This Spelling Power workbook provides the practice you need to improve your spelling and The Negative Prefix in-. Each spelling lesson focuses on a single spelling pattern or concept that applies to a list of words in a Word Bank. If you have trouble with an exercise, you can always go back to the Word Bank and Key Concepts discussion, review the material, and then return to the exercise. You can keep track of your own progress and achievement in spelling by using the Student Progress Chart, which appears on page v. After you know your score, use the Scoring Scale on pages viâ€™vii to figure your percentage. Then mark your score or percentage correct on the Student Progress Chart. Share your Progress Chart with your parents or guardians as your teacher directs. Reviews are solely the opinions of the contributor. Links to the publisher website above may contain affiliate links. It was very easy to learn. I enjoy not having to battle or coax them into taking their spelling tests or doing their study activities. They typically want to start their day with Spelling Power! Lots of pre-reading for teacher, but not really too overwhelming Grades Used: The pre-reading for me seemed a little daunting at first, but once I did it I am glad I did. I love the 10 steps to study a word. My son is very good at spelling and I liked that the placement tests tell about what grade level your child is spelling at. However if he was weak at spelling; we would spend more time with the activities to help make it a little more fun. As it is, I use the activities with very simple words my kindergarten daughter is learning. Overall; this book is excellent. It is not as fun as some subjects, but we never spend more than 15 minutes a day doing spelling. It pays off when I see his writing improve because he is using words well above grade level and they are spelled correctly! It may be slow getting the program off the ground. It has been an excellent program. I plan to continue using it it with all my children through future years. My family has to budget our books carefully. This book is valuable considering that I can use it with all my children at all grades. My two sons are very different learners in style and age and this book has worked for both of them. Although, it is a large book and takes some time to read and prepare for, once I had done that our spelling lessons took off and I saw that it was really easy after all. It has something for everyone. If they know how to spell the word it comes off of their list, and if they miss a word in their other work, we just pencil it onto their list. I highly recommend it! After a year of thinking it was my DD, I finally decided it was the program. Quick and easy to use, can be used for all kids at all levels Cons: Time consuming to read the manual to get started Grades Used: The value is that you can use this resource year after year, grade after grade. My younger son loves the 10 Steps because of the multisensory approach. Mastering a level gives the student a sense of accomplishment and the teacher sees real progress. Very pleased with this program. It focuses on really learning how to spell and retain the information. This year they are at different levels and they are moving at their own pace. The one has moved through an entire level in 10 weeks and the other is about half way through but she is remembering how to spell the words. I have built in some additional reviews just to make sure they are remembering. Sometimes we do a spelling bee where I use words they have missed each from their own list. Sometimes, I have done an additional test on words missed in the last week. I generally on Monday will test every word missed the previous week. This extra step helps ensure they are remembering. If a child only misses 5 out of 18, they practice those they missed. Why practice over and over the ones you know! Only 1 book to buy for all grades! Has extra activities to bring spelling alive and fun. Easy to understand and use! My kids love it! It covers all types of learners. From your visual to tangible! Spelling is my 7th graders favorite subject now. She loves how it is set up and how hands on it can be. She would like to do more activities to make it last longer. We retake to placement test each year to see where they are. She gets so excited when she moves up a level. I know that other people think this program makes it hard if you have more than one kid. I personally think that it makes it easier the more kids that you have. Corresponding lists on different levels all work on the same rule. You can teach one rule to everyone and then have appropriate lists for each age. I needed something that allowed my kids to work more independently. Also, I had boys who were great spellers and I never could find their correct level. I switched to Spelling Workout and MCP Phonics, and found that my kids enjoyed this more, felt there was a beginning and an end to a lesson, and enjoyed being independent in their work. We only test words that we misspelled in the activity. Spelling Power is just very difficult to use if you are schooling more than kids. Contains lists of words that can be used from early grade school through high school Cons: Can be boring and repetitive if you use the book the way it is designed. My girls loved taking the spelling tests to see what grade level they were

at. It can be used from early grade school through high school. The word lists are extensive, and the test are easy to administer and take. I consider this a very valuable resource. This is one book that you can use for many years. Lots of challenging words that are grouped by spelling rule. I like the fact that I have purchased one book that I can use for both kids throughout their lower school and middle school years. I like it is one book and you do not have to buy another book year after year. Your child learns a lot of words which is very useful. Some of the rules are a bit silly and can be changed at your own discretion for your child. If you want it to be fun you have to be creative.
