To fix, uninstall Chrome then download Chrome again from google. Learn more about programs that cause unwanted settings changes. Chrome reset my browser settings Sometimes, programs that you install can change your Chrome settings without you knowing. For your safety, the browser checks if your settings have been changed every time you launch Chrome. Settings that might automatically get reset:

Chapter 3 : How to disable Chrome's PDF viewer - CNET

Choose Open a Specific Page or Set of Pages under On Startup and click Set Pages. Enter the URLs for the websites that you want to open when you start Chrome in the dialogue box and click OK.

Then select the basic settings for the type of originals you are scanning and select the destination setting for the way you will use your images. See one of these sections for instructions. **Selecting Basic Settings Note:** To change the scan mode, see **Changing the Scan Mode for documents and photos** or **Changing the Scan Mode for film and slides**. Click the **Preview** button to preview your images, then select your scan area. **Previewing and Adjusting the Scan Area** When you are finished selecting settings and previewing, click the **Scan** button. The **File Save Settings** window appears. Select **PDF** as the **Type** setting. If you need to change any of the current PDF settings, click the **Options** button. Select the settings that match your document and click **OK**. You return to the **File Save Settings** window. When you are finished selecting file settings, click **OK**. Epson Scan scans your page and displays this window. If you are scanning multiple pages, click **Add Page**, replace the first page on the document table with the second page, and click **Scan**. Repeat this step for each page in your document. When you are finished, click **Edit Page** and go to step You see the **Editing Page** window displaying thumbnail images of each scanned page. You can use the tools below the main window to select, rotate, reorder, and delete pages in your document. Click the **Help** button for details. If you want to include all the document pages in your PDF file as they currently look, go to step If you do not need to include some of the pages, click the **odd pages** or **even pages** icons, or click the individual pages you do not need. Then click the **delete** icon to delete them. If you want to rotate pages, click the **pages** or use the **odd pages**, **all pages** icon to select the pages. Then click the **left** or **right rotate** icon to rotate them. The **delete** icon is not available when all document pages are selected. When you have finished editing your document pages, click **OK**. Click **Close** to exit Epson Scan.

DOWNLOAD PDF SETTING TO MAKE UMENTS OPEN IN CHROME

Chapter 4 : how can i stop my cursor from jumping around when i type? - Microsoft Community

Click on "Settings" and you'll see a new page pop up in your Chrome browser window. Scroll down to Advanced Settings, find the Downloads group, and clear your Auto Open options. Next time you download an item, it will be saved instead of opened automatically.

Step 2 If you are using touchpad, try reducing the Touchpad sensitivity and check 1. Click on the "Start" icon in the lower left corner of the screen. From that screen, choose "Mouse Pointers. Select the "Buttons" tab at the top of the dialog box that opens. This shows the type of touchpad device installed on your laptop. Set the touchpad for right or left-handed use from this dialog box. You can adjust the double click speed of your computer as well. When you finish making any changes, click "Apply. Pick the "Device Settings" tab from the dialog box now. You can see the touchpad for your Vista machine highlighted on this screen. Read the information provided in the next dialog box. It gives you options for tapping your touchpad, using the buttons, scrolling, pointer motion and sensitivity. Make any changes you want from the various topics. When you make a change, click "Apply. Do some work on your computer for a while, If the touchpad is still too sensitive, return to the "Mouse" menu and continue to adjust the settings until you get them just the way you want them. Step 3 If the issue persists try to perform a clean boot and check whether the issue is still persists. Follow the steps mentioned in the article given below. How to configure Windows Vista to start in a "clean boot": Once the troubleshooting is over, reset the computer to start as usual. Also I would suggest you to keep in touch with mouse manufacturer Hope this information is helpful.
