At this time, he created the only non-humor comix of his long career. What motivated Stanley to venture outside the sardonic sitcom that had been his bread and butter? I wish I knew. Maybe Craig Yoe knows. He interviewed John Stanley in the early s--in what was probably the only in-depth interview anyone did with Stanley, period. I can only hope Yoe--or someone-- got the lowdown on these very curious career departures. None of them proved very successful. The horror comix appear to have gotten Stanley in some hot water. Dell Comics was in crisis in The company split in two. Gold Key mediocritized the Dell company formula, and rode the success train for another 20 years. They changed name once more, to Whitman Comics, before they perished in utter blandness. Without a clue as to how to proceed, they bravely soldiered on. They made one bad decision after another as they desperately sought a foothold in the growing comix market. Reviving the horror comix genre was, in theory, a good idea. The Comics Code had neutered the genre in Since Dell operated outside the highly restrictive Code, they could publish scary comix and get away with it. John Stanley would have seemed their best bet for this project. He specialized in dark humor, and his stories had, for years, regularly featured macabre themes and settings. It was a high-voltage double-dose of freaky, trauma-rich material. Apparently, it upset kid readers. Stanley was taken off horror. Ghost Stories lasted 37 issues--after Stanley had left comic books for good in Stanley recovered from this strange episode with a brace of "auteur" humor comix which he wrote and drew. His brief foray into horror left a lasting impression on those who read them--whether in , or last Tuesday. Here are the first three stories from the pluperfectly effed-up, whacked-out Tales From The Tomb. Every story has something odd, troubling or outright inexplicable about it. The setting is similar--a dirty Old-World tenement not unlike the Airy Arms; battle-axe landladies who intrude upon, presume upon, and manipulate their tenants; and, most vividly, the sense of urban congestion--of small, malodorous rooms, of grime-covered windows that let in the constant roar of traffic and voices. Nightmare reality layers atop urban tension, and creates a story as upsetting as it is ludicrous. The put-upon protagonist-in-peril does escape with his life, having freely swapped his last shred of dignity for a ticket out of Hell. Yet the landlady and her hungry carpet go on, unscathed, to claim new tender, tasty victims. There is humor, and humor potential, galore here--from the squabbling of the duelling landlords on the first page to the pushy, manipulative Jewish landlady who rents the poor schmo the room for the night. At it stands, this story simply is. Nothing I can say about it will change that fact. Laugh at it; be scared by it. The early pages of "Still Life" contain a great deal of sharp dialogue, and two characters that are well-shaped and rather charming. Their chit-chat has the desired effect of luring us away from an expectation that something bad will happen to the urbane young painter. Stanley wrote great chit-chat. Again, it begs for the Plop! Were the artwork cartoony, it would work much better. Escher had moonlighted in the funnybook field, in collaboration with Basil Wolverton, the results might be a little bit like this And it gets weirder

However on page we read that after the death of Alexander the planning of monument was canceled by Perdicas. In this paper we read: You cannot receive accurate dating from a skeleton. For me the skeletons are meaningless. They are misleading our research. Antipater returned to Macedonia in BC page , where the Greek archaeologist Peristeri discovered the Amphipolis cone pyramid. Having quelled a mutiny of his troops and commissioned Antigonos to continue the war against Eumenes and the other partisans of Perdicas, Antipater returned to Macedonia, arriving there in BC. According to the excavation results November 29, coins of the third century AD were found in the Hephaestion tomb, which mean that the tomb was open for cult of Hephaestion and of Alexander the Great. In other words during the third century AD Roman emperors loved the Greek culture. So under the anti-Christian policies Christians were unable to destroy the Hephaestion tomb with any mortal remains for cult. Nevertheless the archeologist Peristeri on November 29, announced that the tomb was destroyed by Romans during the third century AD. However during the era of the emperor Julian Macedonians were able to protect the monument with the destroyed statues and the scattered bones of cult from any future vandalism. It is of interest to note that after the Christian vandalisms the grave of hero Hephaestion became an ossuary with bones for cult. Perhaps horsemen as the defenders of the monument of Hero Hephaestion were killed under the anti-paganism policies. The DNA and the dating of bones through accelerator mass spectrometry that will follow could determine if the bones for cult belong to rulers of early periods or were gathered from cemeteries or other places after religious controversies between the defenders of the tomb and the fanatic Christians. It is of interest to notice that according to the British author Chugg the few fragments found of an adult cremation could in fact be the original occupant. In other words the Hephaestion tomb was not a family tomb, because the discovered limestone has not buried complete skeletons of possible buried persons but bones for cult. For example the officials said that around bone fragments had been discovered. After a meticulous process of piecing the fragments together, scientists identified complete bones. Following the macroscopic study of bone material, which was undertaken by a multidisciplinary team from the Universities of Aristotle and Democritus, researchers were able to determine that the minimum number of individuals is five. Thus the rest fragments of bones should belong to extra persons along with the dead animals. No ancient writer says that Hephaestion was buried in Babylon. Since the mean density of a marble is about 2. Such a heavy parallelepiped without any inscription of course led to a serious puzzle about its purpose. However during Christian vandalisms AD the lion with its base was destroyed and pieces of lion were moved from the top of the cone pyramid to the river Strymonas.

