift said the SIUE Nature Preserve would feature a dedicated location for scholarship activities, including externally funded faculty research, student research and projects, and course opportunities such as field trips, lab and class projects. According to the Chancellor, the site would be home to Sweet William Woods and the Whiteside Prairie, along Whiteside Road down to Stadium Drive, featuring a relatively intact mature bluff forest and a restored prairie. Distinctive native Southern Illinois plants currently populate the region. The Western Habitat Corridor, along the west side of campus and bordered by Whiteside, Stadium and Old Poag Road, Vandegrift pointed out, would provide access to aquatic and other habitat features in the wooded area. It also would offer community green spaces, while complementing other on-campus areas of regional and historical significance, including The Gardens at

## DOWNLOAD PDF SAGE, PILOT SCIENTIFIC WORLD LEADERS, HUMAN TUTOR FANGRUIDA CLASSIC STUDY OF THE TIMES

SIUE and the former Mississippi River Festival site. The 2-acre Edwardsville campus includes a core campus, which is home to the schools of Business, Education, Engineering, Nursing and Pharmacy; the Graduate School; the College of Arts and Sciences; Lovejoy Library; and three classroom buildings. Some 3,000 students are housed in four residence halls and also the Cougar Village Apartment Complex, providing family and student housing. He said that since 1990, the University has increased the size of its incoming freshman class by 18 percent—from 1,200 to 2,100 students—while maintaining an average ACT score of 24. The number of minority students at SIUE has increased along with the overall student population growth. On the heels of achieving record enrollment for fall at 14,000 students—up 5 percent from fall Vandegrift mentioned that for the second consecutive year SIUE received national recognition among 68 universities in the "Top Up-And-Coming Schools" category by U.S. News. For the sixth consecutive year, U.S. News lists SIUE among 15 universities—including only four public institutions—for its outstanding capstone experiences, known at SIUE as a senior assignment program, which require students to integrate and synthesize what they have learned during their college experience. The study of the St. He also pointed out that the University is the second-largest employer in the Madison-St. Louis Metropolitan Area to visit, attend athletics events, conferences and shows," he said. Starting in spring 2000, Vandegrift said that upon approval by the SIU Board of Trustees the University will renovate part of Cougar Village to create a living and learning residential community for its fraternities and sororities. It is anticipated that about 1,000 students will reside in the renovated buildings allowing greater contributions by Greek organizations on campus. Also announced were plans for the proposed SIUE Nature Preserve; a 20-acre expanse of natural area along the western edge of the campus between the campus core and along Stadium Drive and New Poag Road. The area will be protected from development and available for faculty and student research, and educational opportunities. However, there will be a focus on four guest artists—more than the program has ever featured. The concert opens at 7: The concert promises to be an exciting evening of fluid creative movement onstage, featuring SIUE dance students choreographed by SIUE dance faculty in addition to the guest artists. Charles, "Kinscherff said. They have learned a lot from these artists. It also features some great blues music. It also has a feeling of empowerment for women. It seems we do a piece with a large number of dancers each year, so this year I decided it was my turn. Her tenacity in pursuing her dream, as well as the commitment to contribute to nursing science," Bernaix said, "is indeed admirable and inspiring. Admission to the Nov. An informal media conference will immediately follow the address. Over time, many of the area hospitals, in which the students complete their clinical education, adopted a maroon uniform for specific personnel. A distinctive look was necessary on the SIUC campus due to the current dental hygiene students wearing maroon," Maurer pointed out. SIUE current nursing student leadership was consulted for their selection of color. With a dynamic environment to learn and study the profession of nursing, the School has proven its commitment to providing students with educational excellence through teaching and curriculum, mentoring, simulation, clinical experience and student service. Louis Youth 25 October, Louis Center for Performing Arts youth how to keep on their toes. The feeling was mutual, according to Theodore H. Louis Center for Performing Arts. Solis would be able to teach ballet classes in East St. Louis, while she was here doing dance workshops, they were very excited. Louis Center for the Performing Arts students from left to right: Those interested may visit the website to RSVP: For more information, call Wagen, SIUE Associate Professor Brad Noble from the department of electrical and computer engineering and SIUE Assistant Professor Edward Navarre from the department of chemistry collaborated to produce the inexpensive, portable device, which will be used for clinical applications such as blood and urine testing. The instrument will have national and international significance, Navarre said, adding that the device will allow more people to be tested, as well as reduce the cost of testing. Unlike traditional elemental analyzers, which are limited to laboratory environments and require highly skilled operators, the device can function in areas where traditional instruments cannot be used due to lack of sophisticated laboratories, funding or infrastructure. Kindermusik is a music and movement program for children ages birth through 7. Classes provide a holistic musical and learning experience for young children and their families. Guided by a proven methodology

