

Chapter 1 : The True Story Behind "Picnic At Hanging Rock"™ | ELLE Australia

Keith Bradsher is the Hong Kong bureau chief of The New York Times and a senior writer covering Asian economics and business. Story Behind the Story July 23, am July 23, am.

Plot[edit] The novel alternates between two timelines, often mid-chapter. The plot is described here in a linear order. The boat is washed down a storm drain and Georgie peers in, seeing a pair of glowing yellow eyes. Georgie is confronted by a man dressed in a silver clown suit who introduces himself as "Mr. Pennywise" offers Georgie a balloon which he cautiously refuses. The following June, Benjamin "Ben" Hanscom, an overweight eleven-year-old boy, is harassed by a gang of bullies led by the feared Henry Bowers. On the last day of school, Ben hides from his tormentors in the Barrens after an altercation with the Bowers Gang. Due to the unknown origin of the monster, the Losers refer to the creature as "It" and link It with a series of recent child murders, including that of Edward "Eddie" Corcoran, who is killed by the monster in the form of the Gill-man. The Losers begin to suspect that It has control over Derry due to the number of unsolved disappearances and violent tragedies which go unnoticed or seem to be forgotten by the adults in the town. The Losers decide to put an end to It and Ben makes two silver slugs out of a silver dollar, believing that silver will harm It. It attacks them in the form of a werewolf. Two weeks later, Beverly returns home, but her abusive father attacks her and attempts to rape and kill her, but Beverly escapes. Henry, accompanied by his two closest friends, Victor "Vic" Criss and Reginald "Belch" Huggins, chases the Losers into the sewers with the intention of killing them. It also explains that it chooses to prey on children because their fears are easier to interpret in a physical form. It expresses its own fear that It might not be the only eternal being in existence. It suspects there might be Another, and that the children could be the agents of this Other. This might explain their power and unprecedented ability to harm It. Henry, driven insane from seeing his friends killed, chases after the Losers and gets lost. He eventually washes out of the sewers into a nearby river and is blamed for all of the child murders. During the ritual, Bill also encounters "The Turtle", an ancient being, possibly more ancient than It, that created the universe while vomiting after a stomach-ache. The Turtle explains that It can only be defeated during a battle of wills. Through it Bill also learns of yet another being: This Other is a force beyond the universe, the creator of the Turtle, and maybe even It. With the help of The Turtle, Bill is able to defeat It and send it back to its slumber. After the battle, the Losers get lost in the sewers until Beverly has sex with all the boys to connect childhood and adulthood while bringing unity back to the group. One of the boys claims that he saw a clown dressed in a silver suit kill Mellon underneath the bridge. Bill Denbrough is now a successful horror writer living in England with his actress wife, Audra. Beverly Marsh is a fashion designer in Chicago, and is married to an abusive man named Tom Rogan. Eddie Kaspbrak has moved to New York City, where he runs a limousine rental company and has married a hysterical, codependent woman similar to his controlling mother. Richie Tozier lives in Los Angeles and works as a disc jockey. Ben Hanscom is now thin and a successful architect, living in Nebraska. Stan Uris is a wealthy accountant residing in Atlanta, Georgia. However, all but Stan reluctantly agree to return to Derry. Tom refuses to let Beverly go and tries to beat her, but she lashes out at him before fleeing, causing him serious injury. The five return to Derry with only the slightest awareness of why they are doing so, remembering only the absolute terror and their promise to return. The Losers meet for lunch, where Mike reminds them that It awakens once roughly every 27 years for 12"16 months at a time, feeding on children before going into slumber again. The group decides to kill It once and for all. Three other people are also converging on the town: Mike and Henry have a violent confrontation at the library. Mike is nearly killed but Henry escapes, severely injured. Henry is driven to the hotel where It instructs him to kill the rest of the Losers. Henry attacks Eddie, breaking his arm once again, but in the fight, Henry is killed. It appears to Tom and orders him to capture Audra. Bill, Ben, Beverly, Richie, and Eddie learn that Mike is near death and realize they are being forced into another confrontation with It. They descend into the sewers and use their strength as a group to "send energy" to a hospitalized Mike, who fights off a nurse that is under the control of It. Bill is initially dismayed to learn that the Turtle is now dead and almost loses to despair. It runs away to tend to its injuries, but Bill, Richie, and Ben chase after It and find

that It has laid eggs. Ben stays behind to destroy the eggs, while Bill and Richie head toward their final confrontation with It. As It writhes in the clear throes of death, Bill hears the voice of the Other complimenting him on his victory. They make it to the surface and realize that the scars on their hands from when they were children have disappeared, indicating that their ordeal is finally over. Mike concludes that Derry is finally dying. The Losers gradually begin to forget about It, Derry, and each other. Before Bill leaves Derry, he takes Audra, still catatonic, for a ride on Silver, rushing through downtown Derry like he did as a kid. Audra awakens from her catatonia with no recollection of what happened upon arriving in Maine and she and Bill kiss.