Without faith in the resurrection there would be no Christianity at all. The Christian church would never have begun and the Christianity would have fizzled. Christianity stands or falls with the truth of the resurrection. If you can disprove it, you have disposed of Christianity. Remember how he told you, while he was still with you in Galilee: Shock from the loss of blood on the cross, His wounds and all that He suffered sent Him into a semi-coma. And when they took Him off the cross and put Him in the tomb, the aroma of the spices and the coolness of the tomb revived Him. When He came out of the grave, the disciples assumed that He was resurrected. If this theory is true, it means that Jesus successfully survived severe beating and loss of blood, crucifixion and further loss of blood, the spear thrust into His side, again draining the blood out of His body through a gaping wound. He survived entombment with 75 pounds of spices on His already weakened body. He survived three days with no food or water. Woke up without any medical assistance having lost most of His blood, stood up in his mummy-like grave clothes which by now would have hardened around the body like plaster, moved the stone, overpowered four highly trained Roman guards carrying shields, daggers, and javelins, walked seven miles to Emmaus on feet that had been pierced with nails and convinced everyone that He was fine and alive from the dead. And this story has been widely circulated among the Jews to this very day. In fact, they have the opposite motive! They would have loved to produce the body - it would have crushed the growing movement of Christianity, which they desperately wanted to put out of existence, and would have saved a lot of time, money and effort on the part of the Roman government in terms of persecution. People will die for their faith if they believe that it is true. They thought they saw Jesus because they wanted to see Him so badly. However, 1 Hallucinations are not group events! It was empty, they jumped for joy, thought that he was alive and the rest is history. However, 1 This was not a little execution. This was the biggest execution in history, with crowds of people. Scripture tells us the name of the person, Joseph of Aramathea, whose tomb it was. He would have certainly pointed out that they had gone to the wrong tomb. Over witnesses recorded in the Bible who saw Jesus alive. A faith with a resurrection message at its core that spread like wildfire -- timid fishermen and accountants, who are suddenly and radically changed -- refusing to back down on their claims even in the face of horrific torture! The very same disciples who three days before backed down and denied Jesus Christ when challenged by a servant girl. He would ride into Jerusalem on a donkey Zechariah 9: After that, he appeared to more than five hundred of the brothers at the same time, most of whom are still living, though some have fallen asleep. Then he appeared to James, then to all the apostles, and last of all he appeared to me also, as to one abnormally born. Objection These are biased writers. It is worldwide in scope. Its history can be traced back to Palestine around A. Did it just happen or was there a cause for it? These people who were first called Christians at Antioch turned the world of their time upside-down. They constantly referred to the resurrection as the basis for their teaching, preaching, living and most significantly, dying. The Fact of the Christian Day. Sunday is the day of worship for Christians. Such a shift in the calendar was monumental, and something cataclysmic must have happened to change the day of worship from the Jewish Sabbath, the seventh day of the week, to Sunday, the first day. Christians said the shift came because of their desire to celebrate the resurrection of Jesus from the dead. In its pages are contained six independent testimonies to the fact of the resurrection. Three of them are by eyewitnesses: John, Peter, and Matthew. Paul, writing to the churches at an early date, referred to the resurrection in such a way that it is obvious that to him and his readers the event was well known and accepted without question. Are these men, who helped transform the moral structure of society, consummate liars or deluded madmen? These alternatives are harder to believe than the fact of the resurrection, and there is no shred of evidence to support them. Nothing but the antecedent assumption that it must be false could have suggested the idea of deficiency in the proof of it. Simon Greenleaf, one of the principle founders of the Harvard Law School and an atheist at

that time , originally set out to disprove the biblical testimony concerning the resurrection of Jesus Christ. He was certain that a careful examination of the internal witness of the Gospels would dispel all the myths at the heart of Christianity. But this legal scholar came to the conclusion that the witnesses were reliable, and that the resurrection did in fact happen. Turns out, and he admitted, that his findings proved the resurrection. **The Basics of Landlording** The bare minimum for a viable Tenant "house". Colony Deeds cannot just be placed willy-nilly, and will not summon a Tenant unless a bare minimum set of requirements are met. The area must be a fully-enclosed space with floor, walls, ceiling and background wall. Walls, ceilings and floors can only have "holes" if they are filled with a Door of some type. Background walls must have no open-air gaps. On player ships, uncovered ship windows are acceptable background walls. Platforms do not count as floors or ceilings. There must be at least 1 Light and 1 Door. There can only be one Colony Deed per room. After those requirements are met, the Tenant type summoned depends on the Tags of the objects placed within the room. If a Tenant has multiple Tag requirements, both tags do not have to be present on the same object: If the room meets the conditions for more than one "themed" Tenant type, the Tenant will be chosen randomly between the potential options. If you are not getting the Tenant type you like, remove the Deed and try redecorating the room with only the bare requirements for that Tenant, then add more objects once they are summoned. Adding or removing any objects beyond the minimum requirements of a current Tenant will not affect their disposition. Over time, rent will become available see " Rent Tables " below , indicated by a present on the Colony Deed screen. Interacting with the Deed summons the Tenant back to pay up. Unpaid rent can be lost if the Tenant is made unhappy or killed, resetting the rent timer. Removing the Colony Deed from the wall evicts the Tenant with no penalty unless Rent is waiting to be collected, in which case it is lost. A Tenant will also move out in a huff if conditions change to drop below their minimum living conditions and the problem is not solved shortly. NPCs created by Tenant-given "rescue" quests will stick around indefinitely, and may themselves offer Quests. However, they pay no rent on their own, and removing the Colony Deed of the Tenant who brought them in will not evict them. They can be killed by hostiles or environmental hazards, but unlike Tenants will not respawn. Available Tenants Tenants fall under three general categories: Villagers, Guards and Merchants. Villagers Villagers are very common Tenants who basically wander around and mess with stuff. When threatened by Monsters or enemy NPCs, they can do little more than run away.
