Chapter 4 : Million Dollar Business Secrets Review - Product Tour

It's called T. Harv Eker's Million Dollar Business Secrets. Million Dollar Business Secrets is a four-module online training program packed with 20 videos ranging from 11 to 44 minutes each. These videos were crafted from top-secret recordings from an event Harv led a few years ago - footage that was never supposed to be released to the public.

Harv Eker is giving away for free only for a limited time titled SpeedWealth. Unfortunately, for most folks that is where it begins and ends. There are countless people who could be more financially successful than what they have made happen. Many think that putting in longer and longer days is the answer, though this is clearly not the case for those who work 16 hours a day seven days a week and still struggle. Budding entrepreneurs and current business owners alike can both benefit from the program Million Dollar Business Secrets. There are two ways that this program helps people like you to achieve their dreams and make them a reality. The first is through learning the proper skills to build your enterprise. There are proven secret strategies and attitudes that will transform your company from a small center of self-employment into a business force to be reckoned with. Secondly, it is going to teach you the mistakes that are made by nine out of ten business owners every single day. Even those who have success may still be shy of fulfilling all that their company could be. They settle for little more than mediocrity rather than striving for greatness. You are likely asking yourself whether or not the system Million Dollar Business Secrets makes good on what they promise. Harv Eker is the driving force behind the business. Though he is an incredibly wealthy man today who has developed multiple successful businesses, he is very open about the failures along the way. He talks about these and how in a dozen years he launched 14 separate companies, all of which failed. At a rate of more than one per year, that is quite alarming! Then, certain principles guided him into creating the first success, which was a multi-million dollar company. However, success with this company was not instantaneous. Over the course of three years of work with the business, he finally achieved the status of millionaire. In that time, he learned many tools that he shares so that you can replicate success for yourself. He has done this time and again with his own ventures and will provide instruction and guidance so that you can do the same thing. He does not promise that you will become rich instantly, and shares enough about himself to prove he is a legitimate person and not a fake persona designed to sell products. Not only did he transform an empty bank account into millionaire status, he created an incredibly successful training company designed to assist others to reach their goals for personal success. It was one of the largest of its kind on the planet and he sold it for a considerable profit. More than a million people all around the world from every walk of life imaginable have been helped by him over the years. He has untold experience helping these students to translate his teaching tools into actionable applications for their own companies. This is quite remarkable! Harv Eker personally created this four-part program for people like you to learn from. In these modules, you will receive over 40 exciting videos that address every aspect of business success. You will learn how to create your business from the ground up. Not only that, he shows you the tools you need to manage and grow your company into a profitable and enjoyable venture that does not zap you of your energy and time. Even those with experience can make mistakes in so many different ways when it comes to company operations. The extensive training offered by Eker provide instruction for a great range of topics. So, if you are someone who is great with one aspect of operations but not another, you will be able to grow your skills in the weak area. For instance, if you have difficulty managing your employees in an otherwise successful business, you will gain insight into how to improve your management of these human resources and improve your bottom line. For those who are new to the game, the range of knowledge provided is indescribably valuable. Some of the highlights of the training are: Guerrilla Wealth Tactics There are people who put in as much time and energy, or even more, as those who are super successful without achieving the same results. This is most often due to the difference in mindset between the two groups. Do you want to be in the group of self-made millionaires or hard working poor business owners? In this first module, you will learn about the different way you need to think to join the millionaires. He will teach you which areas need to be addressed and how to avoid getting caught up in mundane details. The first module includes: The Secrets to Becoming a Master Negotiator Across the board,

in absolutely every industry around, those who have mastered the skill of negotiation are consistently the ones who gain the most financially from their endeavors. People who can get the best deals each time will accumulate wealth more quickly than their peers. What does this mean for you? Well, if you lack the experience and skills to negotiate, it means the difference between success and failure. Gaining this vital skill allows you to pull ahead of your competition. Unfortunately, many people continue to fail rather than succeed because they believe lies and half-truths. Falling for these negotiation myths leaves them on the losing side of negotiations repeatedly. People who have fair negotiation skills tend to repeat those mistakes. However, this module can turn around your negotiation practices and thus your results. You will learn tips and skills like how to alter the focus of the conversation in the direction you want. Additionally, you will learn to recognize the various styles of negotiation that are employed by most in the business world. As you continue to absorb and incorporate this information in your life, you will find that you are receiving more money for a lesser amount of work than you ever have in your life. Client satisfaction will soar and you will be on your way to financial freedom. Though it may seem impossible, you can do it! Major points in this module: The Ultimate Marketing Strategy Guide Those who have spent any length of time around the world of business understand that marketing is the backbone of success. Even if you have all of the other factors in line to create a profitable company, if your marketing efforts are less than ideal, so will your results be substandard. In fact, the author shares his own failures as an example. The essential aspects of marketing that are covered in this are good for modern methods that utilize the Internet, traditional means of advertising to the public, or a combination of the two. This section alone is worth the price of the whole program, particularly if your marketing endeavors are not currently giving you the spectacular results that you were hoping to see. Highlights from this module: You may wonder how that is even possible, to come up with a new idea each minute of the day. However, you can transform your thinking into a profit machine. It is really the difference between unfulfilled and unclear dreams from greatness developed with a clear actionable plan. Extraordinary Bonuses At this writing, the program includes three bonuses, which are truly remarkable tools. Rather than the customary fodder, these are unbelievably helpful to people like you. You will learn clear and actionable methods for wealth generation. Rather than sitting on a merry-go-round of wasted hours, you can make more money in less time! A one and a half hour one-on-one conversation with Harv A screensaver and mindset card Supplemental workbook to coincide with the video instructions The mindset card and screensaver will help you to keep the proper frame of mind for success. As for the workbook, it is a professionally crafted tool that will let you really dive into the meat-and-potatoes of getting ahead. A bit of rote memorization and a lot of focusing are gained through this bonus. As for the conversation you get with Harv, it is an unbelievably powerful tool worth the price of the entire program. He does not sugar coat anything nor offer generic self-improvement blabber. He will find out why you are failing and help you turn things around so you can reach the next level of success if you are willing to put forth the effort. This product is not like the similar ones on the market that make big promises and fails to deliver. It provides a real plan, not vague suggestions. Whether you are brand new to the world of business or just starting out, this program is an invaluable resource for achieving success.
