Writing clearly is thinking clearly. Her constant fudging of consensus reality is typical of New Age thought. If one wanted to use tarot for divination, it would be necessary to assign clear meanings to each card. She provides rambling stream of consciousness. Kennedy was assassinated while traveling in a limo! The Chariot might signify destruction because Shiva destroys the world while conducting a chariot. The Chariot could signify lingams, or yonis. But you know Freud relates horses to the libido. So maybe this card is all about sex! What would Jung say? Maybe the Chariot is about the Jungian persona. Only humans possess language although we have taught chimps to communicate! An image of salamanders with their tails in their mouths means one thing on one card and a completely different thing on another card. At every turn, Pollack tosses out random, undeveloped references to material conventionally assumed to be "deep" and "profound": Pollack repeats urban legends, for example the widely believed but false notion that full moons increase criminal activity. No, it does not. Rather, they are part of the received dogma of New Age thought. Christianity is an oppressive, totalitarian, violent, misogynist, destructive system. Before the evil Christians showed up, people around the world enjoyed peaceful goddess worship. All over the world, once a year, priestesses representing the goddess would kill and dismember the male leader of the tribe. All religions have at their core the same truth: None of the above postulates are true. In spite of their falsity, Many New Agers uphold them as dogma. Pollack has a problem with masculinity and "patriarchal society. The Emperor card represents the best in essential masculinity. Pollack reads it as a negative card referencing "force, aggression and war" an old, stiff, rigid, lifeless, barren scene, society and its laws, people who have never realized that their father is just a human being, people who surrender control of their lives to their lovers. Compare this to her reading of the Queen of Cups, depicting an emotional and spiritual woman. Most interpretations acknowledge that this woman has her failings; she can be overcome by her heart. Pollack, though, reads this feminine card as almost all positive, while reading the male Knight of Cups and King of Cups as almost all negative. Again and again, Pollack insists that the pinnacle of the Tarot is to become a hermaphrodite. This is not true tarot is a powerfully and traditionally gendered system depicting nurturing, maternal females and active, horse-riding and sword-wielding males. But Pollack herself identifies as a transsexual. I am transsexual; therefore, everyone else should aspire to be a hermaphrodite. Forget the church; rather, read comic books for your spiritual guidance. Pollack is a comic book author. Schizophrenics are misunderstood by rigid, Christian society. Schizophrenics are really shamans. The Christian church crushed women. Tarot cards are rife with Christian symbols. One example on a card Pollack mentions frequently: This card represents the pinnacle of success and satisfaction. It depicts a central figure surrounded by a victory wreath and four animals: The World card is based on a very common Christian motif: The four animals in the corners of the image symbolize Matthew, Mark, Luke, and John, the authors of the four Gospels. You would think that a book that purports to explain tarot would mention the very close relationship between the World card and the Christ in Majesty motif. Like a Soviet-era photographer, she merely airbrushes out of her revisionist history anything that does not suit her purpose. Pollack tells us that all religions have as their goal each person transcending himself through his own effort, and uniting with an impersonal New Age super-soul. Differences between religions can be fudged in order to create the new Rachel Pollack church. Hinduism justifies suffering with the concept of reincarnation. You do a bad thing in your past life; you are reincarnated as an untouchable, and you are treated badly. This is just like the Christian concept of the Holy Spirit, Pollack insists, bizarrely. Paul meeting Christ on the road to Damascus is just like Buddha achieving enlightenment. One of the most well-recognized lines from the New Testament states, "Behold a pale horse; his name that sat on him was

It is the spread after that which fascinated me. It begins with a small cross of two cards and continues with seven more cards placed in a line below it. This is also presented with a sample reading - and is well worth studying! She has had articles appear in the and Llewellyn Tarot Reader. This woman, I thought, must know her Sephira inside out. So I must admit, my expectations were rather high. As an academic and someone who has studied the same topics Pollack engages - depth psychology, mythology, world religions etcetera - I found the content lacking and far from in depth. Pollack frequently laces her commentary with sweeping generalizations or random facts about the human condition without contextualizing them nor addressing their deep complexity. However, the watering down of complex spiritual and psychological issues is something of a disappointment. Despite this, the book does have many strengths. For all its oversimplicity, Pollack does not fall into the trap of writing in an airy-fairy touchy-feely manner that plagues many a pseudo psychological text about "new age" topics. She takes the reader through the esoteric symbols of each card in the Rider Waite deck, explains them clearly and grounds them with practical examples. This works best with the minor arcana, in which she is more focused in her writing and does not dabble so much in other systems like depth psychology. Pollack also makes many notable card comparisons, and is a keen observer of structures and relationships - something that is often lacking in many tarot books. Her sample readings are also great tutorials, especially for beginners. The last section of the text devoted to learning to read tarot spreads is probably the strongest part of the book and filled with insightful, personal observations. Overall, I have mixed feelings about this book. Although it may be established as a "Tarot Bible", I feel it is too shallow for serious study or more advanced students. A former moderator of the Astrology forum at Aeclectic Tarot, Isthmus has studied tarot and other esoteric systems since This appears to be a reprint of the version by Element, a Harper Collins imprint. The Major and Minor Arcana have been compiled in one volume originally they were in separate volumes , revised and updated, with a new preface. Rachel brings with her the wisdom of years of scholarly, as well as hands on, research. In this book are presented the many layers that is Tarot: In her new as of preface, Rachel speaks about her introduction to the Tarot, and the individuals that she saw taking the Tarot in new directions such as Mary Greer, James Wanless, Angeles Arrien, Gail Fairfield. In her introduction, Rachel talks about the history of Tarot, as well as individual cards, and what their symbolism might imply. Amongst other things, one comment stood out: Above all, Rachel leaves us with things to think about! Also discussed was the move from Marseille style cards with plain pips , to what is now considered a traditional style of illustrating the pips, brought into vogue by A. Waite and Pamela Coleman Smith. There is a significant chapter in this book entitled the Four Card Pattern. Arranged in a diamond pattern, with the Fool on top, the World on the bottom, the Magician on the left hand side, and the High Priestess on the right hand side. The horizontal line then shows a duality of opposites, while the vertical line shows a sense of unity. The three rows embody our journey through life. There is an in-depth presentation of the suits, Pips numbered cards and Court Cards.