combining music and childhood development, the program provides an opportunity to enhance the child-parent relationship and enhances of lifelong love of music and learning. The Village Class, an 8-week course for infants through 18 months, offers stress-free play and relaxation techniques that strengthen mind and body development during a minute session. Parents can take materials home and incorporate activities into their daily routine. The semester theme is The Rhythm of My Day. Children will develop rhythm through interactive play and enhance their language skills. The Village class will take place from For more information, call , e-mail desingh.juno. More than Just Landing a Job 20 October , 3: While full-time, co-operative, and internship positions were available, the fair offered students more than job placement. According to Tammy Dugan, assistant director for employer relations, in the Career Development Center, the fair served a purpose for all students even if they were uninterested in obtaining co-ops, internships or full-time jobs. We have found that, in general, many students fear networking. Networking is a skill, and it must be developed," Dugan said. When employers talk with students one-on-one, these interactions are essentially mini-interviews, which is excellent for skill-building.

Chapter 4 : Google Summer of Code | Google Developers

*We would like to show you a description here but the site won't allow us.*

His paternal grandfather had been born on the UK crown dependency island of Jersey. He began to call himself Henry David after he finished college; he never petitioned to make a legal name change. The house has been restored by the Thoreau Farm Trust, [22] a nonprofit organization, and is now open to the public. He studied at Harvard College between and He lived in Hollis Hall and took courses in rhetoric , classics, philosophy, mathematics, and science. Harvard College offered it to graduates "who proved their physical worth by being alive three years after graduating, and their saving, earning, or inheriting quality or condition by having Five Dollars to give the college. Return to Concord, â€”[ edit ] The traditional professions open to college graduatesâ€”law, the church, business, medicineâ€”did not interest Thoreau, [26]: After he graduated in , he joined the faculty of the Concord public school, but he resigned after a few weeks rather than administer corporal punishment. The school closed when John became fatally ill from tetanus in after cutting himself while shaving. Emerson urged Thoreau to contribute essays and poems to a quarterly periodical, *The Dial* , and lobbied the editor, Margaret Fuller, to publish those writings. In his early years he followed Transcendentalism , a loose and eclectic idealist philosophy advocated by Emerson, Fuller, and Alcott. They held that an ideal spiritual state transcends, or goes beyond, the physical and empirical, and that one achieves that insight via personal intuition rather than religious doctrine. In their view, Nature is the outward sign of inward spirit, expressing the "radical correspondence of visible things and human thoughts", as Emerson wrote in *Nature* . He rediscovered the process of making good pencils with inferior graphite by using clay as the binder. Later, Thoreau converted the pencil factory to produce plumbago, a name for graphite at the time, which was used in the electrotyping process. In April he and his friend Edward Hoar accidentally set a fire that consumed acres 1. I did not wish to live what was not life, living is so dear; nor did I wish to practise resignation, unless it was quite necessary. I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and, if it proved to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world; or if it were sublime, to know it by experience, and be able to give a true account of it in my next excursion. I see no other alternative, no other hope for you. Thoreau refused because of his opposition to the Mexicanâ€”American War and slavery , and he spent a night in jail because of this refusal. The next day Thoreau was freed when someone, likely to have been his aunt, paid the tax, against his wishes. In January and February , he delivered lectures on "The Rights and Duties of the Individual in relation to Government", [43] explaining his tax resistance at the Concord Lyceum. Bronson Alcott attended the lecture, writing in his journal on January . His allusions to the Mexican War, to Mr. Thoreau did not find a publisher for the book and instead printed 1, copies at his own expense; fewer than were sold. Thoreau left Walden Pond on September 6, . The book compresses that time into a single calendar year, using the passage of the four seasons to symbolize human development. Part memoir and part spiritual quest, *Walden* at first won few admirers, but later critics have regarded it as a classic American work that explores natural simplicity, harmony, and beauty as models for just social and cultural conditions. In , he and his family moved into a house at Main Street , where he lived until his death. He jested that all he got from this adventure "was a cold. Whereas his own country had had its revolution, in Canada history had failed to turn. He read avidly on botany and often wrote observations on this topic into his journal. The point of this task was to "anticipate" the seasons of nature, in his word. He also kept a series of notebooks, and these observations became the source of his late writings on natural history, such as "Autumnal Tints", "The Succession of Trees", and "Wild Apples", an essay lamenting the destruction of indigenous wild apple species. Until the s, literary critics[ who? With the rise of environmental history and ecocriticism as academic disciplines, several new readings of Thoreau began to emerge, showing him to have been both a philosopher