The Losers Club[edit] The Losers Club is a group of seven eleven-year-old misfit children who are united by their unhappy lives. They share the same misery and torment from being the victims of a gang of local bullies led by the increasingly sociopathic Henry Bowers and band together as they struggle to overcome It. The seven children find themselves caught up in a nefarious situation, which they cannot quite comprehend but against which they must fight. William "Bill" Denbrough Bill is the leader and most self-assured member of the Losers Club as well as the main protagonist of the story. His parents have become cold and withdrawn towards him after the loss of their youngest son, and he secretly hopes the death of the murderer will awaken his parents to his presence again. He has a severe stutter, which has earned him the nickname "Stuttering Bill". His mother attributes the stutter to a car accident that occurred when he was three years old, but his stutter is implied to be psychosomatic rather than physical: He is the most determined and resourceful of the Losers and is their unofficial leader. As an adult, he becomes a successful writer and marries film star Audra Phillips, who bears a strong resemblance to Beverly. Benjamin "Ben" Hanscom Known as "Haystack" to his friends, Ben is a highly intelligent boy who, before joining the Losers Club, often spent his free time reading books at the public library. Due to childhood obesity he was the favorite victim of Henry Bowers, but later sheds the weight as an adult. His mechanical skills prove useful to the Losers, from making two silver slugs to building an underground clubhouse, and later attributes to his success as an internationally renowned architect. He develops a crush on Beverly Marsh as a child and the two leave Derry together after the defeat of It. Beverly "Bev" Marsh An attractive and tomboyish redhead on whom each of the boys has a secret crush at some point during the story. She is the only girl in the group and comes from the poorest part of Derry. During her childhood she is frequently abused by her father, Alvin, while her mother, Elfrida is out working. As an adult, she becomes a successful fashion designer in Chicago, but endures several abusive relationships, culminating in her marriage to Tom Rogan, who sees her as an object of sex and frequently beats her. Following the destruction of It, she leaves Derry with Ben. He is "too intelligent for his own good" which frequently leads to trouble. He is the most devoted to keeping the group together, as he sees seven as a magical number and believes the group should have no more, no less. In adulthood, he is a successful disc jockey in Los Angeles. As the DJ, he uses his once-annoying and unrealistic voices as one of his main attractions. He is extremely nearsighted and wears thick glasses as a child, but changes to contact lenses as an adult. He loses his contact lenses in an encounter with It and is forced to return to his glasses, one of several ways the Losers return to their childhood. Edward "Eddie" Kaspbrak Eddie is a frail and asthmatic hypochondriac, who carries his inhaler with him everywhere. His father died when he was very young, and his mother is domineering and constantly worries about his health. Her constant worrying about his health has been a way to manipulate him into caring for her. When Henry and his friends break his arm, his mother tries to prevent the Losers from visiting Eddie in the hospital and he finally stands up to her, telling her he is not as helpless as she thinks. As an adult, he runs a successful limousine business in New York City and is married to a Myra, who is very similar to his mother. In his return to Derry as an adult, he also finds the strength to defend himself from Henry Bowers, killing him with a broken bottle. In the altercation, he re-breaks his arm in the same spot as he did as a child. Michael "Mike" Hanlon Mike is the last to join the Losers. He is the only African-American in the group and lives with his parents on a large farm. He goes to a different school from the other kids due to his Baptist faith. Mike meets The Losers when they help him fight back against Bowers in a massive rock fight. He is the only one of the

Losers to stay behind in Derry and thus the only one to retain his memory of the events of and becomes the town librarian. He researches Derry history and It, and is the one who beckons the others back when the killings begin again in He later recovers from his wounds but, like the others, starts to lose his memory of the experience. Stanley "Stan" Uris Stan is the most skeptical member of the Club. He is Jewish and is persecuted by Henry Bowers for this reason. Logic, order, and cleanliness are deeply ingrained in his psyche. He relies on logic more than anything else and is the least willing to accept that It actually exists.

