*Oct 26 Views 7 Comments on TCS Placement Paper with Solutions TCS (Tata Consultancy Services) is the leading IT Company in India. It provides different types of IT services, outsourcing and also call centre services to firms.*

What are the odds that 5 consecutive cars of the same color will come through the test area at any one time? The speakers discuss how a lot of miraculous mathematics can be achieved if mankind as well as womankind had only worked with fewer digits. The problem posed at the end of the workshop is How many four digit numbers can be formed using the digits 1, 2,3,4 ,5 but with repetition that are divisible by 4? Can you help Alok find the answer? Jagan recorded the radius of some echina at a particular spot as 7mm. How many years back did the solar blast occur? Each reading spot consists of a round table with 9 chairs placed around it. There are some readers such that in each occupied reading spot there are different numbers of readers. A is an Italian sports car manufacturer based in Maranello, Italy. Founded by Enzo Ferrari in as Scuderia Ferrari , the company sponsored drivers and manufactured race cars before moving into production of street-legal vehicles in as Ferraari S. Throughout its history, the company has been noted for its continued participation in racing, especially in Formula One where it has employed great success. Rohit once bought a Ferrari. For all values of n from 1 to The Hobbits and the Elves are peaceful creatures who prefer slow, silent lives and appreciate nature and art. The dwarves and the men engage in physical games. The game is as follows. A tournol is one where out of the two teams that play a match, the one that loses get eliminated. To identify the mice, the lab has prepared labels with numbers 1 to , by combining tags numbered 0 to 9. The 5 experiments to be conducted by lab are to be thoroughly documented and performed only after a round of approval by authorities. The approval procedure takes around 48 hours. While water fills at the rate of one litre every hour in A, it gets filled up like 10, 20, 40, 80, in tank B. At the end of first hour, B has 10 litres , second hour it has 20, and so on. Suppose you take one spoon of water out of the first tumbler and pour it into the second tumbler. After moving you take one spoon of the mixture from the second tumbler and pour it back into the first tumbler. Which one of the following statement holds now? Named Continuator, the robot can duet with a live musician in real- time. If the cost of making the robot is divided between and then computes a complementary phrase with the same playing style. If the cost of making the robot is divided between materials , labour and overheads in the ratio of 4: The lights are out and it is totally dark inspite of the darkness. She can make out the difference between a hat and a glove. What is his average speed for the journey? These pathogens were responsible for the Irish potato famine of the midthcentury. These seem to have attacked the tomato crops in England this year. The tomato crops have reduced and the price of the crop has risen up. How much more would a vegetable vendor need to pay to buy 27 boxes this month over what he would have paid last month? The points in P lie on a circle. This scrutiny is supposed to deter and detect crime. In one criminal case, the police interrogates two suspects. The ratio between the ages of the two suspects is 6: After how many years will the ratio be 8: She realizes that she has used more small cubes than she really needed. She realized that she could have glued a fewer number of cubes together to lock like a block with same dimensions, if it were made hollow. What is the minimum number of cubes that she needs to make the block? Two of the coins are special and the rest are ordinary. Alok starts and the players take turns removing an ordinary coin of their choice from the circle and bringing the other coins closer until they again form a smaller circle. The goal is to bring the special coins adjacent to each other and the first player to do so wins the game. Initially the special coins are separated by two ordinary coins O1 and O2. Which of the following is true? And try to solve all the questions and comment answers thank you. I am a programmer, Presently working as a Software Engineer. I love Linux and Open Source. Apart from that, I love to explore new technologies and things.

