

Chapter 1 : Sew Smart | Central Wisconsin's Largest Creative Sewing Center!

Welcome to Sew Smart Fabrics. We have been in the wholesale/retail fabric business since based out of Scranton, PA. We provide high quality fabrics for all kind of usage: interior design, textiles, upholstery, crafts, etc.

And with Easter coming early in the calendar only a few weeks away I thought it would be a good time to share this easy fabric Easter basket and fabric eggs tutorial. This tutorial was written last year for the Riley Blake Design Team and this year I am finally posting the full version here. The fabric requirements for this project are: This will reduce bulk in the seams as you assemble the basket. Following manufacturers instructions, adhere the Fusible Fleece to the wrong side of the exterior fabrics and the Shape Flex to the wrong side of the lining fabric. This is optional, but I added some simple quilting lines to the exterior pieces after the Fusible Fleece had been adhered, just to give the bag some texture and to add to the patchwork look. Pin two exterior pieces and two lining pieces right sides together. See black lines Press all seams open. To create a box-bottom for the basket bring the two edges of the notched squares together. Match up seam allowances to keep bottom square and pin edges together. Turn exterior piece right-sides-out and place inside the lining piece. Start by matching up seams and pin two layers, right sides together, all the way around the basket. Leave a gap there and sew again around to the original side. Pull bag exterior right-sides-out through the bottom corner left open in the lining. To close this corner, tuck edges in, pin and top-stitch the opening closed. By pulling through the corner, the bottom of the basket looks neater. Tuck lining inside the basket exterior and use an iron to give the basket a good press and help shaping it. Pin all around the edges make sure the seam is not rolled inside the two layers and top stitch all the way around the top edge of the basket, leaving an opening again where the handles will be inserted. Fuse Shape Flex to the back side of the two handle pieces and sew both long sides together. Turn right-sides out, press well, and top-stitch along both sides to give the handle a more finished look. Carefully trim away bottom corners to make handle easier to insert. Insert one end of the handle about an inch down inside the opening for the handle. Finish top-stitching over the handle to secure it in place. If you plan to carry heavy things in the basket, make sure the handle is extra secure. Insert other end of the handle on opposite side and repeat to finish the basket. When the handle is finished, the basket will have a kind of rounded appearance see top basket in photo. I personally like it because it gives the basket a little more shape. Just pinch the two sides together at each corner and whip-stitch a few stitches at the corner to pinch those sides together. Use a coordinating thread to camouflage the stitches. Repeat at all four corners. This will give the basket a little more of a box-y look. I also made a bunch of fabric eggs to go in my baskets. Her eggs are so pretty. I think I might make a bunch more this year. Wiltshire Daisy is also available right now from Craftsy. I hope you enjoy this fun little project to get ready for Spring and Easter!