and an analyst of ecological patterns in fields and woodlots. Walden Pond He traveled to Canada East once, Cape Cod four times, and Maine three times; these landscapes inspired his "excursion" books, *A Yankee in Canada*, *Cape Cod*, and *The Maine Woods*, in which travel itineraries frame his thoughts about geography, history and philosophy. *Paul and Mackinac Island*. He devoured all the first-hand travel accounts available in his day, at a time when the last unmapped regions of the earth were being explored. He processed everything he read, in the local laboratory of his Concord experience. Among his famous aphorisms is his advice to "live at home like a traveler. Thoreau was disgusted by this, and he composed a key speech, *A Plea for Captain John Brown*, which was uncompromising in its defense of Brown and his actions. As a biographer of Brown put it, "If, as Alfred Kazin suggests, without John Brown there would have been no Civil War, we would add that without the Concord Transcendentalists, John Brown would have had little cultural impact. In , following a late-night excursion to count the rings of tree stumps during a rainstorm, he became ill with bronchitis. Recognizing the terminal nature of his disease, Thoreau spent his last years revising and editing his unpublished works, particularly *The Maine Woods and Excursions*, and petitioning publishers to print revised editions of *A Week and Walden*. He wrote letters and journal entries until he became too weak to continue. His friends were alarmed at his diminished appearance and were fascinated by his tranquil acceptance of death. When his aunt Louisa asked him in his last weeks if he had made his peace with God, Thoreau responded, "I did not know we had ever quarreled. Today, Thoreau is regarded as one of the foremost American writers, both for the modern clarity of his prose style and the prescience of his views on nature and politics. His memory is honored by the international Thoreau Society and his legacy honored by the Thoreau Institute at Walden Woods, established in in Lincoln, Massachusetts. Nature and human existence[ edit ] Most of the luxuries and many of the so-called comforts of life are not only not indispensable, but positive hindrances to the elevation of mankind. He was himself a highly skilled canoeist; Nathaniel Hawthorne , after a ride with him, noted that "Mr. Thoreau managed the boat so perfectly, either with two paddles or with one, that it seemed instinct with his own will, and to require no physical effort to guide it. He wrote in *Walden*, "The practical objection to animal food in my case was its uncleanness; and besides, when I had caught and cleaned and cooked and eaten my fish, they seemed not to have fed me essentially. It was insignificant and unnecessary, and cost more than it came to. A little bread or a few potatoes would have done as well, with less trouble and filth. Instead he sought a middle ground, the pastoral realm that integrates nature and culture. His philosophy required that he be a didactic arbitrator between the wilderness he based so much on and the spreading mass of humanity in North America. He decried the latter endlessly but felt that a teacher needs to be close to those who needed to hear what he wanted to tell them. The wildness he enjoyed was the nearby swamp or forest, and he preferred "partially cultivated country. His expectations were high because he hoped to find genuine, primeval America. But contact with real wilderness in Maine affected him far differently than had the idea of wilderness in Concord. Instead of coming out of the woods with a deepened appreciation of the wilds, Thoreau felt a greater respect for civilization and realized the necessity of balance. I believe that water is the only drink for a wise man; wine is not so noble a liquor. Of all ebriosity, who does not prefer to be intoxicated by the air he breathes? He strove to portray himself as an ascetic puritan. However, his sexuality has long been the subject of speculation, including by his contemporaries. Critics have called him heterosexual, homosexual, or asexual. Some scholars have suggested that homoerotic sentiments run through his writings and concluded that he was homosexual. In him are the spaces which my orbit traverses".