Chapter 2 : The Story Behind

The story behind the photo of the little girl crying in the migrant caravan Camila Savioll Mejia, 4, cries and refuses to walk any farther in San Pedro Tapanatepec, Mexico, on Oct. (Carolyn.

Writing songs can take a lot of work, and sometimes inspiration strikes at the most random times. And all you have on hand is a wedding invitation and a pen to write your thoughts down. The song was written by polio-stricken Doc, who scribbled them down at his own wedding after watching a line of able-bodied men dance with his bride, a Broadway dancer. In , as Johnny Cash later recalled it, he and June Carter Cash were at their Nashville-area home, when a helicopter landed on their lawn. Speaking of mid-slumber song inspiration, on May 9th, , Keith Richards woke up in the middle of the night with a riff in his head. Instead of going back to sleep, Richards dragged himself out of his bed, picked up his trusty acoustic, and recorded about 60 seconds of the guitar part. A white boy writing a song like that? The judge asked the man if he had learned anything, and the man replied: He also won a Grammy for writing a country song in , making him the only NFL player to do so, ever. In , respected newsman Dan Rather was walking down Park Avenue on his way home, when two well-dressed men randomly attacked him, repeatedly demanding to know the answer to the question: Once assailant William Tager was arrested and identified by Rather, the disturbed man admitted that he mistook the news anchor for the vice president of the futureâ€”I have made that same mistakeâ€”a politician apparently named Kenneth Burroughs. Someone in the audience shot a Roman candle into the ceiling mid-show, causing a massive fire. There were no injuries, but the building burned down to the ground. As the members of Deep Purple sat in the nearby hotel room while firefighters tried to thwart the flames, they noticed Lake Geneva was completely engulfed in a haze. Even The Who liked to impress critics sometimes. He stayed on the line and used the signal tone while writing, and that tone became the opening notes of the song. He was described by his co-workers as a very hard worker, which may be why he slept through the Oscar ceremony. But who was his unrequited love for? After she divorced George Harrison and married Eric Clapton, they got divorced too. Eric Clapton and George Harrison made up and went on tour together. He claimed that his car lit on fire while driving on the highway because he was so enamored with the song as he was writing it. A motorcycle luckily drove past Jackson and alerted him to the car trouble. Eventually, inspiration struck and the group was convinced that the song would work, after deciding to slow the tempo down a bit. Thanks for joining us for another Mental Floss on YouTube, which was made with the help of all these kind people. If this video made you hungry for more songs, come check out our channel here and after you, like, really, really like it, you can subscribe over here. Every week we endeavor to answer one of your mind-blowing questions. Like their blue could be my yellow?

Chapter 3 : The story behind Iran's 'murder plot' in Denmark - BBC News

When John Carpenter's Halloween quietly opened in Kansas City on October 25, , it did not seem like the kind of movie anyone would speak kindly of " or think about at all, really "

May 08, The re-creation of the film by Peter Weir is one of the most highly-anticipated Australian television events of the year and boasts a seriously impressive cast: Picnic At Hanging Rock has long been shrouded in mystery. But is the plot "an eerie re-telling of a tragic event" based on a true story? Some say yes, some say no. In the lead-up to the premiere this May, we investigate the truth behind the story, and some of the disturbing and downright scary things that have happened along the way. The boarding school, and surrounding town, descends into chaos. The public and the police force organise several searches; Irma, one of the missing girls, is found unconscious but unharmed at the rock; students are withdrawn from the school; teachers and staff quit unexpectedly; a schoolgirl commits suicide in a mysterious manner; the headmistress jumps off Hanging Rock, killing herself. None of the missing women are ever found. A biography of the author, some years later, revealed that the first draft of the book originally included a final chapter that explained the disappearances. She faints, and is later revived by one of the girls loosening her corset to let her breathe. The rest of the girls throw their own corsets off the cliff, but point out that they stop in mid-air and cast no shadows. The girls then follow a lizard into a crack in the rock, described as "a hole in space. It is acknowledge that the crack in the rock is a timewarp, and that the missing girls are in another dimension. The times are wrong, however. Similarly, Easter Sunday was on April 15th that year, not March 29th. In fact, the book and movie drove such interest that Yvonne Rousseau wrote a book, The Murders at Hanging Rock, about possible solutions and answers. The author of the original book, Joan Lindsay, was the subject of a biography, investigating how she came to write the book and whether it had any basis in fact. The author of that biography, Janelle McCulloch, notes that some students who attended the school the book is based on believe that the crimes did occur, and that the stories might have based on a case of two girls who went missing around s. Time stops Aside from some historical evidence, there was some paranormal history, too. A producer told the Telegraph the same happened on set: Mine stopped at 6pm on the rock to ask the time became quite a joke. Lindsay, who had been to Hanging Rock in her childhood, said the dream felt so real she woke up. But another type of sense might have gone into the plot.

