Chapter 2 : The Top The Greatest Books of All Time by The Top 10 (Book) - The Greatest Books

Part II of this reference work consists of the Best Books listed by author, by year (from), the Best of the Best list, and Ten Years of BBYA Top Tens, , and finally a lengthy comprehensive index.

And while you may be mourning the oncoming loss of summer, you should be celebrating this new season of publishing. And the month also heralds exciting YA debuts from authors you should be watching, like Katherine Locke and Akemi Bowman. Summer is over, but an autumn of amazing reads is just beginning. When it becomes clear that someone is using dark magic to change history, Ellie must risk everythingâ€”including her only way homeâ€”to stop the process. At Zeppelin Bend, an outdoor education program designed to teach troubled youth the value of hard work, cooperation, and compassion, 10 teens are left alone in the wild. The teens are a diverse group who come from all walks of life, and they were all sent to Zeppelin Bend as a last chance to get them to turn their lives around. Quiet and shy, Mateo is devastated at the thought of leaving behind his hospitalized father, his best friend, and her baby girl. Having lost his entire family, Rufus is no stranger to Death-Cast. Not that it makes it any easier. Isolated and scared, the boys reach out to each other, and what follows is a day of living life to the full. Though neither of them had expected that their final day on earth would involve falling in loveâ€”

Chapter 3 : 50 Best Dystopian Novels - How many have you read?

Selecting the best --An analysis of the lists --Current trends in teen publishing and best books for young adults --Themed lists --Best books for young adults selections, --The books by author --The books by year --The best of the best from the Preconference --Ten years of BBYA top tens,

Share30 Shares K The ten novels on this list all substantiate the belief that books are the most elastic, introspective, human and entertaining form of media that exist. Not movies, not music, not art, not the theatre. A famous author once said that novels are the best way for two human beings to connect with each other. I believe this, and I believe that people who do not find pleasure in words have never had the opportunity to read one of the great novels. The first introductions students often have to literature are stale century-old books that do not translate well to this new modern era. Frankly they are boring, and a lot of kids drift into the living room and turn on the television and stay glued for the rest of their lives. So, here I will present the ten greatest novels of the last twenty years, without apologies. *Homes First Sentence*: Homes deserves recognition for her amazing writing skills, her unique voice and her gloomy view of the world. Homes shines when writing about screwed-up, out-of-love or on the brink of out-of-love couples. *Torching* is no exception. The married couple, Paul and Elaine, first appeared in a short story in *The Safety of Objects*, and then took on a life of their own. Married in suburbia, with two young boys, we follow them in their search for happiness, or some form of contentment, which they never seem to find. Smoking crack in the dining room, having affairs, trying to burn down their own house—nothing seems to change their boredom and disappointment. Homes makes this common enough theme of suburban ennui feel real with her shining prose, a secondary cast of interesting plots and characters, and lack of a fairy-tale ending. And while he may have written better novels than *Fight Club* see *Survivor*, this is the one that brought him to the show and inspired a new, fed-up generation to push back. His quick, intelligent prose keeps the attention of the worst ADHD-sufferers, and the themes in *Fight Club* of revolt, of going back to zero, of anti-consumerism are universal, accessible and desperately needed in the world we live in today. *Dazzling*, original, mind-bending, genius, heart-breaking, addicting, wonderful, jaw-dropping. The list goes on and on and on. No other novel has created its own world quite like *Leaves*. *Danielewski* made us question our own sanity. The main plot follows a family who moves into a new house that they quickly find out is haunted. Imagine if you will a book that you have to take over to your mirror to read passages written backwards. Imagine twenty-two page rants about the origins of the word echo. The house is alive. Forget you ever read this. Go on with your life, and move down the list. Do NOT read this book. This book consists of three novellas, woven together and taken from earlier *Dubus* publications. It is also a wonderful movie starring the enigmatic *Laura Dern* and *Naomi Watts*. Affairs are had, feelings crushed, epiphanies thwarted, friendships tested. Shows us that nobody ever has anything figured out, not really. That what we do and feel morphs and shifts. It does what a great book is supposed to do: Without each other, all will be lost. This book is heart-wrenching, desperate and mesmerizing. Let me just say that I was literally in tears in the middle of a crowded *Barnes and Nobles*, trying to pretend like there was something in my eyes. You will not be able to breathe until you finish it. Here he gives us a little more to work with, like allusions *Howard Roark!* A, and a semi-coherent plot. Nobody in the world can write like *Ellis*, though many have tried, and failed miserably. And here he shines. The things they do are despicable and immoral. What do you think happens in Universities around America? What do you think most people are really like? This is a documentary of lost, attractive young people falling into the void. And nobody cares and nobody cares and nobody cares. If *Palanuick* is the very best writer, sentence to sentence, then *Franzen* is clearly the best living novelist. This story involves one *Louis Holland*, and a Harvard seismologist named *Dr.* It writes about the evil of corporations, but in a stronger, more mature way than *Palanuick*. *Franzen* is a historian, and he tells us exactly why the world is bad, how it came to be that way. He goes all the way back to the colonization of America, but not in a preachy or boring way. He personifies a raccoon for five pages, which is strangely one of the most poignant parts of the whole book. The two main characters are what make the book. *Franzen* is a master and a genius; he builds and constructs. He makes us work for it. As with the 1 author on this list, you

