

Small town life can be more complicated than one might think, and Serendipity Green is a testimony to that fact. Of course, what makes life complicated is always those who live it, and the people who live in Tuttwyler, Ohio, are quirky, complicated, funny/odd, endearing, frustrating, nutz and oh-s0-real.

Gazebo dripping with gingerbread. Leafy streets lined with big white houses. William Aitchbone is chairman of the Squaw Days Committee. You can bet on that! But Bill Aitchbone has to tread carefully. Howie, after all, is the illegitimate son of local war hero Artie Brown. Howie finally does paint his house. But not white like all the others. He paints it the most obnoxious shade of green imaginable. Before going off the deep end, he created different shades of black! Determined to make "Serendipity Green" the most popular color ever. It is irreverent and iconoclastic and simply irresistible. Customer Book Reviews Very funny, but thoughtful book A Customer on Nov 03, It is magical when you have a book that is both funny and thought provoking at the same time. The funny-side of the surface is easy to see: But more importantly, the little town in Ohio is just a symbol of the whole world. Levandoski parodies the way we all try to give our lives bigger meanings by giving little petty things more importance than they really deserve. You can laugh at the pettiness and weirdness of the characters in this small town, but when you look more carefully you see that you know many people like them and we also do some of the things that they do! We are really them, with their foolishness and snobbishness, etc, etc. The Persian psychiatrist is hilarious. He is caught between two irreconcilable worlds and he must have his head examined, regularly, if possible! But, he might also be right thinking that our angst is all due to the fact that America is still a very young and naive country. I strongly recommend this funny, funny book. It can be read quickly and you cannot put it down. Enjoy it since this sort of book only comes once in a long while! This is a great book. It rings true on small-town life, politics, and "civil engagement" with a blend of humor both subtle and broad. While insightful, the examination of life in the small town is not mean or benevolent. Some of the chief players at first look familiar--the sluggish town handyman, a truth-seeking librarian, the self-absorbed politician. But as the story unfolds, they are revealed to be anything but simple. The story moves along rapidly, full of the kind of bizzare happenings that define a "normal" American community. This is a funny, interesting book, definitely worth your time. The characters were fully-developed and sympathetic, and the plot zany but somehow believable. I look forward to reading Mr. The book is full of typos. The author should take his business elsewhere, and the Permanent Press should be ashamed and hire an editor! By the way, the Press has a website but no e-mail address. Teaches us how to write! As for "Serendipity Green," the prose is charming, the pacing is smooth, the humor is ironic without being forced or contrived, and his characters come so alive that they leap off the page. My favorite character is the Iranian psychiatrist, who, though not the central character, gives the reader a brilliant turn. In sum, "Serendipity Green" is a joy to read and a must for any serious observer of American popular culture. A witty, imaginative, enjoyable satirical romp. Slope, and the odd couple of Howie Dornick and Katherine Hardihood, two painfully plain middle-aged wallflowers who find each other through their mutual loathing of D. The end, as a result, seems rushed and not quite all it could be. Up to that point, however, the book is a delight, and Serendipity Green is still must reading for anyone who likes a good, funny book that is ever so lightly tinged with arsenic. A fast-paced satire on small-town life By Jeffrey Jotz on Sep 06, Set in a Mayberry-like midwestern small town that was rapidly transforming or deteriorating as some may argue under the pressures of suburban sprawl, Levandoski gleefully skewers historical preservationists, local politicians, New York artsy types, and others with his humorous and easy-to-follow writing style. The author creates a wonderfully rich parade of colorful characters who come together with edginess, satire and, of course, some pretty zany antics. I spent time in the heat of local politics, and Levandoski masterfully captures the petty arguing, ego trips and power brokering that goes on in town halls across the nation. It is the strongest element of his book. The book kept my wife and I talking for days about the plot developments and who we would cast as each character if we were making this book into a film! Having grown up in a town like Tuttwyler, I feel as though I knew each of these characters, and they all rang true. You will never look at anything green again without thinking of

Serendipity Green. I may use the recipe and see if I can come up with the color! Levandoski weaves another Heartland gothic masterpiece! A Customer on May 13, Levandoski has noisily dashed into the pantheon of great modern American novelists, manifest in his latest taking of the pulse of the Heartland. His characters are singularly striking, his dialogue is piquant and his narration drips with irreverent irony and delicious description. Levandoski is a genius! Great for reading oneself to sleep on Kindle. I agree the proofreading leaves much to be desired, though I have seen worse.