Chapter 4 : Jesus the Christ: The Story behind the Story

Features 'Glass Onion': The Story Behind The Song. Playing with fans who sought to decipher hidden meanings in their songs, The Beatles laced 'Glass Onion' with references to their earlier.

Story behind the song: Spafford was a successful lawyer and businessman in Chicago with a lovely family - a wife, Anna, and five children. However, they were not strangers to tears and tragedy. Their young son died with pneumonia in , and in that same year, much of their business was lost in the great Chicago fire. Yet, God in His mercy and kindness allowed the business to flourish once more. Among the passengers were Mrs. Spafford and their four daughters. Spafford had planned to go with his family, he found it necessary to stay in Chicago to help solve an unexpected business problem. He told his wife he would join her and their children in Europe a few days later. His plan was to take another ship. About four days into the crossing of the Atlantic, the Ville du Harve collided with a powerful, iron-hulled Scottish ship, the Loch Earn. Suddenly, all of those on board were in grave danger. Anna hurriedly brought her four children to the deck. She knelt there with Annie, Margaret Lee, Bessie and Tanetta and prayed that God would spare them if that could be His will, or to make them willing to endure whatever awaited them. Within approximately 12 minutes, the Ville du Harve slipped beneath the dark waters of the Atlantic, carrying with it of the passengers including the four Spafford children. A sailor, rowing a small boat over the spot where the ship went down, spotted a woman floating on a piece of the wreckage. It was Anna, still alive. He pulled her into the boat and they were picked up by another large vessel which, nine days later, landed them in Cardiff, Wales. From there she wired her husband a message which began, "Saved alone, what shall I do? Spafford later framed the telegram and placed it in his office. Now they have been taken from me. Someday I will understand why. Spafford booked passage on the next available ship and left to join his grieving wife. With the ship about four days out, the captain called Spafford to his cabin and told him they were over the place where his children went down. When peace like a river attendeth my way, When sorrows like sea billows roll, Whatever my lot, Thou hast taught me to say, It is well, it is well with my soul. It is well with my soul, It is well, it is well with my soul Anna gave birth to three more children, one of which died at age four with dreaded pneumonia. In August , the Spaffords moved to Jerusalem. Spafford died and is buried in that city. And the peace of God which surpasses all understanding, shall keep your hearts, your minds through Christ Jesus. Digital access or digital and print delivery.

Chapter 5 : The story behind the Michigan "s" | Michigan Radio

Behind every world conflict are individual stories of human suffering and dignity. For legendary Sunday Times foreign correspondent Marie Colvin, few places were too dangerous to search those.

For years, the book has never been out of print, going through numerous reprints and editions in multiple languages and formats. It is a unique book not only in terms of its content and influence but also in terms of its own story, a story that deserves retelling during this centennial anniversary. As a young man, he was offered a well-paid position with the Provo public schools. He prayerfully sought the will of the Lord, and when the answer came to teach at the academy, he obeyed. Talmage was first asked to write a book about the life of Christ in the summer of at the age of Winder, and Anthon H. These were not idle years, however. On December 7, , he was called as a member of the Quorum of Twelve Apostles. All the while, he had been pondering and preparing and looking forward to the day when he would be able to write the requested book. He still traveled to stake conferences and attended meetings with the Quorum of the Twelve, but he dedicated every spare moment to working on the manuscript. In order to teach his course on Christ years before, Talmage had prepared lecture outlines for each session. As he worked in the temple, he drew from these outlines and the research he had conducted for the class to write the book. On April 19, , just over seven months after beginning his draft, he completed the manuscript. The reading took place over 18 sessions, the last chapter being read on June 24, When the manuscript was approved by the Brethren, it was sent to the printer, who then sent the proofs back to Talmage to make any final changes. This editing was often done on the train, while traveling for his Church assignments. At least two sets of proofs were reviewed,⁹ and final revisions were completed in time for the first copies of Jesus the Christ to come off the press on September 9, , just under one year after he began writing. The Legacy The history of Jesus the Christ is a remarkable story for a remarkable book. Jesus the Christ is the first study on the life of the Savior to be written by a Latter-day Saint. It was written by request of the First Presidency and is the only book to be written in the temple. It is unique in its scope, covering not only the mortal life of the Savior but also his premortal and postmortal existence. It has contributed to doctrinal understanding and increased faith in Christ among its readers. View the full original manuscript of Jesus the Christ in the Church history catalog.