can imagine him standing behind a door somewhere laughing at all of his readers. This novel succeeds where *The Twenty-seventh City* fell a little short, and *The Corrections* overthrew. It follows generations of a Dominican-American family, the struggles they encounter in the Dominican Republic, and the curses that follow them to America. The main protagonist Oscar is a pound nerdy, RPG-playing guy in America, who desperately wants to find love. We follow him in his constant struggle to find it, and bear witness to his countless rejections. You can do it! Who eventually falls for a gangster Why Beli, why? Diaz blends Dominican history and folklore, humor, love, sex, death, revolutions, Castro, and dictators into one of the best freshman novels of all time. He employs current pop references, historical footnotes, a bad-ass original refreshing writing style, a mysterious narrator, Spanish, a blazing humor, age-old plot devices, and one of the most heart-breaking characters in existence to make this an instant classic. President Kennedy had been killed. It takes us everywhere in Southeast Asia, and even back to the United States. Johnson depicts a war where nothing is clear, where friends and enemies are indistinguishable, and where myths are created out of the land itself. With a cast of half-a-dozen supporting characters, he portrays the war from the perspective of both sides of Vietnam, from two G. While it was very difficult indeed to rank the other nine books on this list, deciding where to put this book on the list was as involuntary as breathing. This is by far the best, the longest, the most difficult, the most frustrating, the most entertaining, the most rewarding book on this list. Ultimately, this book is about addiction in every form you could possibly imagine: Heroin, alcohol, cannabis, crack, cocaine, Diludiad, Percocet, sex, sports, cleaning, and on and on and on. With a cast of hundreds, and almost footnotes, coming in at a whopping 3 lbs, *Jest* focuses mainly on a halfway house in the Boston suburbs, and the adjacent Enfield Tennis Academy. Wallace spent hundreds of hours going to AA meetings, and this book is considered by many to be the most realistic account of drug addiction and the Alcoholics Anonymous program in either fiction or non-fiction. Wallace created his own world in *Infinite Jest*. This is not just a big novel with big ideas. This book deserves its own cannon. It cannot be categorized. This book genuinely redefines the boundaries of what a novel can do. Wallace hung himself in late *Infinite Jest* is his second, and last, finished novel.

Chapter 4 : Best Books for Young Adults | Young Adult Library Services Association (YALSA)

Rev. ed. of: Best books for young adults / Betty Carter, with Sally Estes and Linda Waddle. 2nd ed. c Skip to main content Search the history of over billion web pages on the Internet.

