Reviews 7 Description Clive James Clynick is the author of some 18 previous detecting books and numerous articles. What Makes a Top Pro? Beginner or Seasoned Detectorist this is an essential read for one and all! I told scott go hit that spot.. Sure enough he scored a nice old gold. Every Gold target you find has valuable information to tell. What levels were needed to expose it, was it lost at this spot or moved by current? All this information points you toward the next find. Great book and a must have. Rated 5 out of 5 Clive Clive has several excellent books on metal detecting, add this title is one of the must haves! Site reading, grades, hunt strategies, and coil control are all well explained. Maybe just as importantly, it gives the reader a personal look into the mindset of a couple of true pro beach hunters with a lot of experience. Very useful information in my opinion. As always I received the book in a timely manner after ordering. Secrets of the Pros Volume II. From the first few pages I noticed very quickly Clive begins to entice the reader down the proverbial rabbit hole into the world of water hunting with a well structured and reader friendly format to follow. The underlining tone throughout the entire book is truly to teach or improve the readers skills to become a proficient water hunter. For a page book he covers an impressive amount of topics on detectors, reading beaches in depth equipment observations and safety in and out of the water. Along the way you will notice Clive weaves in and out personal detecting stories which are very intriguing, inspiring and at times very comical. I personally love this because Im a visual learner and some of the personal diagrams throughout the pages are excellent. Along with the wonderful pictures and great stories in this book my favorite part is definitely concerning one of my favorite Pro Hunters Roland Dalcourt whom we affectionately call the king of the Caribbean. Roland is definitely one of the most proficient Water Hunters on the planet, a true gentleman and friend. Anyone who knows Roland or has had the opportunity to hunt with him knows his experience and techniques in Caribbean waters is second to none. In conclusion I would highly suggest reading the book from front to back if you are interested in the hobby or at least to enjoy some of the fascinating stories Clive takes us on. Informative well-articulated and fascinating! Any seasoned pro or beginner this is a must read!