Chapter 6 : 33 Fascinating Stories Behind Famous Songs | Mental Floss

The new music biopic Bohemian Rhapsody (Nov. 2) tells the story of the rise of the iconic British rock band Queen, with a central focus on its larger-than-life frontman, Freddie Mercury. The film.

Asher Weber Alcatraz was once the most menacing prison on the face of the planet. Escaping from it was deemed impossible. At least 36 inmates had attempted to escape in the past but none had ever survived. That all changed one day in June Their fates were unknown until the police received a mysterious letter in January that changed everything and forced the FBI to re-open their investigation. Read on to learn more about the amazing real-life great escape from Alcatraz and what really happened to those that managed to escape. Contact From John Anglin It was a workday like any other the day that the San Francisco Police Department received one of its most shocking letters ever. Officials at the time said that all three of the men died in the icy waters the night of the escape. But was that all a lie? Was this letter the real deal? Was there an ulterior motive for it all? The Letter That Changed Everything The case of the Alcatraz escapees left all levels of law enforcement stumped for decades. But suddenly, the letter writer was claiming he could finally reveal what really happened that fateful night. Could this really be trusted? Would the years-long mystery finally come to an end? History Channel The letter in question was received by the San Francisco Police Department in but had been kept under wraps for years. The reason it stayed a secret for so long is unknown but apparently, it had enough information to cause the the Federal Bureau of Investigations to re-open its investigation in January What was so special about this? The Unthinkable Escape Alcatraz was notoriously regarded as the toughest prison on the planet until it closed in The maximum-security prison was designed to make it impossible for the worst of the worst criminals to come in contact with the rest of society. What made the infamous Alcatraz escapees so special that they could break past the toughest security procedures of the time? The Plan The escape plan itself was simple. The means to do it, however, would be near impossible and require the coordination of an entire team to pull off. It was not the first time prisoners attempted something like this. Dozens of inmates had tried to escape from Alcatraz before, so how would this be different? Pinterest In the past, none of the other inmates successfully pulled off their plans. The four men also had cells near each other during their time spent in Alcatraz and plenty of time to come up with a master plan to get out. Now at Alcatraz, the plan would take all the courage they could muster and all the resources they could get their hands on. He was cunning, skilled and highly intelligent. Orphaned at the age of 11, he jumped from foster home to foster home and learned how to be independent and take care of himself. YouTube But Morris was also a troublemaker, having been convicted of his first crime at the young age of He was destined for greatness, but not in the way anyone would have expected. His name went down in history books for being the ringleader of the Great Escape from Alcatraz. YouTube Frank Lee Morris was serving 10 years in the prison for bank robbery but then he did the unimaginable: He was on the run for around a year before he was caught while committing a robbery again. From there, he was sent back to prison, but this time to the infamous Alcatraz. The Brothers As with any good escape though, you need a team. Their parents were seasonal farm workers, going wherever they were needed. Every June the entire family they were just two out of the 13 children would go north for cherry picking and this would come in handy in order to escape from Alcatraz. Criminal Skills John and Clarence Anglin were thick as thieves growing up, and even more so, literally, during their adult years. As children, their family would go north for cherry-picking season, occasionally going as far north as Michigan. During those seasons, the brothers would swim in the waters of Lake Michigan and were reportedly very skilled at swimming in general. As adults, the Anglin brothers started robbing banks together. Eventually, they would be caught and arrested for bank robbery in But at this point, they were just getting startedâ€¦ The Group Forms During their time at the Atlanta Penitentiary, the Anglin brothers attempted to escape the prison numerous times, which resulted in them being sent to Alcatraz, a maximum security prison. There they met Frank Lee Morris, the mastermind of the group. YouTube Together, along with one other inmate named Allen West, the group of four had amassed a lot of experience in escaping or attempting to escape prison. The prison served the US military, making furniture, clothes and shoes. YouTube The group of