He goes from being bullied at home to experiencing the same thing in a new environment, where he has to grapple with racism and stereotyping from his peers. *All American Boys* by Jason Reynolds and Brendan Kiely When a young black teen named Rashad is violently beaten by a police officer in a local convenience store to the point where he is hospitalized and missing day after day of school the media scoops up the story. And the police officer? Especially when those realities are frightening. Because it shows that these stories your stories matter. The book tells the story of their friendship and blossoming feelings, while also dealing with their families. In this fresh take on the tale, Ash is a teen girl dealing with a cruel stepmother after her father dies. But when a fairy appears, it seems like she just might get whisked away to a better life, as promises are made for a better future. As a new friendship blooms between them and feelings begin to surface, Ash finds herself torn between two potential worlds: She steals books whenever she can, from Nazi book burning to libraries, saving them and finding fictional places in which to escape. Narrated by Death, the novel discusses love, loss and history in one incredibly powerful tome. Dimple finds the guy working as a DJ at a party, spinning music and living his life the way he wants. Humor and swoons are quick to follow. Maybe you just love the person you love. Volume one, *Boxers*, tells the story of Little Bao, who is forced to watch his people being taken advantage of by missionaries. Set during the Boxer Rebellion, the book follows Bao as he joins the rebellion against the Westerners. Volume two, *Saints*, reveals the other side of the conflict from the perspective of Vibiana, a girl who was forced out of her village and has finally found a home with the missionaries. The heartbreaking narrative is gorgeously illustrated, promising a multifaceted exploration of a painful time in Chinese history. In other words, this mixture of history and personal narrative told in stunning free verse is essential reading. Set in what appears like a utopia, the novel introduces a young boy named Jonas who lives in a pain-free society. The world runs on conformity and contentment at the price of emotion. So when Jonas is selected to be the next Receiver of Memory and is introduced to past secrets, he finds himself questioning the world around him. The Giver asks big questions about what people are willing to sacrifice in order to feel safe. Would you give up all feeling and color for a life without crime or sickness? And how important is your individuality? She has free reign living as a ward of Jordan College, exploring the grounds with her daemon, Pantalaimon. In her world, the souls of children are embodied within these magical beasts and serve as guides for their respective humans. A fantasy novel that touches on religion, belief and family, *The Golden Compass* proves as imaginative as it is heavy hitting. Think Gothic mansions, corsets, etiquette lessons and now toss in alternate realms and powerful visions. Alone with no way to communicate and a stretch of forest ahead, Brian must learn how to hunt and build a shelter to last the winter. Living in *Opium* is Matteo, a clone of El Patron, the man who rules over the land with an iron fist of cruelty and greed. El Patron creates clones to harvest their organs and unnaturally extend his own life, continuing his reign of terror. As the truths surfaces, Matteo finds himself in the middle of a growing war. Other countries are tired of El Patron, other drug cartels want access to *Opium* and many people want to shut him down some on the inside. What follows is a story about fighting for your place in the world when you have dreams that are bigger than what people think you deserve. The sequel, *The Lord of Opium*, came out in Pick it up, and experience a terrifying world. The narrative style is a bit experimental, dishing out the story in a series of beautiful vignettes. *The Hunger Games* by Suzanne Collins The dystopian novel that launched a bestselling trilogy and an epic film franchise, *The Hunger Games* is an action-packed thrill ride that dishes out a glimpse of a brutal, totalitarian future. It also launched a battle of ships, with fans waging a war between Peeta and Gale. The Capitol is supported by 12 districts that provide various resources and annually offer one boy and one girl to the Hunger Games. In this live-broadcast program, teens fight to the death for the entertainment of the Capitol and the horror of the citizens. And when a year-old named Katniss watches her sister get selected for the event, she volunteers to take her place. The series continues with *Catching Fire* and *Mockingjay*, with