Now you can chat, text or e-mail us for help with resources for your papers and projects. Library and Bookstore Partner on Textbook Reserve Collection As part of a pilot project with the bookstore, the library now has 27 textbooks used in level courses available for 2-hour, in-library use. The criteria used to select which textbooks to offer were: This is a pilot project funded by the library for the fall semester. Based on student feedback and with additional financial support, we hope the reserve collection can be expanded to help more students overcome the high cost of textbooks next semester and beyond. Academic Video Online and Ambrose Digital. In consultation with faculty, particularly those involved in online and hybrid instruction, library staff have chosen two multi-disciplinary collections to support learning and teaching across the curriculum. All videos include transcripts or closed captioning to support all users, may be embedded in Vspace, and are accessible on a variety of mobile devices. Both collections allow for unlimited, simultaneous use. Titles include documentaries, interviews, performances, news programs and news reels, field recordings, commercials, and raw footage. The collection is expected to grow to over 20, titles by the end of Library staff welcome continued feedback on the content and usability of these collections. We will offer a workshop on using these streaming video collections in the fall. For more information or assistance, please contact Jennifer Dean, Head of Collection Development and Acquisitions, at ext. New Carpet is Coming to Zahnow Library! The project begins on Monday, June 10, and is scheduled to end around July Crews of movers and carpet installers will be working and making noise between 8: The Library will remain open, but students, faculty and staff should note the areas and services that will be unavailable on the following dates: Our annual National Library Week celebration is coming! Join us for free cake and ice cream outside the 1st floor entrance of the library on Monday, April 15, from Answer trivia questions and win great prizes! Also in celebration of National Library Week, the top finalists in our Student Book Collection Contest will have their collections on display on Thursday, April 18, from 3: She will give an open reading at 4: Kasischke is the author of eight novels, two of which have been made into feature films â€” The Life Before Her Eyes and Suspicious River. She has just published her first collection of short fiction, If a Stranger Approaches You. The books are now on display at the 2nd floor entrance to the library. The Bookshelf is not intended to be a comprehensive study of Islam as a religion or of the Muslim world in all its complexity. Rather, it seeks to introduce readers to some new and diverse perspectives on the people, places, histories, beliefs, practices and cultures of Muslims in this country and around the world. Special thanks to Dr. David Nichols, Philosophy Dept. New Online Journals Available in January Zahnow Library is adding a significant amount of high-quality online journal content to the collection for students and faculty this month. Journal of Great Lakes Research â€” A new subscription will provide online access to the most current five years. Nature â€” A new subscription will provide online access to the most current five years. Additional access through other vendors will continue to provide access to issues back to Science â€” A new subscription will provide online access to issues from to the current issue. Sage Premier Package â€” Including an interdisciplinary selection of over journals, this package provides access to over , full-text articles. Access includes issues from to the current issue. For a title list, please click here. By ending access to little-used titles and collaborating with our academic library colleagues for group purchase pricing, the library is able to provide these new materials while staying within its current acquisitions budget.

### Chapter 6 : BibMe: Free Bibliography & Citation Maker - MLA, APA, Chicago, Harvard

*By the start of the fall semester, the Student Technology Center, Math/Physics Resource Center, Biology/Chemistry tutoring, and the Tutoring for Academic Progress program will come together in one place on the 2nd floor of the Library to form the Center for Academic Achievement.*