four was also lucky because they were among the very few criminals in Alcatraz that were incarcerated for non-violent crimes. This meant that they they were slightly under the radar and the ever-watchful prison guards paid slightly less attention to them. The Items The gang started putting their plan into action slowly. It was highly complex and even ingenious, some would even say. Not only were they going to escape from the impenetrable Alcatraz, they were also going to leave behind human-like dummies. History Channel They would also have to devise a way to get off the island once out of the prison and avoid any guards. Any attempt to escape would be met with bullets. The Decoys The team members each had their own responsibilities, on top of making sure they were able to get out of their cells on the night of the escape. Wikimedia Commons They fashioned the heads crudely but efficiently out of soap wax, toilet paper and real human hair stolen from the barber shop in Alcatraz. Morris was in charge of modifying an accordion-like instrument to inflate the raft and life vests. The Dig Together, the team also had to make tools to dig out of their cells and unscrew bolts on the vents. They were amazingly able to make picks and wrenches out of everyday items they managed to steal, such as spoons from the cafeteria and wood from the workshop. Alcatraz History Every day from 5: They removed the vents in their cells and used the picks to chisel the holes larger. Alcatraz Deteriorating Good news for the gang was that the prison was already old and crumbling in many places. Saltwater ran through pipes for showering and washing dishes but ultimately destroyed the pipes and leaked into the prison walls, creating a fateful reality. Alcatraz History Over time, the salt water eroded the cement, which eventually made it crumble and loosen. Thanks to prison reforms in the early s, inmates were allotted a music hour that created a cacophony of noise throughout the prison. Alcatraz History Morris played his accordion loudly whenever possible and the noise was enough to cover up any sound the chipping away at the cement could make. Behind the cells, where the holes led, was an unguarded utility corridor with pipes leading up and down. A Jungle Gym The utility corridor was basically an unguarded jungle gym. If they could get the holes in their cells wide enough, they would easily be able to climb up three floors to the roof. From there they would just have to pray. YouTube Once at the top, they would have to get one of the large shafts open to get onto the roof. Many of the shafts, to their dismay, were cemented shut. Alcatraz History They were able to make the raft and life vests by gluing and stitching raincoats together. In total, they used over 50 raincoats to create the items. And they were certainly necessary, otherwise the group would certainly drown in the bay. YouTube On June 11, , Alcatraz prisoner Allen West gave the signal to the other members of the group attempting to escape, indicating that he had finally dug his hole large enough to get through. But what happened next, no one could have predicted. The Plan Sets Into Action Promptly after lights out that same day, the gang set their plan of escaping from Alcatraz into action. But would any of them make it out alive? That was the question lingering in their minds. The prospect of living a free life, outside of prison was too enticing. Sky News They were prepared to do anything to get out of Alcatraz, even if that meant risking their lives. Adrenaline was pumping through their veins that night just at the thought of getting out. After the light went out that night they quickly moved to set their decoys and get out of their cells. Even though he informed the group that his hole was finally big enough to get out, he apparently misjudged the size and ease of making the hole bigger. Then they came to the conclusion that West would have to be left behind. Imgur So West took one for the team. And he might have even helped by making the raft lighter with one less person. From there the group of now three men started their climb. They climbed up 30 feet of plumbing in the utility corridor. Downward Morris and the Anglin brothers made it to the cell house roof rather easily. With their hearts pounding they continued and crossed at least feet of rooftop and then started their descent. The three climbed down 50 feet of piping on the side of the building to the ground. YouTube The landed on the ground close to the shower area and silently snuck past the guards. The gang of three managed to outsmart all the guards in their guard posts and finally made their way to the shore, where they would need to stop to inflate their raft and life vests. They set off in their makeshift raft at around Most of them were confused.

Chapter 7 : The Real-Life Story Behind The Great Escape From Alcatraz

Nov 1, This is a very special episode of The Story Behind. Believe it or not, two years ago I pressed Publish on the first

three episodes of this podcast, The Story Behind the Theremin, The Story Behind Dry Ice, and The Story Behind Sugar Skulls.