the stakes, action and romance intensifying with each title. *Lies We Tell Ourselves* confronts race, sexuality and a complex landscape as the two teens learn more about themselves, each other and the injustice of the world around them. *Looking for Alaska* follows Miles as he transfers to a new school and finds himself with an eclectic group of new friends and a new crush on Alaska Young. The misadventures of Miles, Alaska and their mutual group of friends have all the elements of teen friendships: *Looking for Alaska* delivers a contemporary read packed with the humor and heart for which John Green is so famous. He has big dreams, like of becoming a filmmaker, but suddenly finds that ground to a horrifying halt. A drugstore owner was shot, and the rumor floating around is that Steve had something to do with it. Steve delivers his story as a movie script, which unravels with flashbacks and multi-camera shots. The resulting narrative is as gripping as it is unique. A Young Adult take on *Eternal Sunshine of the Spotless Mind*, the novel follows a teen named Aaron, who wrestles with family, friends, love, heartbreak and sexuality. But in the world that Adam Silvera has crafted, there are ways around the things that weigh heavy on our minds. And Aaron wants to forget the feelings he has for one of his friends. And despite the slight sci-fi twist, everything in the novel feels so very real. *More Happy Than Not* will leave you shaken for days, if not weeks. *The Outsiders* by S. E. Hinton. The Socs are teen kids from wealthy families; the Greasers hail from homes with significantly less. They always fight, but one day it goes too far. And one of the Greasers kills a Soc. The seemingly black and white world of one gang vs. Violence begets violence, and as the law descends and friends start to fall, a Greaser named Ponyboy learns painful lessons about his place in the world. *The Outsiders* is a story of complicated friendships, class struggles and changing world views. The epistolary novel highlights the struggles that come with being introverted and unpopular, while also discussing friendship, sexuality and abuse, both physical and emotional. In *The Perks of Being a Wallflower*, Charlie is a shy freshman who loves books and finds himself taken under the wing of an English teacher. Meanwhile, he becomes friends with some high school seniors, forming a quirky clique that leads him through a complicated period of self-discovery. Give it a read, and keep the tissues handy. *Pointe* by Brandy Colbert. Theo is a teen ballet dancer who has been through it all: And she struggles with the fact that her best friend, Donovan, has been missing for years and is constantly on her mind. But Donovan was kidnapped. Donovan returns after years with his kidnapper, and repressed memories rush back to Theo. Just trust me that *Pointe* offers a dark story of mystery and heartbreak. But after the character saves the day, what happens next? In this geeky blend of contemporary YA and fantasy, we meet Mikey, a teen who just wants to go through the motions of high school and maybe, just maybe ask out his best friend, Henna. The novel explores interesting questions: What happens when you feel so average around extraordinary people? Can you find a way to stand out? Do you even want to? And hidden within all the geekery, *Ness* tackles mental illness, sexuality and friendship for a serious emotional punch. Amongst all this we meet Nailer, a teen boy dealing with the pressures of this brutal life. Poverty is everywhere, people are dying and not meeting your quota on scrap means starvation. Until a glimmer of hope presents itself on the shores of the beach after a hurricane—a clipper ship. *Ship Breaker* promises a vivid portrait of a brutal world and the kids who must fight to live in it. Just giving you fair warning. *Speak* by Laurie R. King. Melinda Sorindo is a teen girl starting high school at Merryweather High, and what should be a time of new friends and broadened horizons is anything but. She finds herself a social outcast after calling the cops on a party at the end of the summer, and now no one wants to talk or to listen to her. What happened at that party that made her call the police? A National Book Award Finalist and a nominee for the Printz and Edgar award, this novel is essential reading for any teen. *Sofia* faces racism and stereotyping in school, so she seeks out her revenge by doing well in school and proving others wrong. And when the opportunity to attend a prestigious private school surfaces, she has the opportunity to leave the barrio and explore the world beyond. But this means leaving behind her family and the traditions she holds so dear. The story takes readers on an incredible adventure as the Murray children quest with three immortal women on a mission to save their father. Unfortunately for Naila, her conservative parents absolutely forbid her to be friends with boys, never mind actually date one. When her relationship is discovered, her parents whisk her away to Pakistan under the guise of a vacation to learn about her culture. But her parents have actually arranged a marriage for her, and the wedding is to immediately take place. *Piddy* is new to the school and just wants to fit in—not get picked

on and harassed. And the tension created for Piddy and her situation feels very, very real. What about that title?