Sneed , was a Methodist minister and educator in Texas. She later attended five different high schools, including one in Ghana , [23] graduating from Charles E. At one time she aspired to be a classical pianist. During her summers, she worked as a secretary for Kelly Services. When she married in , she and her husband moved to Bologna , Italy , where he was doing graduate work; [27] there she did English tutoring to Italian businessmen. Walter Hewlett the son of company co-founder William Hewlett was a source of particularly strong opposition. Condit , [57] George A. Keyworth, II , [58] and Robert Knowling. The industry soon fell into decline, leading to further difficulties for the company. In , Fiorina said: What I knew at the time was our nation had been attacked. Fiorina instituted three major changes shortly after her arrival: In addition, Apple began selling its own iPods through the same retail channels. And he lost nothing Backfire, [] by Peter Burrows, and Perfect Enough: We help companies take excess inventory and then distribute that excess inventory to 37, vetted charities around this country. A spokeswoman commented that "Fiorina and her staff believed the foundation was not required to file with the IRS because it accepted no outside contributions and donated only her personal wealth to worthy causes. In early , she was referred to in media sources as a potential vice presidential candidate, [] [] and The New York Times noted that while she did not want to run, she was an executive who could possibly become a candidate for president. She was reportedly a "point person" for the McCain campaign on issues related to business and economic affairs. Running a corporation is a different set of things. Rothenberg concluded that Fiorina was "like a dream come true" for Democratic opposition researchers. Senate candidacy for California, Main article: On November 4, , Fiorina formally announced her candidacy in the Senate election in a bid to unseat incumbent Democrat Barbara Boxer. You know, people die for the right to vote. And there are many, many Californians and Americans who exercise that civic duty on a regular basis. The stated mission of the organization was " Fiorina ruled out running for the U. Senate in , [] but refused to rule out running for president in or Governor of California in Her business background and status as the only CEO and the only woman in a "sea of suited men" were mentioned as positives, with Republican strategists pointing to her disastrous Senate campaign, unpaid campaign debt and dismissal from HP as "considerable challenges".

## Chapter 7 : Vampire - Wikipedia

*Times Higher Education* has recognized MIT as one of the world's "six super brands" on its World Reputation Rankings, along with Berkeley, Cambridge, Harvard, Oxford and Stanford. In , the Times Higher Education World University Rankings rated MIT the #2 university for arts and humanities.

We do this for example by making our software, AbiWord being our flagship product, available on as many operating systems as possible, and adapting it for use on the One Laptop Per Child system. The Adium project is a loosely organized group of volunteers that handles almost everything related to developing, distributing, and supporting the application. It runs on any Java platform and is available in ten languages. Code generation and reverse engineering is provided for various programming languages. A plugin architecture allows this as well as other features of the product to be extended by developers outside of the core development team. Work is in progress in many areas of the project including upgrade to UML2. The Apache projects are characterized by a collaborative, consensus based development process, an open and pragmatic software license, and a desire to create high quality software that leads the way in its field. We consider ourselves not simply a group of projects sharing a server, but rather a community of developers and users. Tharindu Mathew, mentored by Alexei Y. New BSD license atheme. Audacity is widely used, with around 15 million downloads in the past year from Sourceforge <https://sourceforge.net/projects/audacity/>: Audacity has been featured widely in the media, including CNN. Audacity is a flagship application of the wxWidgets <http://www.wxwidgets.org/>: Care has been taken to make Audacity work with screen readers for visually impaired users. Audacity has been translated into almost 30 languages, and nearly half of Audacity users use it in a language other than English. Perhaps most importantly, Audacity has a large and vibrant developer community. There are no full-time developers, but about a dozen team members who have been with the project for several years act as the leaders of the community, setting the direction and coordinating releases, but many contributions come from the dozens of other developers who have contributed small features, bug fixes, or other patches, and hundreds of other developers who participate on the mailing lists and help test and track down bugs. In addition, dozens of volunteers help with documentation, technical support, language translation, community support, and more. Mozilla Public License 1. Its vision is to be the most creative, trusted organisation in the world. Kamaelia is a research tool for producing anything from PVRs, collaborative whiteboards, games through to streaming servers making parallelism simple through a component approach. Dirac is a next generation wavelet based video codec. The BBC also has a number of other open source projects - which can be found at <http://www.bbc.co.uk/opensource/>: The more code that is multicore friendly, the easier we make it for everyone. We are as interested in experienced students as we are in experienced. It is flexible, efficient and uses a modular implementation. It has many interesting features such as: Boost Software License 1. Boost libraries are intended to be widely useful and usable across a broad spectrum of applications. The Boost license encourages both commercial and non-commercial use. We aim to establish "existing practice" and provide reference implementations so that Boost libraries are suitable for eventual standardization. More Boost libraries are proposed for the upcoming TR2. We have about a half-dozen core developers that are active on a daily basis with the project and several dozen community contributors, modelers, artists, and engineers. Our developers predominantly interact over IRC and through our various mailing lists. The BRL-CAD package is a powerful cross-platform open source solid modeling system that includes interactive solid geometry editing, ray-tracing support for rendering and geometric analysis, image and signal-processing tools, system performance analysis tools, a robust high-performance geometry engine, and much more. Currently standing at more than a million lines of code, utilities, and hundreds of man-hours investment, BRL-CAD has more than 20 years of development history since and is in production use by more than organizations around the world this was our last statistic before we went open source and became untraceable. Ohloh is a site that tracks the commit activity for more than 12, open source repositories performing in-depth historical analyses and commit tracking. When they reviewed the project histories for all projects in their

