Chapter 1 : Economic Development

The Economic and Product Market Databook Market Potential Estimation Methodology Overview This study covers the outlook for products and services in Bambari. Estimates reported are given for the latent demand, or potentia.

The Comanches and Lipan Apaches were also known to travel through the area. Texas thus became an independent country with its own president, congress, and monetary system. After Vice President Mirabeau B. In , the Texas Congress formed a commission to seek a site for a new capital to be named for Stephen F. The block grid plan was bisected by a broad north-south thoroughfare, Congress Avenue, running up from the river to Capital Square, where the new Texas State Capitol was to be constructed. A temporary one-story capitol was erected on the corner of Colorado and 8th Streets. On August 1, , the first auction of out of lots total was held. Travis County was established in , and the surrounding counties were mostly established within the next two decades. The men and women who traveled mainly from Houston to conduct government business were intensely disappointed as well. By , the population had risen to , of whom nearly half fled from Austin when Congress recessed. Upon threats of Mexican troops in Texas, Houston raided the Land Office to transfer all official documents to Houston for safe keeping in what was later known as the Archive War , but the people of Austin would not allow this unaccompanied decision to be executed. The documents stayed, but the capital would temporarily move from Austin to Houston to Washington-on-the-Brazos. The voting by the fourth President of the Republic, Anson Jones , and Congress, who reconvened in Austin in , settled the issue to keep Austin the seat of government, as well as annex the Republic of Texas into the United States. The University of Texas held its first classes in , although classes had been held in the original wooden state capitol for four years before. These projects were enabled in large part because the Public Works Administration provided Austin with greater funding for municipal construction projects than other Texas cities. Many of the municipal improvement programs initiated during this periodâ€”such as the construction of new roads, schools, and hospitalsâ€”were deliberately designed to institutionalize this system of segregation. Deed restrictions also played an important role in residential segregation. After most housing deeds prohibited African Americans and sometimes other nonwhite groups from using land. The growth generated by this boom largely passed by Austin at first, with the city slipping from fourth largest to 10th largest in Texas between and In , the U. The University of Texas at Austin emerged as a major university. In , the city occupied a total area of Long that is partly used for cooling water for the Decker Power Plant. The lakes also provide venues for boating, swimming, and other forms of recreation within several parks on the lake shores. Its mission is to "tell the story of Texas". Some of the clays have pronounced shrink-swell properties and are difficult to work under most moisture conditions.

Fortunately, there are many great sources of data on the population and how it is changing – this is called Demographics Data. This page is a collection of some of the best sources for demographics data. Most of these links are to public data sources that are free. General Business Statistics The federal government collects and reports statistical information for a wide range of demographics data and economic topics. You can search for collected information at <http://www.whitehouse.gov>: The White House has also prepared a compilation of frequently requested topics on their web site. The greatest source of demographics information can be found at the AmericanFactfinder, the Census Bureau's web site for disseminating Census data. Please realize that all most all services, including GIS, that offer demographics use the Census data. So, you may be paying for a service that is giving you demographics that you could easily be looking up your self for free. If you are paying for your demographics please check to make sure you are getting information that is worth the money you are spending for demographics. During each decade, the Census Bureau collects data on a variety of different subjects, including economic and business related, housing, and special demographics tabulations. See Subjects A to Z to locate the information you need. The Statistical Abstract of the United States is a compendium of statistics from a variety of government and other publications. Sometimes, information on best customers or target markets can be found within articles in newspapers and magazines. American Demographics is the primary resource for market research articles. Their web site provides snippets of information for free and full articles for a nominal fee. The Population Reference Bureau provides overviews of their studies at <http://www.prb.org>: Includes statistics on bankruptcies, housing, employment, and income. See migration by year for the s for MSAs and States. Look up the ZIP Code for any address here. Consumer Expenditures Consumer Expenditure Survey – consumer expenditure estimates by region and consumer type. Crime Demographics Bureau of Justice Statistics – everything you want to know about crime and crime control. Employment Bureau of Labor Statistics Official Source for statistics on unemployment, employment and wages. Hispanic Demographics Hispanic Research provides overview of Hispanic market. Religious Affiliation and Attitudes Demographics Adherents. Compilation of data from several different sources. American Religion Data Archive Create maps and charts of religious affiliation by state and county. Access to other surveys on religious affiliation and opinion. Key findings and statistics for the United States can be found on this web site. Barna Research conducts public opinion surveys of Christians and provides analysis of Christian Churches. Hartford Institute for Religion Research a source for various studies on culture and religion. Includes links to other research centers and denominational statistical offices. North American Jewish Databank statistics are not available online, but information on research conducted nationwide and in various communities can be found here. Contact information for data sources is provided. Religious Congregations and Membership: This Catholic group conducts a census of religious bodies every decade at the same time as the U.S. Highlights and summary information can be found at the web site along with information on how to purchase the full report. Includes statistical information on religious congregations as well as contact information for denominational offices. Includes most religious bodies found in Canada and the United States. BLS Demographics Data Several programs at the Bureau of Labor Statistics make significant amounts of data available for specific demographic categories. Demographic categories used by BLS include sex, age, race, and ethnic origin. The data by age generally are limited to persons of working age, defined as 16 years and older. Data on race generally are for blacks and whites. Data on ethnicity are confined chiefly to information on persons of Hispanic origin. BLS Statistics, by demographic category: Demographic Characteristics of the Labor Force Current Population Survey – A monthly household survey provides comprehensive information
