Chicago is the third-most populous city in the United States. Chicago's culture includes the arts, novels, film, theater, especially improvisational comedy. Chicago also has sports teams in each of the major professional leagues. The city has many nicknames, the best-known being the Windy City, the name Chicago is derived from a French rendering of the Native American word shikaakwa, known to botanists as *Allium tricoccum*, from the Miami-Illinois language. The first known reference to the site of the current city of Chicago as Checagou was by Robert de LaSalle around 1674 in a memoir, Henri Joutel, in his journal of 1674, noted that the wild garlic, called chicagoua, grew abundantly in the area. In the mid-18th century, the area was inhabited by a Native American tribe known as the Potawatomi, the first known non-indigenous permanent settler in Chicago was Jean Baptiste Point du Sable. Du Sable was of African and French descent and arrived in the 1790s and he is commonly known as the Founder of Chicago. The Potawatomi were forcibly removed from their land after the Treaty of Chicago in 1803, on August 12, the Town of Chicago was organized with a population of about 400. Within seven years it grew to more than 4,000 people, on June 15, the first public land sales began with Edmund Dick Taylor as U.S. The City of Chicago was incorporated on Saturday, March 4, as the site of the Chicago Portage, the city became an important transportation hub between the eastern and western United States. Chicago's first railway, Galena and Chicago Union Railroad, and the Illinois, the canal allowed steamboats and sailing ships on the Great Lakes to connect to the Mississippi River. A flourishing economy brought residents from rural communities and immigrants from abroad, manufacturing and retail and finance sectors became dominant, influencing the American economy. The Chicago Board of Trade listed the first ever standardized exchange traded forward contracts and these issues also helped propel another Illinoisan, Abraham Lincoln, to the national stage. The town was founded in 1837, and named for Isaac Newton Van Nuys and it was annexed by Los Angeles on May 22, 1908, after completion of the Los Angeles Aqueduct, providing it with the water required for further growth. Van Nuys was the first new stop on the San Fernando Line of the Pacific Electric Railway red cars system, which boosted its early land sales and commercial success. Some area residents had presented a petition and several original deeds that stated Sherman Oaks to Braude and they argued that the area was originally a part of Sherman Oaks until the 1950s, when ZIP codes labeling the area as Van Nuys were established. In the median age for residents was 28, considered young for city and county neighborhoods, the neighborhood was considered moderately diverse ethnically within Los Angeles. Actor – An actor is a person who portrays a character in a performance. Simplistically speaking, the person denominated actor or actress is someone beautiful who plays important characters, the actor performs in the flesh in the traditional medium of the theatre, or in modern mediums such as film, radio, and television. Interpretation occurs even when the actor is playing themselves, as in forms of experimental performance art, or, more commonly, to act, is to create. Formerly, in societies, only men could become actors. When used for the stage, women played the roles of prepubescent boys. The etymology is a derivation from actor with *ess* added. However, when referring to more than one performer, of both sexes, actor is preferred as a term for male performers. Actor is also used before the name of a performer as a gender-specific term. Within the profession, the re-adoption of the term dates to the 1970s. As Whoopi Goldberg put it in an interview with the paper, "I can play anything." In 1982, the *Los Angeles Times* stated that Actress remains the term used in major acting awards given to female recipients. However, player remains in use in the theatre, often incorporated into the name of a group or company, such as the American Players. Also, actors in improvisational theatre may be referred to as players, prior to Thespis act, Grecian stories were only expressed in song, dance, and in third person narrative. In honor of Thespis, actors are commonly called Thespians, the exclusively male actors in the theatre of ancient Greece performed in three types of drama, tragedy, comedy, and the satyr play. Western theatre developed and expanded considerably under the Romans, as the Western Roman Empire fell into decay through the 4th and 5th centuries, the seat of Roman power shifted to Constantinople and the Byzantine Empire. Records show that mime, pantomime, scenes or recitations from tragedies and comedies, dances, from the 5th century, Western Europe was plunged into a period of general disorder.

Andante con moto Rondo: Quasi lento Presto ma non troppo Falla: Csardas Program subject to change About the

Program Beethoven In his adopted city he studied with Haydn and Salieri among others and quickly established a reputation as a virtuoso pianist. At first he wrote primarily for piano his first 10 opus numbers include eight piano sonatas, but he wrote for strings too, and in he composed his first violin sonatas, a set of three works which he published as his Opus 16. While the second movement is marked Adagio, it shares the restless mood of the first. The piano has the quiet main theme, but the music seems to be in continuous motion before coming to a quiet close. The first movement is marked Allegro con brio, with the emphasis on the con brio: A flowing second theme brings some relief, but the principal impression is of energy boiling up off the page, and the movement ends with the same massive chord that opened it. It dances gracefully, skittering easily between G major and G minor. Out of this calm, the concluding Allegro molto suddenly explodes – the violin takes off on the flurry of sixteenth-notes that will propel the finale on its dynamic way. This is by far the most extroverted of the movements, and it holds a number of surprises: The second movement is a set of variations. The piano introduces the song-like theme, which is then repeated by the violin. The high-spirited finale is a rondo whose central theme is energized by off-the-beat accents. Beethoven teases the audience nicely just before the rush to the close. At age 50, he was at the height of his powers. In that same year he wrote his Wedding Cake Waltz, and the following year he would write two of his most famous works: The structure of the sonata is unusual. It has four movements, but the first and second are connected, as are the third and fourth, dividing the sonata into two extended parts. Beneath its quiet surface, the movement feels constantly restless. The list of dedicatees includes some very distinguished names – Szigeti, Kreisler, Enesco and Thibaud – as well as two whose fame has not survived: Matthew Crickboom and Manuel Quiroga. The two became friends and colleagues and often played string quartets together at informal gatherings. Though the titles might have come right out of Bach, the slow-slow-fast sequence of movements does not. The finale is the most overtly Bach-like of the three movements: Rather than being in the binary form Bach favored for such movements, this one is in ternary form, and its middle section recalls the opening Allemande. His Seven Popular Spanish Songs, completed in Paris in 1837, was his final work before his departure. It comes from a period of unusual creativity: In arranging that collection of songs, Falla took the unaccompanied melodic line of seven Spanish popular or folk songs and harmonized them himself, occasionally rewriting or expanding the original melodic line to suit his own purposes. Several years later the Polish violinist Paul Kochanski arranged six of the songs – with the approval of the composer – for violin and piano and published them as Suite Populaire Espagnole Kochanski also rearranged the order of the movements in his arrangement. Asturiana Andante tranquillo is a tune from Asturia, a province in the northwest part of Spain. Here the violin, muted throughout, plays the melodic line above a quiet sixteenth-note accompaniment. Jota Allegro vivo is the best-known part of the suite. A jota is a dance in triple time from northern Spain, sometimes accompanied by castanets. Slow sections alternate with fast here, and the extensive use of chorded pizzicatos may be intended to imitate the sound of castanets. Nana Calmo e sostenuto is an arrangement of an old Andalusian cradle song, Falla said that hearing this melody sung to him by his mother was his earliest memory. The violin is muted throughout, and the piano accompaniment is quietly syncopated. Polo Vivo is a specific form: Csardas In its original form, a csardas or czardas was an old Hungarian folk-dance, usually constructed in several sections set at different tempos. The form occasionally crossed over into classical music: Trained as a violinist, Monti achieved some fame as a conductor and also composed ballets and operettas, but the Csardas, which dates from 1845, is his only composition to survive today. It is an excellent example of the form, and in its version for violin and piano this music nicely evokes the spirit of gypsy violin-playing. Monti then leads this theme through a series of episodes at sharply-contrasting tempos – sometimes the music is languid and sensual; sometimes it is fiery and virtuosic. It is also terrific violin music, calling for passages played entirely in artificial harmonics, rapid passagework and some gorgeous lyricism. Music this attractive has appealed to many different musicians. Chen has released three critically acclaimed albums on Sony: Chen continues to win the admiration of fans and fellow musicians worldwide. On Bastille Day in 1989, he joined Daniele Gatti and the Orchestre National de France for a televised concert on the Champs-de-Mars in Paris in front of an audience of more than 100,000.

Oh, those wacky pseudo-free-market government-backed until it bites them in the ass entrepreneurs! Hell, they probably already have! Sure, up until now it has been things like counterfeit CDs, DVDs, VHS tapes, designer bags and shoes, designer clothing, home and personal electronics, software, toys and automotive parts. It was fake Cartier necklaces, fake Rolex watches, fake Zippo lighters, fake Marlboro cigarettes, fake ball cards, fake copier toner and fake appliances. If it had a high-recognition brand or label attached to it, you can rest assured that some pallid imitation of the product was being mass produced, stuffed into shipping containers, and deposited at the Port of Long Beach among others for distribution to department stores, back alleys and flea market stalls across this entire country. And we knew it. And the store owners knew it. And our watchdog agencies knew it. And our appointed officials knew it. And our elected officials knew it. And we did nothing. We gave them Most Favored Nation trade status. Damned glad to have you, China. But Damn, this all will sure make MondoMart just love us and you know how they show their love, too. Sure, you might be mugged by a jealous cross-dresser for flashing that pair of vicious knock-off Prada pumps after dark in a trendy neighborhood revitalization area. You may even think yourself the proud owner of the new Nine Inch Nails cd only to find out that instead of Trent Rasnor all of the vocals have been re-dubbed by a poor Elvis Presley imitator. Sadly, that is not the case any more. These things can kill you, and dead is dead. Not three hundred percent. That merely triples it. And this product is a necessity for persons in certain medical situations, which makes it something for which there is a consistent demand. What on earth would make anyone think that a Three Thousand Percent profit margin was so inadequate that they would taint, adulterate, dilute, stretch and otherwise alter a medication or similar compound? And it has Most Favored Nation status.