## DOWNLOAD PDF SAGE, PILOT SCIENTIFIC WORLD LEADERS, HUMAN TUTOR FANGRUIDA CLASSIC STUDY OF THE TIMES

database, BRL-CAD came in as the oldest project that has had continuous uninterrupted activity even edging out Emacs and GCC: The BRL-CAD user-base is primarily composed of individuals in the CAD industry where the modeling requirements are fundamentally different to those of content modelers e. It is one of the most successful and sustained cross-platform open source games ever with an active developer, administrative, and player community. There have been more than a million downloads in the last five years alone and our user base presently consists of more than players online at any time of day or night. The project has actually become more popular over the years as we continue to improve and enhance the game. BZFlag has been under active development since Our organization is presently comprised of a rather disparate group of individuals that work on BZFlag because they love the game and the community that surrounds it. Additionally, there are several dozen trusted staffers, server operators, and graphic artists that assist in the day-to-day operations needed by the game for keeping servers up and running, providing server list services, designing artwork, providing network statistics, image hosting, web hosting, and much more. All of our project developers almost exclusively collaborate on the bzflag Freenode IRC channel, which is the central hub for most of our development discussions, decision planning meetings, game operations, and network infrastructure administration. We operate via a benevolent dictatorship combined with a meritocracy that strives for consensus between the core developers and other involved community members. These discussions also include considerations whenever there are new features being added such as new flags, enhanced graphics, or changes to the gameplay. We also serve as a support arm to our user community assisting them with anything from how to get started playing to providing assistance with setting up their own server or even helping them write their own new extensions to the game. From IRC, we administer network operations for the approximate registered player base and for the tens of thousands of unregistered players that engage in more than daily player sessions across more than public servers. As we are a globally distributed network-oriented game, we also maintain the public server listings, provide player tracking, network statistics, global authentication, user and group management, abuse and ban controls, player conflict resolution, competitive league management, and user community support. Both portions of the mission are strongly supported by our technology, including machine-readable representations of the licenses. Through our open source donation engine called DonorTrust, we connect donors with on-the-ground implementing partners to add transparency and feedback to the development process. DonorTrust helps people to see that their choices impact the world. Our technology also allows people to give what amounts to an online gift card, which recipients can use to support development projects. Because DonorTrust is open-source, the development of this engine will help many NGOs to more effectively raise money for their good causes. It offers a conceptual metamodel as well as many different tools for that particular domain. One of its most relevant features is the availability of a visual building dataflow application that allows to develop rapid prototypes without writing code. The framework just published its release 1. We believe in open source as a pragmatic approach to software development, and all our projects are business-friendly in terms of licensing. Enjoy your stay at the haus! Founded 3 years ago with a rich background in Linux distributions, open source and embedded systems, and a lot of fun moving OSS ahead. Coreboot is an Open Source firmware BIOS implementation that starts your computer in almost no time while leaving you the full control over your hardware. Just suggest an idea or choose one from the list. Participating faculty represent nearly every college of the University. The Center is based on the recognition that many different kinds of systems which include self-regulation, feedback or adaptation in their dynamics, may have a common underlying structure despite their apparent differences. Moreover, these deep structural similarities can be exploited to transfer methods of analysis and understanding from one field to another. In addition to developing deeper understandings of specific systems, interdisciplinary approaches should help elucidate the general structure and behavior of complex systems, and move us toward a deeper appreciation of the general nature of such systems. Projects Gridsweep Improvements and Analytic Tools. An operating system is the set of basic programs and utilities that make your computer run. Krafft cran2deb by charles blundell, mentored by Dirk Eddelbuettel Jigdo-Ivory:
