Download Swann Dvr PDF manuals. User manuals, Swann Dvr Operating guides and Service manuals.

This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Operation is subject to the following two conditions: All jurisdictions have specific laws and regulations relating to the use of cameras. Prohibition against eavesdropping Except for the operations of law enforcement officers conducted under lawful authority, no person shall use, either directly or indirectly, a device operated pursuant to the provisions of this Part for the purpose of overhearing or recording the private conversations of others unless such use is authorized by all of the parties engaging in the conversation. To ensure your ongoing privacy, we strongly recommend setting a password as soon as possible. To ensure that your DVR has the best security possible, password recovery has been designed to be a complicated and time consuming process. If you need to replace or dispose of the internal battery. The battery is located on the mainboard of the DVR. It is a primary lithium CR button cell. General 12 Setup Wizard: Email 13 Setup Wizard: System Time 14 Setup Wizard: Email Settings 36 Network: IP Filter 37 Network: Network Status 37 Alarm: Motion Detection Configuration 39 Alarm: Motion Detection Notes 40 Alarm: Motion Detection - Action 41 Alarm: System Information 48 System: Local Settings 52 SwannView Link: Oh my, this is a big manual. How long will this take? It can take a few hours to connect everything and run through the setup procedure. Before installing anything, connect the DVR and cameras and test your system. We ensure everything is working properly when we ship them out, but sometimes things can be damaged in transport, and occasionally components can fail. Better to find out now, before everything is fixed in place! Follow the instructions from page 12 to page 18 to get everything working. Take your time to read through this chapter and explore the many capabilities that this Swann DVR can offer you. ForAndroidusers,pleasedownload the app from Google Play. If you have an Apple device, please go to the Apple App Store. As we are continually improving the documentation that we include with our products, you can find the latest user guide for our app at www. What does this really mean? In general, H is best suited: The resolution listed is the equivalent for a standard pixel matrix. Pauses playback or resumes playback. Display Button Toggles between full screen and split-screen views. Power LED Power indicator. This LED blinks rapidly when the hard drive is active. Water is the arch- enemy of electrical components and also poses a high risk of electric shock. Dust has a tendency to build up inside the DVR case, leading to a high risk of failure or even fire. Like all electronics, the circuitry and hard drive in the DVR produce heat, and this heat needs a way out. There are no user serviceable parts inside. Doing so will void your warranty, as well as pose a great risk of fire or electrical shock. The DVR is as robust as possible, but many of the internal components are quite fragile. Keep this in mind when choosing a location for installation. The availability of the buttons described here can be different in some models. Used to connect your speaker or headphone. Do this for the other cameras in your kit. Connect the cameras to power using the power splitter then connect the power adapter to a wall outlet. Connect the power supply to the Power input on the DVR and then plug it into a wall outlet. Connect the mouse to the USB port. When you first boot the DVR, it will automatically start the Setup Wizard which will guide you through the various setup options available. The controls are pretty easy to remember - heck, there are only two buttons. Selects an item or confirms a choice. Opens the menu bar from the live viewing screen. Opens a context menu in some settings screens. Can be used to adjust the values of sliders and scales when highlighted by the mouse. For details of what each button does, see the layout of the remote control below. Please use the USB optical mouse supplied. To ensure the integrity of your data and recordings, always select Shut Down when powering off the DVR. The wizard will guide you through all the settings you need to get your DVR up and working, specifically: If this is set incorrectly, images from your

cameras will be distorted, black and white, or simply not appear at all. The screen resolution setting for the DVR display. For example, if the DVR is connected to your HDTV, you would want to set it to the highest possible setting, x , to give you the best picture quality. If you need to change any of these settings later, you can find these options here: We recommend creating an account with Gmail www. The SMTP address of your email server. There are 3 preset options to select from: Allows for custom definintion of an outgoing email server. Recommended for advanced users ONLY. The SMTP port of your email server. The email address you want your DVR to send alerts from. The password of your sending email address. Enter an email address for the DVR to send alerts to usually your personal email address. The minimum amount of time that must elapse after the DVR sends an email alert before it can be triggered again. If your connection and email details are ok, you will see a message on the DVR screen confirming the email was sent successfully. Your DVR does not send out email alerts immediately when events occur. The default server used to obtain accurate time. The default is Triggers the DVR to automatically synchronize its internal clock with the time server immediately. You can configure when daylight saving time starts and ends, for example - 2 a. The amount by which the time changes during DST. For the vast majority of locations, the offset is one hour, but exceptions to this rule exist. When DST begins and ends in your locale. Account Configuration Account Configuration Here you can change the default password of the Admin account. For on-going protection against unauthorized access, we strongly suggest setting a new password for your Admin account. A password can be between 1 and 8 characters in length, and consists of numbers only no letters or symbols. Re-enter the password to ensure accuracy. This field is greyed out because the Admin account always has the highest level of access. There are two additional access levels available - Guest and Operator. This adds an extra layer of authentication on your DVR Display wizard when booting up checkbox: Select this if you want the DVR to automatically run the configuration wizard when it boots up. You can also run the wizard at any time by clicking the icon on the DVR menu bar. This will give you access to all areas of the DVR. The password function is disabled by default. It may reboot while doing so. Have the peace of mind that you can monitor your home at any time from any place.
