

Chapter 1 : SAP Practical, SAP Certification and Online Practice Exam

SAP PM (Plant Maintenance) is a functional module which handles the maintaining of equipments and Enables efficient planning of production and generation schedules and provides interfaces to process control and SCADA calendrierdelascience.com R/3 Plant Maintenance (PM) application component provides you with a comprehensive software solution for all maintenance activities that are performed within a company.

Recently we announced C4C certification. The details are in this blog. I just took my first test, the C4C I will take the C4C10 in another month or so – I still need to study! Here is my experience. I hope it helps you prepare. When you sign up, all times are UTC. I signed up for 1 PM, went to take the test, and it said I was a no-show. Fortunately I was not penalized for this mistake. I just got a new appointment and ensured I entered it in UTC time. This includes downloading some software and launching a mock test. For me, the download of the software worked fine, but the launch of the mock test resulted in an error and then locked up my machine. I tried several times. Even though this failed, I could still launch the test. Then the proctor comes. There is a chat window and he ensures he can hear you while you take the test. He provides various rules, you must show a photo ID in the web cam. You also must take your laptop and move it around the room so the proctor can see all your surroundings. All of this takes a few minutes, then you get the OK to start. When working on the test, I was reading the questions to myself, I guess kind of lip-syncing them. He told me that is reading aloud and I cannot do that. I moved the window around when it interfered with reading a test question. On the test itself, you can mark questions you are unsure of to review later. You can also change the font size and the contrast. I was a little uncomfortable with the proctor there, but understand why it is needed. In regards to the C4C50 test, I passed! OK, so maybe I was involved some in the authoring of the test, but some of the questions were still a little tough! All of the questions come from the C4C50 course material. We will also offer delta tests so you can take the core test once and then just take delta tests to keep your certification updated. The core test is 80 questions, the delta tests are 40 questions. The C4C10 will be harder for me – but you get 3 times to pass it! The C4C30 test –hmm– maybe sometime next year!

Chapter 2 : Sap Pm Certification

SAP PM Certification FAQ (Frequently Asked Questions) is an archive of the most frequently asked questions that are related to SAP Certification. We collected them in one place and provided answers for every question, so that people do not need to ask the same question again and again at SAP-related forums.