*TCS Latest Placement Paper Questions with solutions (15).*

Learn and practice the placement papers of TCS and find out how much you score before you appear for your next interview and written test. You can easily solve all kind of placement test papers by practicing the exercises given below. You can easily solve all kind of questions by practicing the following exercises. I had only Email writing and was exempted from aptitude. The question was as follows: Write an Email to the Branch manager, Mr. Ahmed informing him that your wallet had been stolen 2 days ago and request him to block your card. Juzz make sure that you use all the phrases given in the question 2. I used pickpocketed instead of pickpocket. Form small sentences using each word. There was a panel of 2 members for my technical interview. I was standing there for a minute and then I asked Me: Mam, Can I have a seat? Smiled Yes, of course. So tell us about yourself? What are your strengths? Use words like ready to accept challenges, hardworking , sincere, analytical, problem solving capability, leadership and so on. Be ready to support any of these qualities with an example. Looked at my CV and smiled You like Computer networks! I had mentioned it in my CV Me: So what is Distributed Computing? I was lyk ye kya puch rahe hain Sorry sir, I am not aware of it Though I had a little idea about it, I preferred not to tell. Because the other questions would be on that. But if you say "Yes" and answer wrong, it spoils your impression. Sir, I know the basics of Networking which I had studied as a subject in Engineering. So what do you know about Networks? Explain its layers and their functions. But be strong at your basics and answer. What is Cloud computing? Juzz make a note of latest technologies like cloud, hadoop and their applications Interviewer: And then he deviated from my resume and asked me about Software Engineering SE. So you know about SDLC? Be prepared with all the subjects not everything but at least the basics. You never know what subject the interviewer might be interested in. I first tried to recover from the shock that he was asking me SE. Trying to recall the fullform first: Explained with all the phases. What is Agile Process? What are the different models? Draw any two model and compare them. I thought of drawing waterfall and spiral model but he asked me to draw waterfall and RAD model Explained. The best thing was, I was able to recall all the things one after the other. Asked me questions on them. Answered all of them. So what are different Static and Dynamic diagrams? Can you draw a sequence diagram? Was very nervous since I was thinking whether I would be able to recall all the notations and their meaning Definitely, Sir. Asked me questions on my diagram. Is this diagram Synchronous or Asynchronous? It is synchronous, because for each message sent there is an acknowledgement. I say its Asynchronous. Now I was in a fix Maybe you are right, but since I see acknowledgement for each and every message I say its synchronous. I still say it is Asynchronous. Extremely nervous Sir, can you please explain it to me. May be I have interpreted the diagram in a wrong manner. Explained me why he said its Asynchronous Now you got it? I had to just extend that activation line then my answer would have been right Yes sir, thank you so much for clearing that. Always try to show your willingness to learn if you are wrong Interviewer: Asked some more questions on the diagram and then he started doing something on the Laptop Me: Write any program in any language. I wrote the factorial program using Java. If you are a Computer or IT student then write the program using object ka concept. Two classes one for program logic and other for testing that program using objects. This is what they expect from us. Have you learnt this program? Gathering some courage You want me to write some other program. I will do it. Relieved Thinking if he had given me some other program what would have happened?!!!!! Sir, what kind of skills do you expect from a fresher? You have all the skills. Mam joined and said the same Just brush them up nicely. Very very happy Thank you so much. Within minutes after my technical round I had my HR round. There were two chairs in front of him. One was opposite him and the other to his right. I wondered where to sit. Can I have a seat? Sir where should i sit? Sit wherever you want. I chose the one which was opposite to him. Why did you choose this chair? Sir because you are sitting exactly in my line of sight. So communication would be better. I know many will laugh at this Sir: So if you sit on that chair then also I would be in your line of sight. I said I will have an to sit in an inclined way to face you. Its ok, I have no problem. Ok, Sir I said and shifted to that chair And fortunately that conversation ended. My

name is Pratima Purohit. What is the meaning of your name? It means an idol or a statue. So you believe in idol worship? But your name means idol rite? But my parents gave me that name. So what do you believe in? Sir, I believe do good deeds and good will happen to you. Ok, so what do you think about women empowerment in India? Not convinced No but everyday in the news we see female foeticide, child marriages and all happening. But the Scenario is changing.
